

C. C. BANQUET WILL OPEN EXPANSION CAMPAIGN

Final Plans for Drive Will Be
Launched Monday Night
At Dinner

THE expansion campaign of the Glendale Chamber of Commerce will be formally launched at a banquet that is to be held in the Citizens' building on Monday night at 7 o'clock, when the members of the various teams and many prospective members of the organization will meet to discuss the plans that have been formed for the drive that is to be made to bring the membership up to at least 1500 members and that is to furnish the organization with a service fund sufficient to permit it to branch out in an aggressive campaign to bring new residents and industries to the city.

Charles Toll will preside at the banquet, and the principal speaker of the evening will be Will G. Farrell, one of the Los Angeles business men who have volunteered their services as speakers for the Chamber of Commerce of that city. Charles P. Bayer, manager of the organization service department of the Los Angeles Chamber of Commerce, will also address the guests, pointing out the methods that are to be followed in putting the local Chamber of Commerce on a sound basis that will insure the support of a large and enthusiastic membership that will back every project that is adopted by the organization for the benefit of the city and its people.

Program of Music
Mayor Spencer Robinson has also been placed on the list of speakers and a program of music and community singing has also been prepared for the entertainment of the directors, and the guests.

The main business of the evening, however, will be the development of the plan of campaign and the arrangements for a drive that will bring into the Chamber of Commerce a large and aggressive membership whose sole aim will be the establishment of Glendale on a firmer footing than the city has ever known.

Indorsements of the expansion plan have been received within the past twenty-four hours from the Kiwanis club and from the Glendale Builders League.

Local Elks to Hear Song Hit Over Radio

Monday night, at 9:15 o'clock, Glendale Elks, music lovers and friends of Code Morgan, of 2042 Kenneth road, will have the pleasure of "listening in" when the Hollywood Californians will sing over the radio, Mr. Morgan's new popular waltz song, "Under the Spreading Antlers."

This is the latest composition of Mr. Morgan's, dedicated to the Elks lodge, and is making a decidedly big hit in Southern California and eastern states.

The song was recently sung at a Glendale lodge meeting by Edwin J. Albright.

Arrest of Six May Solve Murder Case

YOUNGSTOWN, O., June 9.—With the arrest of six persons here today, police believe they have "hot clues" which may lead to a sudden solution of the fiendish murder of Helen A. Drachman, 21, pretty V. W. C. A. girl, whose partly clad and badly decomposed body was found under a small culvert on the Hubbard road near here yesterday.

L. A. Citizens Organize to Aid in Protecting Women

LOS ANGELES, June 9.—Angered by the flood of attacks on young girls and women in Los Angeles and vicinity during the last few days, vigilante committees of citizens were reported organizing in various sections, preparing to take decisive action in case the attack wave does not subside.

Hundreds of citizens were said to be arming themselves in order to aid the police in the fight against the degenerates.

Intending to arouse the entire city over the situation, making Los Angeles so dangerous for the class of men who attack women under the cloak of night that they will flee from here, several prominent local ministers are preparing for a huge indignation meet-

British Studying Germany's Offer, Await Reaction

LONDON, June 9.—British economic experts today studied the latest German reparations offer while the cabinet marked time until it receives their report. British officials are observing closely the reaction of the German proposals upon the other allies.

Premier Stanley Baldwin will summon a cabinet council early next week to canvass the situation. It is likely a formal statement will be made in the House of Commons before Great Britain makes any move in the Ruhr reparations crisis.

Premier Mussolini's speech before the Italian senate at Rome was generally interpreted as meaning that Italy is ready to join an allied conference to consider reparations if the question of war debts is taken up.

FLOOD SWEEPING ABOUT WICHITA

Portions of City Under
Water; Hundreds Flee
From Their Homes

WICHITA, Kan., June 9.—Wichita and vicinity today was facing the worst flood in its history, following a rainfall of more than five inches.

Many portions of Wichita are flooded and hundreds of persons have been forced from their homes and are taking refuge in mills, office buildings and the like.

Both Big and Little Arkansas rivers are rising and weather reports indicate a rise of six feet more in the Little. This is expected to send it out of its banks.

Water is raging waist deep through some of the principal streets. Railroads report more than a dozen bridges out.

Wire communication in some sections is demoralized.

The Ninnesch river in southern Kansas is reported at a record height already.

Servant Confesses to Slaying Young Nurse

NEW YORK, June 9.—Elionzo Lazarda, a Filipino servant, confessed today after a severe grilling, according to police, that he murdered Helen "Blossom" Martin, a pretty 24-year-old nurse. He admitted, the police said, he lured her to his room and choked her. Both Lazarda and Miss Martin, rumored to have been sweethearts, were employed by George B. McAuliffe.

The Filipino was arrested late last night as he attempted to pitch the girl's body, wrapped in heavy paper, into the channel between Staten island and the New York coast.

Railroad Telegraphers' National Bank Opens

ST. LOUIS, Mo., June 9.—The Telegraphers' National bank, the first financial institution of its kind to be established here, opened for business today. The opening marked the thirty-seventh anniversary of the founding of the Order of Railroad Telegraphers, which organization controls the bank.

Officers of the bank expected to enter \$1,500,000 in deposits the first day, it was announced. The bank has a capital of \$500,000 and a surplus of \$100,000. E. J. Manion, president of the telegraphers' order, is president.

General Wood's Yacht Hits Shore in Storm

MANILA, P. I., June 9.—The Apo, General Wood's official yacht, was driven ashore during a squall on Manila bay today, but was undamaged. The yacht was pulled off in time to enable General Wood to depart on a tour of inspection of the Culion.

Plans for Jinks Day of the Glendale Realty Board, to Be Held Saturday, June 16, in the Haddock-Nibley park on Verdugo road, begin to take on glowing colors and wonderful proportions. It is understood that only mem- bers of the board and their fam- ilies are to be present, the affair being strictly a "family" party.

Peter Hanson, chairman of the committee, announces that weird and amazing situations will arise and that unmentionable stunts will be perpetrated upon the unsuspecting realtors. Anyone who cannot stand a shock should not be present, the committee feels, and it might be well for those with weak hearts or nervous dispositions to have a doctor's certificate before they go to the park.

While the committee will have several doctors present for any emergency which may arise, those who are bold enough to venture out and take the risk must do so upon their own responsibility. Any who are not accustomed to laughing and cannot endure a rib-rocking encounter with old Broad Smilgus, of course, should not attend.

It was even felt that all should be advised to take out health insurance, and the committee believes that it is due all who plan to attend that this warning notice be given well in advance.

LEGION WILL TAKE OVER RESIDENCE PROPERTY

Post Votes to Purchase
Realty at 128 South
Maryland Avenue

POST 127 of the American Legion met at its hall, 610 East Broadway, last night and decided upon the purchase of property at 128 South Maryland avenue as a possible clubhouse site. Rev. C. M. Calderwood of 370 Salem street, made the official motion recommending this action. It was carried by a vote of 53 to 3.

The property consists of a fifty-foot lot on the east side of Maryland avenue between Harvard street and Broadway. It is owned by Mr. and Mrs. W. T. Ashton, who occupy one of the three flats in the two-story frame residence upon the property. There is a garage house on the rear of the lot. The total income at present is \$160 a month which is believed to be sufficient to pay the carrying charges on the investment.

The price is \$20,000, and \$200 has been paid down to cover the option. Three hundred dollars more is to be paid out of the building fund. Twenty Legionnaires are to loan the post \$250 each to be secured from local banks on personal loans.

Covered by Mortgage
The balance of \$14,500 is to be covered by a first mortgage for \$3,500 and a second mortgage for \$11,000, both running for approximately two years. The two-acre site on the northwest corner of Mountain and Campbell streets, which was recently given to the post by the community, is to serve as security if necessary.

Although the subject of building a clubhouse was not discussed, it was understood at last night's meeting that the post eventually will finance the erection of a two-story building containing stores in front which lot was mentioned. Legions quarters are to be on the second story or in the rear.

Objection to the purchase of this property was based almost entirely upon belief that the lot is too narrow for a suitable clubhouse. The possibility of securing a wider lot was mentioned, but was not discussed in detail, owing to the fact that none could be obtained at this price so close to the hub of Glendale.

Value in Speculation
The value of the property solely as a speculation was emphasized. Several Legionnaires expressed their opinion that the post has nothing to lose and everything to gain by the investment. They called attention to the fact that there is no reason why the Legion should not sell the holding at some future time, if it should so desire, and use the increment with lot elsewhere.

Commander Chalmer Day presided during the meeting. It (Continued on page 2)

REALTORS PREPARE FOR BIG OUTING

'Family Party' to Be Held
Next Saturday, June 16,
In Verdugo Hills

Plans for Jinks Day of the Glendale Realty Board, to be held next Saturday, June 16, in the Haddock-Nibley park on Verdugo road, begin to take on glowing colors and wonderful proportions. It is understood that only members of the board and their families are to be present, the affair being strictly a "family" party.

Peter Hanson, chairman of the committee, announces that weird and amazing situations will arise and that unmentionable stunts will be perpetrated upon the unsuspecting realtors. Anyone who cannot stand a shock should not be present, the committee feels, and it might be well for those with weak hearts or nervous dispositions to have a doctor's certificate before they go to the park.

While the committee will have several doctors present for any emergency which may arise, those who are bold enough to venture out and take the risk must do so upon their own responsibility. Any who are not accustomed to laughing and cannot endure a rib-rocking encounter with old Broad Smilgus, of course, should not attend.

It was even felt that all should be advised to take out health insurance, and the committee believes that it is due all who plan to attend that this warning notice be given well in advance.

LATEST NEWS

OLDEST WOMAN IN NEBRASKA IS DEAD
AURORA, Ill., June 9.—Mrs. Anna Rapp, 102 years old, said to be the oldest woman in Nebraska, is dead today at the home of her daughter here. Mrs. Rapp accounted for her advanced age by remarking, "God has forgotten me."

MAN, HIT BY AUTO, INSTANTLY KILLED
LOS ANGELES, June 9.—Apparently confused by heavy traffic on Sunset boulevard, William Goldfarb, 32, was instantly killed today when he was struck down by an automobile truck driven by F. C. Cox. According to witnesses, Goldfarb stepped from the curb near the intersection of Occidental street and started across the crowded thoroughfare. He reached the middle of the street and found himself confronted with automobiles and street cars coming from all directions. In an attempt to dodge two street cars, Goldfarb is said to have stepped in front of the truck driven by Cox. Cox was held under arrest pending an investigation.

TRAIN STRIKES AUTO AND MAN IS KILLED
LONG BEACH, June 9.—Jacob Pullman, 53, grocer, formerly of Salt Lake City, was almost instantly killed today at the Burnett street crossing of the Pacific Electric right-of-way when a south bound Los Angeles train carried the man beneath his automobile for more than 400 feet. Witnesses to the accident declare they did not hear the warning whistle of the single car train before it reached the crossing. No wig wag has been installed at this juncture. The man's body was mangled almost beyond recognition. He leaves a wife and eight children, two of whom, Mrs. Lena Cohen and Mrs. Ethel Stubbe, are residents of Salt Lake City.

PRESIDENT IN PLEA FOR 'WORLD UNITY'
WILMINGTON, Del., June 9.—"America can never be happy as long as the rest of the world is torn by strife and turmoil," President Harding declared here this afternoon at a luncheon given in his honor by the Young Men's Republican Club. "There must be in the world a spirit of fraternity and unity. I think God intended it so, and I want America to give as much as she can to the world's restoration and tranquility."

CHURCH BUILDING IS PROGRESSING

Presbyterian Structure Is
Fast Arising; Plan Work
On Sunday School

The construction work of the new Presbyterian church, at the corner of Harvard and Louise streets, is progressing most satisfactorily, states Rev. Louis Tinning, the assistant pastor of the church. The heavy steel trusses of the main auditorium are all in place, and the roofing is making good progress. The entire building will soon be enclosed. Except for the work on the tower, the brick work is nearly completed.

The stone work at the main entrance has reached such a stage of completion that something of their artistic effect when finished may already be seen.

Sunday School Work
The Sunday school department is already enclosed, and this part of the building has been plastered and the interior finishing work will soon begin. Plans are being made to open the Sunday school department for regular Sunday school work early in September. Plans are under way for the organization of classes, of several grades, in religious education, to be held five days each week. When the entire building is completed the Sunday school department will accommodate more than two thousand pupils and will be one of the most complete Sunday school plants in Southern California.

The officials in charge and the membership of the congregation are looking forward eagerly to the day when the building will be thrown open for all the work of the church. The growth of the congregation has kept pace with the growth of Glendale, and the present quarters in the old building, at East Broadway and Cedar street, have become entirely inadequate, especially in the Sunday school work.

Princess Christian Of England Is Dead

LONDON, June 9.—Princess Christian, aunt of King George, died today after a lengthy illness. Her death caused the deepest disappointment to the people. American women and many English debutantes, who were preparing to be presented to court next week. It is expected that the British court will go into mourning, causing a suspension of all social activities for several weeks.

Long Beach City Band To Give Concert Here Tonight

Glendale is to have a band concert tonight, when the Long Beach city band arrives in a special car at Brand boulevard and Harvard street and plays a few numbers before going on to the Glendale High school for a concert under the auspices of Glendale Community Service.

According to R. Ernest Tucker, the band is to arrive at 7:30 o'clock and will be met by Mayor Spencer Robinson, Val K. Holister, president of Community Service, and A. L. Baird, music chairman. After a concert on the corner the band and hosts will go to the high school where a more lengthy program will be given.

STUDENTS PROVE MUSICAL TALENT

Pupils and Teachers Stage
Two Programs Showing
Splendid Training

All councilmen present voted with the exception of Mayor Robinson, who expressed an opinion that he did not see why "the city treasury should be used to open a street to benefit the Southern Pacific."

The necessity that the City Council should take immediate action was emphasized by Mr. Bentley. He said that he and members of his committee had been working upon the location of the depot for six months and was certain that it would be placed adjoining the east end of the Bentley Lumber company's yard unless Cerritos avenue should be opened. He suggested that any more vacillation on the matter might result in the railroad company deciding to invest the \$87,000 appropriation for the station in a new tunnel somewhere.

Councilman W. A. Horn and Councilman Asa Hall both expressed the opinion that a site at the end of Cerritos avenue was preferable.

At the meeting of the City Council last Thursday night, the decision was reached, after a number of property owners in the southern section of the city had (Continued on page 3)

New Clew to Slayer Of William D. Taylor

SEATTLE, June 9.—Sheriff Matt Starwich is today seeking Otis Hefner, Texas stockman, a stockade prisoner here a few months ago, with the belief that a new clue to the identity of the slayer of William Desmond Taylor, moving picture director, killed in Hollywood a year ago, may be held by Hefner.

Jailed here a year ago, four months after the Taylor slaying, Hefner led a party from the prosecuting attorney's and sheriff's offices to the spot where he declared a bag had been cached with \$200,000 in stolen bonds, currency and a diamond ring. Recent digging near the cache indicated that some one had beat the party to it, and the bag was not found.

Attorney Crawford White today revealed that, while acting as counsel for Hefner, the latter confessed that Taylor had been slain by a gang of five bandits, of which Hefner confessed himself a member.

CITY COUNCIL ONCE MORE MOVES S. P. STATION

Holds Special Meeting and
Decides to Buy Lots to
Open Cerritos Avenue

THE Southern Pacific Company's new depot, to cost \$87,000, was moved back to the end of Cerritos avenue this morning once more by the City Council.

A special session to consider the subject was called to order at 10 a. m. by Mayor Spencer Robinson. It was attended by Councilman Sam Davis, Councilman W. A. Horn, and Councilman Asa Hall. Councilman C. E. Kimlin is en route to Chicago.

The depot committee of the Chamber of Commerce was represented by its chairman, George Bentley. He stated that it was possible for the city to secure a right-of-way for the opening of Cerritos street by pledging itself to spend \$85,000. After considerable discussion on the subject, the following motion was made by Mr. Hall and seconded by Mr. Horn:

"The city attorney shall be instructed to draw up a proper resolution for adoption at a special meeting to be held on Monday, June 11, at 1 p. m., for the purchase of property described as follows: Lots 14 and 15, block 5, tract 9 and 10, in the city of Glendale, from George T. Stewart at a price not to exceed \$85,000."

All councilmen present voted with the exception of Mayor Robinson, who expressed an opinion that he did not see why "the city treasury should be used to open a street to benefit the Southern Pacific."

The necessity that the City Council should take immediate action was emphasized by Mr. Bentley. He said that he and members of his committee had been working upon the location of the depot for six months and was certain that it would be placed adjoining the east end of the Bentley Lumber company's yard unless Cerritos avenue should be opened. He suggested that any more vacillation on the matter might result in the railroad company deciding to invest the \$87,000 appropriation for the station in a new tunnel somewhere.

Councilman W. A. Horn and Councilman Asa Hall both expressed the opinion that a site at the end of Cerritos avenue was preferable.

At the meeting of the City Council last Thursday night, the decision was reached, after a number of property owners in the southern section of the city had (Continued on page 3)

ANNUAL BANQUET OF DRAMA GROUP

Mrs. R. E. Chase Retires as
Curator After Three-
Year Term

"I think I love and reverence all arts equally, only putting my own above the others, because in them I recognize the union and elimination of my own. To me it seems as if when God created the world, that was poetry; he formed it, that was sculpture; he colored it, that was painting. He peopled it with living beings and that was the grand, divine, eternal drama." These words of Charlotte Cushman were the farewell thought expressed by Mrs. R. E. Chase, presiding last night over the annual banquet of the Drama Section of the Tuesday Afternoon club, and retiring from three years as curator.

The banquet took place in the banquet hall of the clubhouse, with sixty members and guests gathered about a table, beautifully decorated with the club colors, yellow and green. These colors were carried out in all the appointments for the five course dinner, planned and served under the direction of Mrs. A. H. Montgomery, chairman of ways and means.

Serving were a group of prettily frocked misses, including Alberta Plasterer, Caroline Ayars, Joan Ingram, Elizabeth Walker, Katherine Stanley, Mabel Todd and Margaret Alweitt.

Praise for the artistic table arrangement goes to Mesdames (Continued on page 3)

Northern China Conditions Are Serious, Claim

PEKING, June 9.—Despite the settlement of the police and gendarmes strike, a serious condition existed in northern China today.

President Li Yuan Hung urgently requested a conference with Dean DeFreitas of the diplomatic body to whom he revealed that pressure is being brought to force his resignation.

Dean DeFreitas informed him that the foreign powers would not interfere in Chinese politics, but must insist that complete protection be afforded foreigners.

Rumors that President Yuan had sought the protection of the American legation are untrue, but he has had trouble with mobs about his residence and the telephone wires were cut into the presidential residence.

HARDING DROPS DRY CONFERENCE

President Plans to Make
Address in Which He
Will Tell Policy

By GEORGE R. HOLMES
For International News Service
WASHINGTON, June 9.—Plans for a big prohibition conference at the White House between President Harding and the governors of the forty-eight states have virtually been abandoned for the present, it was learned today. There still is a possibility a way may be found to bring a number of governors to Washington this month, but it is remote, and the president has been reluctantly obliged to consider postponement until next autumn.

The proximity of the date for the president's departure on his Alaska trip, ten days hence, and the fact that in many states legislatures still are in session, making it inconvenient if not impossible for the executives to get away, having combined to prevent a conference of the kind the White House had planned.

It had been expected Mr. Harding would take the opportunity to "rebuke" those states which refuse to enact enforcement laws of their own and also to make clear the government's policy of enforcement in such commonwealths.

As it is, White House spokesmen said today, it is possible the president will devote one speech on his forthcoming swing across the continent entirely to the prohibition question, and allow it to stand as his reply to Governor Smith of New York who advanced a "state's rights" argument in support of his signing the Mullan-Gage repeal.

It is expected that the first unit will be completed before the end of the summer. The lower floor will be devoted to stores.

Mr. Guthrie announces the following additional recent central avenue deals out of his office:

Purchased by Charles A. Guthrie, the 50x150-foot lot on Central avenue facing directly up Broadway, from H. L. Miller and Ora Allen. Will sell, lease or build.

Sold for Louis Russell, to a local investor, the northwest corner of Harvard street and Central avenue. (Continued on page 3)

Derby Winner Takes Belmont Stake Race

BELMONT PARK, N. Y., June 9.—Zev, the crack 3-year-old of the Rancocas stable, winner of the Kentucky Derby, this afternoon proved his claim as the champion 3-year-old of the American turf when he raced to an impressive victory in the historic Belmont stakes, with an added value of \$50,000. Chick Vale and Rialto, coupled in the betting, were second and third, respectively.

U. S. Railway Board Cites D. & R. G. Ry.

CHICAGO, June 9.—The Denver & Rio Grande railroad was cited by the United States Railway Labor Board today for alleged defiance of orders to re-instate shop foremen who walked out and refused to work in the place of shop workers during the strike last summer. The board ruled agreements forbade dismissal of foremen who declined to displace workmen, and ordered their reinstatement.

H. E. Barnum reports that more than \$170,000 of the property in the third unit of Sparr Heights has been sold. Development work is moving apace and new pennants are being placed today to attract week-end crowds motoring through Glendale's foothills.

Harding, On Outing, To Join Social Order Of Masons

WASHINGTON, June 9.—President Harding left Washington today for a week-end trip to Delaware and a cruise on Chesapeake bay on board the presidential yacht, Mayflower.

The first lap of the trip was made by train to Wilmington, where the president was scheduled to be guest of honor at a luncheon by the Young Men's Republican club. In the afternoon he planned to motor to Milford to be initiated into the Tall Cedars of Lebanon, a Masonic social organization. On the seventy-two mile automobile trip down the Delaware coast, the president was to stop at several towns, including a half hour visit to the state capital at Dover. Besides the chief executive and Mrs. Harding, the party included Secretary and Mrs. George B. Christian, Secretary of the Interior Work and Mrs. Work, Secretary of Agriculture Wallace and Mrs. Wallace.

In Wilmington the party will be joined by Senator and Mrs. Walter Edge of New Jersey and Colonel Thomas W. Miller, alien property custodian. With the exception of Senator and Mrs. Ball, the party will accompany the president on the Mayflower cruise. After spending Sunday on Chesapeake bay, the yacht will return to Washington early Monday morning.

Mr. Harding planned, upon leaving Washington, to make no speeches on the trip. Following the initiation ceremonies at Milford, the program called for attendance at a lawn tea. This trip will be the president's last away from Washington before he departs June 20 for the west and Alaska.

CENTRAL AND BROADWAY DEAL FOR \$350,000

Charles B. Guthrie Takes
99-Year Lease on Corner;
to Erect Building

CHARLES B. GUTHRIE, of the Charles B. Guthrie Company, realtors, 110 West Broadway, has taken a ninety-nine year lease from Edgar L. Robinson on the northwest corner of Broadway and Central avenue, at a total consideration of \$350,000.

In addition, Mr. Guthrie has closed deals during the past few days for another \$150,000 worth of Central avenue property, bringing the sales of the office so far in June to the \$500,000 mark.

The property at the corner of Broadway and Central avenue, leased by Mr. Guthrie from Mr. Robinson for the long period, at the large rental, fronts 53 feet on Central avenue and 135 feet on Broadway, and is at present occupied by the residence of Mr. Robinson.

Plans are being drawn by Noerberg & Johnson of Los Angeles for a one or two-story brick building to carry a five story structure that will be erected later. This is the firm of architects who built the Los Angeles Railway building in Los Angeles, and who also built for Mr. Guthrie his fine home on Grand View avenue.

First of Unit
The present structure will be but the first unit of a comprehensive plan being worked out for the development of this valuable corner. Mr. Guthrie states, the upper floors being held in abeyance until it is decided which of the present and future offers to accept.

Mr. Guthrie has been considering, among other things, a hotel, an apartment house, club and lodge rooms, for the upper stories of the building, on which work will start immediately the architect's plans are complete.

It is expected that the first unit will be completed before the end of the summer. The lower floor will be devoted to stores.

Mr. Guthrie announces the following additional recent central avenue deals out of his office:

Purchased by Charles A. Guthrie, the 50x150-foot lot on Central avenue facing directly up Broadway, from H. L. Miller and Ora Allen. Will sell, lease or build.

Sold for Louis Russell, to a local investor, the northwest corner of Harvard street and Central avenue. (Continued on page 3)

Barnum-Walters Co. Move Main Offices

The Barnum-Walters Company, subdividers of Sparr Heights, today are moving their main offices into the Community Center building on their tract, just off Verdugo road at the intersection of Paloma and Downing avenues, inside of the Glendale corporate limits.

The new quarters are artistically furnished and the building, which will be dedicated to community meetings as the Sparr Heights district is more thickly populated, gives plenty of room to the big sales force and corps of experts beautifying the various foothill units.

H. E. Barnum reports that more than \$170,000 of the property in the third unit of Sparr Heights has been sold. Development work is moving apace and new pennants are being placed today to attract week-end crowds motoring through Glendale's foothills.

Glendale Evening News

Entered as second-class matter January 12, 1922, at the postoffice at Glendale, Calif., under act of congress of March 3, 1879. Published daily except Sunday.

LOCAL PERSONALS

Friends of H. B. Howeth of 329

North Orange street, will be sorry to learn he is quite ill at his home with a severe case of tonsillitis.

J. B. Doner of 319 North Central avenue, who has been quite ill the past week, is reported as improving and hopes to be out again in a short time.

Charles P. Brice of 304 North Kenwood street returned to his home last evening after having spent several days at San Bernardino on a business trip.

Mr. and Mrs. James H. Cunningham of 1026 Florence Place, were guests last night at a dance given by friends in the ball room of the Southern California Edison building.

Mr. and Mrs. J. M. Lovell of 505 North Maryland avenue are having the pleasure of entertaining as their house guest, their daughter, Mrs. George Baker of Bellflower.

Mrs. C. D. Lusby of 208 West Hawthorne street, leaves tonight for Oakland for a two weeks' visit with her daughter, Mrs. Harold F. Latta, formerly Miss Margaret Lusby.

Mr. and Mrs. Levert Goddard of Tujunga, formerly of Glendale, are entertaining tonight at their home a number of friends at a house warming. There will be about forty guests.

Mr. and Mrs. E. L. Parke of 377 West Lexington drive, returned to their home the first of the week, after having spent a delightful two weeks' trip at the Grand Canyon, petrified forest and several other places of interest. The trip was made via the Santa Fe.

Mrs. Randolph Bainbridge of 518 East Cypress street, and Mrs. W. M. Brown of 309 North Brand boulevard are having the pleasure of entertaining as their house guest Mr. Brown's brother, L. A. Brown of South Berwick, Maine. He will spend several weeks visiting here.

George Jordan of Ventura, former resident of Glendale and graduate of the local high school, was a visitor in Glendale yesterday. He attended the class reunion and picnic held at Brookside park yesterday. Miss Miles, an aunt of George's, was also a visitor here calling on old friends.

Miss Kathleen Woods, daughter of Mr. and Mrs. J. H. Woods of 122 West Mifflin street, will appear in a dramatic gypsy dance, La Zingana, on Tuesday evening at the Glendale high school auditorium at 8 o'clock, under the auspices of the Glendale Community Service organization.

Mr. and Mrs. Frederick Farnham, who have resided for two years with their son-in-law and daughter, Mr. and Mrs. R. B. Carls, of 145 Lincoln avenue, have moved to their new home at 903 North Pacific avenue. They will reside in a new stucco duplex house recently completed for them.

H. J. Horn, father of W. A. Horn of 221 North Louise street, left Friday via the Santa Fe for Ashland, Ohio and New York City. While at Ashland, he will visit a sister. Mr. Horn is past 80 years old and is looking forward to this trip with considerable pleasure.

Miss Eva Daniels, well known Glendalian of 324 West Colorado street, who is spending the summer in Massachusetts writes from Boston. A card to The Glendale Evening News says, "I am having a wonderful time. Wish all my Glendale friends a happy summer. Regards to The Glendale Evening News."

Miss Esther Besant of 202 West Palmer avenue is having the pleasure of entertaining as her house guest Miss Dorothy Van Meter of San Anselmo. Miss Van Meter will also be a guest at the home of Miss Madeline Love of East Elk street, and Miss Mildred McKee of 130 West Chestnut street.

Mr. and Mrs. W. G. Gregory of 404 West Myrtle avenue, are having the pleasure of entertaining as their house guest, Mrs. Gregory's sister, Mrs. Bernice Gorman. The last of this week, Mrs. Gorman will join her husband in Los Angeles, and they will return to their home in San Francisco in a very few days.

Mr. and Mrs. M. L. Townsley, Miss Margaret Townsley, Mr. and Mrs. Earl Newman and Mr. and Mrs. Claud Simons were among the Glendalians who attended the announcement party of Miss Louise Tyrone of Los Angeles on Thursday night. Miss Tyrone, who is a former resident of this city, is soon to become the bride of Alfonso F. Baker of San Francisco.

Rev. and Mrs. L. J. Millikan, of 1017 East Friday street, left Friday for Carpinteria, where they will spend the next few days with former neighbors. Rev. Millikan, who was pastor of the Southern Methodist church of that city prior to coming to Glendale four weeks ago, will deliver the commencement address Sunday to the graduating class of the Carpinteria High school.

Mr. and Mrs. William C. Reith of 1101 East Wilson street, recently entertained as dinner guests, Dr. Sucharipa, Paul Richner of Berne Switzerland, J. D. Cheese of Kerney, Neb., Paul Hofman of San Demis and Mr. and Mrs. J. L. Henderson of Glendale. Dr. Sucharipa is professor of languages and chemistry in the University of Prague, Czechoslovakia and is here on a four months' research trip for his government. He will join Mr. Reith in Prague in July.

SOCIAL EVENTS

Madrigal Concert

Glendalians are again to have the pleasure of hearing the Madrigal Club, next Tuesday night, when they will sing at the Glendale Presbyterian church under the auspices of the women of the church. The concert is to begin at 8:15 o'clock. Final rehearsal for the concert will be held Monday night at 7:30 o'clock at the church.

The Madrigal singers are favorites with local audiences and a record crowd will undoubtedly hear them on Tuesday night.

Included in the program will be: "The Call" (Andrews) "I Bring You Heartsease" (Barlow) "The Boat Race" (Redding) "A Stately Lady" (Hisher) "Mah Lindy Lou" (Harris) "Sing to Me, Sing" (Homer) "The Children's Prayer" (Max Reger) "Mrs. Helen Graham Cole" (Fox) "The Tragic Tale" (Madrigal Club) "The Waters of Minnetonka" (Learance) "Awake, Awake" (Cadman) "High School Quartette—Winifred Parke, Gertrude Heidman, Claud Whitfield and Irvin Carver."

"My Desire" (Nevin) "Madrigal Club" "A Swedish Love Song" (Lahee) "My Balm" (Vanwah) "Mrs. A. M. Draper" "Morning" (Speaks) "Reading" (Meredith) "Mrs. A. H. Montgomery" "Summer" (Chaminade) "Madrigal Club."

"The Lost Chord" (Sullivan) "The Virtuous Friend" (Madrigal Club) "Miss Lilla Litch at the organ; Mrs. Charles A. Parker, director; Mrs. John A. Wright, accompanist."

Coming for Visit
Mr. and Mrs. E. H. Learned of 1549 Glenwood road are expecting the arrival Sunday of their son and daughter-in-law, Rev. and Mrs. Willard Learned, who recently graduated from the College of Missions at Indianapolis, Indiana.

Rev. and Mrs. Learned are well known in this city, both of them having attended the Glendale high school.

Following Rev. Learned's graduation from Occidental College two years ago he was married to Miss Gertrude Learned, who immediately enrolled in the Missionary college at Indianapolis. They are now prepared to go to Africa to work among the natives, the date of their departure from this country being announced as some time next fall. They expect to spend the summer in Glendale.

Informal Party
Miss Margaret Crawford of 800 South Central avenue, was hostess Thursday night, when she entertained a number of her girl friends at an informal party.

During the evening music, dancing and games were enjoyed and at midnight delicious refreshments of chicken patties, cake and coffee were served by the hostess.

Those present were Miss Lillian Schick, Miss Dorothy Kramer, Miss Carol Mae Evans, Mrs. William Crawford, Mrs. George H. Herald, Mrs. E. W. Evans, Mrs. Dorothy Patterson Talbott, of Glendale, and Mrs. J. C. Palmer of Los Angeles, and the hostess, Miss Margaret Crawford.

Banquet-Social
The Epworth League and the High School League of the First Methodist church will participate in a banquet and social Wednesday night, June 13, in the social hall of the church. The affair will begin at 6:30 o'clock. It is announced, Cecil Percy, of the Epworth League and Kenneth Lee of the High School League are chairmen of arrangements for the affair.

Following the banquet a short business session will be held, after which the evening will be devoted to games and a general good time.

Club Luncheon
Mrs. J. C. Waite of 429 West Lomita avenue, was hostess yesterday at a daintily appointed luncheon to the members of the Navajo Needlework Club.

The rooms were attractively decorated in yellow and white with spring flowers. The luncheon table appointments were also carried out in the same color scheme. Following the luncheon the afternoon was spent in needlework.

Those present were Mesdames, M. C. Fuller, J. D. Root, Frank Overton, S. A. Koontz, E. O. Carlisle, Mark Carlisle, L. O. Carlisle and Mrs. Colin Cable, special guest and the hostess Mrs. J. C. Waite.

Gives Stag Party
Charles Talbott of 411 South Pacific avenue was host Thursday night when he entertained a number of his close friends at a "stag" party. A regular Dutch supper was served and a general good time enjoyed.

Those present were J. C. Palmer and Harold Bush of Los Angeles, Robert Evans, Donald Cowlin, George Hastings, W. F. Talbott, Luray Gossman, Roy Selover of Glendale, and the host, Charles Talbott.

Joint Meeting
The Women's Relief Corps and auxiliary, the Kensington Club, will hold a joint meeting Wednesday afternoon, June 13, at 2 o'clock at the G. A. R. Hall. This affair will be a miscellaneous shower for Miss Muriel Bowen, a June bride-to-be. Miss Bowen has held the office as color bearer of the W. R. C. for about two years.

Consider Business
Routine business occupied the time last night at the meeting of Glen Eyrle chapter, Eastern Star, at the Masonic hall. Miss Mildred Lyon, worthy matron, directed the meeting.

Because of the death of Mrs. A. W. Tower, the parcel post party planned for last night was postponed until a later date.

Home Wedding

At a home ceremony last night, Friday, June 8, 1923, at 814 East Harvard street, Miss Helen Engle, daughter of Mrs. J. A. Engle, was married to George E. Stanley, son of Mr. and Mrs. N. H. Stanley, of 738 South Maryland avenue. Rev. Louis Tinning, assistant pastor of the Glendale Presbyterian church, was the officiant, reading the double ring ceremony, at 8 o'clock. There were thirty relatives and close friends present.

The Engle home was a bower of flowers for the wedding, quantities of Shasta daisies, pink roses and other flowers being arranged in the various rooms.

At the hour for the ceremony, Miss Claudia Wright of Glendale played the Lohengrin march. Miss Engle was attended by Miss Mildred Sawyer of Hollywood, and Howard Stanley attended his brother as best man.

An informal reception followed the ceremony, Mrs. Engle being assisted in entertaining by her daughter, Mrs. Logan Fairchild, of Altadena, and by her sister, Mrs. Lucy Webster, of Glendale.

Mr. and Mrs. Stanley both attended the Glendale High school and later the Southern branch of the University of California. Mrs. Stanley is bookkeeper in the Glendale Board of Education office, while Mr. Stanley is a student at the University of California, and will return in the fall to resume his studies.

After a short trip, they will be at home at 814 East Harvard street.

Gives Rose Party
Yesterday afternoon Mrs. John W. West of 310 North Maryland avenue, and mother, Mrs. Sarah Thompson, entertained a number of friends at a rose party at the West residence.

The decorations of the rooms were artistically carried out in the rose design, and with many beautiful roses attractively arranged in large bouquets.

During the afternoon several musical selections were given by Miss Margaret West which were greatly enjoyed.

Later in the afternoon games and refreshments were enjoyed. Those present were Mesdames, W. J. Smith, L. Ardery, Blachly, J. W. Crigler, J. J. Davis, Asa Hall, D. D. Horning, D. R. Boyd, D. S. Rae, C. J. Berry, G. W. Fletcher, Grant Weigand, C. J. Slaughter, M. P. Harrison, Miss Margaret West and the hostesses, Mrs. Thompson and Mrs. West.

Luncheon Guests
Miss Mildred McKee, of 130 West Chestnut street; Miss Esther Besant and Miss Madeline Love, also of Glendale, were guests yesterday at the home of Miss Dorothy Strasburg, of Los Angeles, when she entertained a number of guests at a daintily appointed luncheon complimenting Miss Dorothy Van Meter, of San Anselmo. Other guests were Miss Mildred Ross of Hollywood and Miss Marion Wiley of Los Angeles. All those present are college chums, having attended the University of California at Berkeley.

Home From Trip
Rev. and Mrs. C. M. Calderwood of 370 Salem street, and Mrs. Calderwood's mother, Mrs. Helen A. Hancome, and Mr. and Mrs. B. E. Bayton of Hollywood, returned home Wednesday from a ten day motor trip, which took them first to Yosemite valley, for a three day outing, and then on north to San Francisco.

The party returned by the coast route traveling over 1250 miles and enjoying a delightful vacation.

New Orchestra Will
Render Music Tonight
The dance to be given at the Knights of Columbus hall tonight by the "Glendalians" will introduce to local musical and dancing circles a new orchestra that has been formed by a group of young men who are residents of Glendale and who are said to possess genuine musical talent. The members of the orchestra are: Frank P. Coughlin, G. E. Rominger, Albert O'Clair, Paul Fisher, Bill Hatch and Herbert Bruck.

It is their plan to give a dance every month, as well as to play for other dances that may be given here or in the surrounding cities, and already they have made arrangements to play on several dances in the near future.

Legion Decides to
Purchase Property
(Continued From Page 1)
was attended by members of both the Legion and the Auxiliary.

Preceding the business session, a number of ragtime numbers were played upon the piano by William Hatch of Altadena. His repertoire included "Kitten on the Keys," "Peggy Dear," "Tiger Rose," "Who's Sorry Now?" and "Three o'Clock in the Morning."

Two groups of duets were sung by Mr. and Mrs. H. E. Cavanah of 230 North Orange street. Miss Lilla Litch of 424 North Louise street accompanied them. Tosti's "Goodbye" and "On Moment that I Bless" were especially applauded.

A short talk on the making of phonograph records was made by Harry James of 1560 East Wilson avenue. He used a portable machine upon which to play several recordings recently made by himself.

PLAN SERVICE AT GROUND BREAKING

Grand View Cemetery Will
Be Scene of Ceremony
Sunday Afternoon

Glendale and Burbank will join hands Sunday afternoon at 4 o'clock, at beautiful Grand View cemetery, in the Sunset Service ceremonies coincident with breaking ground for the new mausoleum and dedicating a crypt for historical records.

Arrangements are in the hands of G. D. Mason, who has to his credit the erection of five mausoleums in various parts of the country and is considered one of the greatest living experts on this type of architecture.

Addresses will be delivered by Dwight W. Stephenson of Glendale, and by Rev. Thomas H. Stevenson of Burbank. Revs. Thomas F. Allen, Ernest A. Main and Leslie G. Parker, all of Burbank, will also participate in the service, each turning three shovelfuls of dirt, together with Rev. Stephenson, thus "breaking ground" for the excavation.

Public Invited
Each of the four pastors, it is understood, will occupy a corner of the proposed structure and each will operate his shovel simultaneously with the others.

The crypt for historical records will be dedicated and sealed during the ceremonies, not to be opened again for fifty years, when a similar service will be held.

The public, who are cordially invited to attend the services tomorrow afternoon, are free to place within this crypt any historical matter they wish, which should be put in an envelope and sealed.

Following is the program:

Hymn—By the audience.

Invocation.

Address—"Mausoleum Idea," by Dwight W. Stephenson.

Poem—"Gladys Fischer and Elsie Kirkpatrick."

Poem—"Mrs. Hallie M. Fillbach."

Song—"Major Stephen Robinson."

Address—Rev. Thomas H. Stevenson.

Reception of Historical Records—

Major James C. Crawford.

Turning of the Consecrated Soil—

Rev. Thomas F. Allen, Rev. Ernest A. Main, Rev. Leslie G. Parker, Rev. Thomas H. Stevenson.

Prayer—Charles Vincent Clay, Chaplain.

Philips, Charles H. Russell; F. L. Munro, Charles H. Russell; F. L. Stillwell Moore, Accompanist.

Glendale Athletics

To Play San Gabriel

The Glendale Athletic Club

will meet the San Gabriel

team tomorrow afternoon, at

Verdugo park. The game is

called for 2:30 o'clock.

West Aggerson, former Glendale

Union high school pitcher,

will hurl for the G. A. C.'s, and

it is believed he has the same stuff

on the ball he used so successfully

against Pasadena, last Sunday.

Verdugo park, where the game

will be played, is located on Verdugo

road and can be reached

easily, either by motor or by the

Glendale and Montrose cars.

The six mechanical powers, the

elements of which more complicated

machines are made, are the

screw, lever, wedge, wheel and

axle, pulley and inclined plane.

The hitting of Russell, who

smote a homer and a triple, and

the relief pitching of Morris-

son gave the Giants a 9 to 6 ver-

dict over the Giants.

New French Star Born of Americans

Mile Anderson.

Mile Anderson, who has just won the first prize at the Conservatory of Dramatic Art in Paris, bids fair to become one of the foremost stars of French drama. She was snapped while playing the role of Joan of Arc recently.

Pupils and Teachers Give Two Programs

(Continued from page 1)
Waltz (Ascher), "Cupid's Heart" (Ascher), "Lilacs" and "Moonlight Schottische." One feature of their work is their apparent pleasure in performance, shared by their hearers who heartily enjoyed them.

Advanced Program
Other orchestral music was given by the advanced orchestra, composed of older children. They did equally as well and received their share of praise for the program. They played "Bohemian Girl Selections" (Balfé), "Homeless Romance" (Arthur), "William Tell Selections" (Rossini), "Bohemian Dance" (Engelmann), and with the junior orchestra played a march number.

There were four junior choruses taking part in the program, the Wilson Avenue Girls' Glee club, the Glendale Avenue Girls' Glee club and the Glendale Avenue Boys' Glee club. These included countless promising voices, which will furnish much talent for coming high school glee clubs.

Choral Numbers
The choral numbers were "Gipsy Song" (Roumanian), "Come Where the Lilacs Bloom" (Thompson) by the Wilson Avenue girls; "Gipsy Trail" (Galloway) and "In Spain" (Chiara) by the Glendale Avenue boys; "Barcarolle" (Offenbach) and "May Morning" (Denza) by the Glendale Avenue girls; and "Mammy's Voice" (Southern) and "Volga Boatman" (Russian) by the Wilson Avenue boys.

One of the pleasures of the evening was the singing by the City Teachers' Choral club of "Songs of Spring, Cantata" (Carl Busch).

Missionary to Talk on Cannibal People

Rev. R. C. Nicholson will give an address at the Glendale Presbyterian church tomorrow at the evening service. His subject will be "Life Among the Head Hunters and Cannibals." He has been a missionary in the Solomon Islands of the South Pacific for the past fourteen years. When he went to this field the natives were more bloodthirsty and ferocious than wild beasts. Under the influence of the Gospel teaching the island where he has been working is now a peaceful, civilized, enlightened Christian community. The work has also spread out to neighboring islands with the beginnings of similar results.

The address given by Mr. Nicholson will be illustrated by stereopticon slides prepared from photographs taken by himself during the past years of his work. The changes wrought in the Solomon Islands under the teaching of Mr. Nicholson and his associates is said to be one of the most wonderful in all history. His work as a missionary has been compared to that of John G. Paton, and the message he brings to his audience is said to be one of the most striking and thrilling of any missionary message of modern times.

TRADE TRIP WILL INCLUDE EUROPE

Cement Co. Official Leaves
For Extended Journey
Of Inspection

William C. Rieth of 1101 East Wilson street, left Wednesday on an extended business trip in the interest of his cement company, which will take him to all the principal cities of the United States and on June 26 he will sail from New York for Europe where he will join the president of the company, Carl Leonard. They will visit all the principal cement industries of Europe and will not return until October.

Prior to Mr. Rieth's leaving on this extended trip, Mr. and Mrs. W. S. Weaver of Los Angeles entertained last Sunday. Mr. and Mrs. Rieth and daughter Wilhelmina, at their cabin at Lake Malibu, and later in the evening, at dinner at their Los Angeles home. There were also several other guests. On Tuesday, they were the dinner guests of Mr. and Mrs. J. L. Henderson of Stocker street, and on Wednesday they were the all day guests of Mr. and Mrs. Harold Roebuck at their ranch home in Ventura boulevard.

Central and Broadway Corner in Big Deal

(Continued From Page 1)
nue, 50x150-foot lot with six-room house.

Sold for Fred A. Sweet, to W. R. Newport, the 53x150-foot lot 150 feet north of Broadway.

Sold for A. B. Holt, to M. V. Blenkiron, the 106x188-foot lot on the east side of Central avenue, between Broadway and Wilson avenue.

Another Building

Mr. Guthrie also announces that Metcalf & Ryan of Los Angeles have purchased, through O. M. Newby, the northwest corner of Central avenue and Ivy street, 100x150 feet, and will erect a large building on the site, which directly adjoins that purchased by Mr. Guthrie, facing up Broadway, as above listed.

In making these announcements Mr. Guthrie calls attention to a full-page advertisement he placed in The Glendale Evening News three years ago, prophesying that Brand boulevard would be a great business street. His prophecy was fairly swallowed up in the fulfillment.

"I am now prophesying, by advertisements placed in The News," says Mr. Guthrie, "that Central avenue will be the second great business street of this city, forming with Brand boulevard by connection with Broadway, a letter 'H,' along whose lines the business of Glendale will flow, and within the boundary formed by whose extremities will grow up a magic square, that will be the business district of the city for many years to come."

Divorce Case Recalls Strange Love Affair

SAN RAFAEL, June 9.—An interlocutory decree of divorce which will become final in a year was entered in the court records today in the suit of Mrs. Edith Sprockels Wakefield against Frank H. Wakefield, wealthy San Francisco and Manila business and clubman.

The divorce decree recalled the remarkable love triangle in which Mrs. Sprockels figured last October when pretty Nellie Kendrick charged that she had offered her \$100 a month for the love of her artist husband, Rodney Kendrick. Mrs. Kendrick sued Mrs. Wakefield for \$25,000, but death intervened and the suit never came to trial. Kendrick is now free to marry Mrs. Wakefield, which will be at the end of a year. Her divorce was granted on the grounds of desertion and was not contested by Wakefield.

City Council Again Acts on S. P. Depot

(Continued From Page 1)
spoken, to permit the railroad company to locate the depot where it pleased, either at Cerritos avenue or Eulalia street, provided it cost property owners nothing. The Council agreed to write the railroad officials to that effect.

Property owners took the position that they would fight the plan to form an assessment district to pay for the opening of Cerritos. They said if the railroad company would pay all costs they would not object to the building of the depot at Cerritos. Others said the city has no legal right to take money from the treasury to help meet the cost of the opening.

Members of the Chamber of Commerce committee point out that Cerritos is the "logical" place for the depot, especially as it would be closer to Pacific Electric transportation.

Arrest Officers in Plot Against Premier

PARIS, June 9.—Fascisti police at Milan have arrested a number of officers formerly attached to Gabrielle D'Annunzio's "Fiume legionnaires," on the charge of plotting against Premier Benito Mussolini, according to a dispatch from Milan today. Secret police were said to be watching D'Annunzio.

Police raided the homes of officers who had served under D'Annunzio in Fiume. Among those arrested was Major Baseggio.

ANNUAL BANQUET OF DRAMA GROUP

Mrs. R. E. Chase Retires as
Curator After Three-
Year Term

(Continued From Page 1)
Harry Lockwood, L. G. Sherman and Malvern Barker.

The affair marked the culmination of Mrs. Chase's three years as curator and at the close of the dinner when she rose to introduce the after-dinner program she received a most inspiring greeting.

She first expressed her appreciation for the co-operation received during the past three years and briefly outlined the accomplishments of the section, featured by a contribution of \$800 cash to the building fund, and the purchase of stage equipment valued at over \$1000.

After the quotation from Charlotte Cushman, Mrs. Chase introduced Mrs. Max Green, the new curator, who responded with a pledge to carry on the splendid work of Mrs. Chase.

The annual banquet is primarily for the entertainment of the husbands of the section members, and a toast to the husbands was given by Mrs. Chase. She said: "Man is the whole encyclopedia of fact. Man is of soul and body formed for deeds of high resolve. How poor, how rich, how abject, how august, how complicated, how wonderful is man. How passing wonder, He who made him such."

Describes Woman

A response was given by Dr. R. E. Chase, who quoted from Matthew Henry: "That woman was made of a rib out of the side of Adam, not out of his feet to be trampled upon by him, but of his side, to be equal with him; under his arm to be protected and near his heart to be loved. I'm very fond of the company of ladies; I like their beauty, I like their delicacy, I like their vivacity and I like their silence."

The attainments of the Drama Section were most fittingly recited by Mrs. C. E. Hutchinson, past president of the club, and other clever toasts were given by Albert Pearce, Mrs. Daniel Campbell, Harry Lockwood, Dr. H. R. Boyer, Dwight Stephenson, Ray Galvin, W. M. Nash, Jr., Malvern Barker, L. G. Sherman, Mrs. Sherman and A. L. Ferguson.

Special guests were Mr. and Mrs. Daniel Campbell and Miss Kathleen Campbell, Mr. and Mrs. A. H. Montgomery, Mr. and Mrs. Preston Smith of Los Angeles, Dr. and Mrs. Stone, Dr. and Mrs. Boyer.

After the program dancing was enjoyed until a late hour.

Night School Nine Is Winner; Score 8 to 7

The Night School triumphed over the City team last night in a close seven-inning game of the Community Service Twilight league series, the final score being 8 to 7 in favor of the midnight oil-burners. Given another inning and the politicians might have tipped the see-saw in their favor, as they were just about getting down to official business when the final gong sounded.

Monday night, June 11, there will be a double-header on the Glendale Union High school grounds, starting sharp at 7:30 o'clock. The American Legion lads and the Night School boys will make up one contest, the Newton Electrics and Smith Fords the other.

GARBAGE COLLECTION

T. H. Sweet, sanitary inspector, announces that the days for the collection of garbage for that section of the city south of Colorado street, remain Wednesday and Saturday. There have been several inquiries as to possible changes but Mr. Sweet states that they remain the same.

LOTS AT FAIRWAY SELLING RAPIDLY

Old Family Estate Cut Up
And Is Being Bought by
Many People

"Beautiful Fairway, the wonder tract of southern California, located opposite the Flintridge Country club, is already half sold out, though it was opened only two weeks ago Sunday," states N. M. Cupp, of the Saunders Real Estate company, 133 North Brand boulevard, Glendale agents for the O. B. Thomas company, Los Angeles, subdividers.

"This grand old tract of oaks and sycamores is the subdivided holdings of an old family estate," Mr. Cupp explains. "It lies but a half-mile from Pasadena and only thirty-five minutes' ride from Los Angeles business district."

"Beautiful sixty-foot lots, including water, light, gas and street work, may still be had at the original price of \$700—but there are not many left and purchasers will have to hurry to pick them up."

Near Golf Links
"Directly opposite our tract office lies beautiful, exclusive Flintridge Golf Links, surrounded by scores of palatial homes ranging from \$20,000 to \$250,000 in value, establishing Fairway and surroundings as the most scenic and valuable residence properties in southern California, which means—anywhere on earth."

"In order to satisfy yourselves our descriptions underestimate rather than exaggerate the case for this delightful, amazing tract," urges Mr. Cupp, "come out tomorrow and see with your own eyes what unapproachable values we have. If you do not drive your own car, private autos leave our office on North Brand boulevard at 10 o'clock every morning, including Sunday."

**Hundreds Drown in
Volga Valley Floods**

STOCKHOLM, June 9.—Floods in the lower Volga valley in Russia have caused the death of 394 persons and wrought great property damage, said a dispatch from Moscow today.

**STOP BACKACHE, KIDNEY
TROUBLE**

Backache, Rheumatic Pains, dull headache, tired feeling, too frequent urination, discolored or strong odor are symptoms of kidney and bladder trouble. "I was always having a backache which caused me great suffering," writes Mrs. Feber, Medford, Mass. "Could not sleep and at times I could not stand straight. Tried Foley Kidney Pills and found relief." Stop backache, kidney and bladder troubles with Foley Kidney Pills.—Glendale Pharmacy, 633 East Broadway; Hub Pharmacy, Glendale and Colorado; Acacia Pharmacy, 922 South Glendale Avenue.—Advertisement.

SCOTS' PYRAMID IS FORMED HERE

Branch of Masonic Order Is
Installed by Supreme
Representatives

The institution of Pyramid No. 39, Ancient Egyptian Order of Scots, was carried out last night in the I. O. O. F. hall on West Broadway in the presence of a large and enthusiastic gathering of Master Masons from all over the San Fernando valley and from Los Angeles, the initial membership starting in at 110 Glendale Masons.

Preceding the ceremonies at the I. O. O. F. hall a parade, led by the band of Los Angeles "Pyramid No. 39," and including over 400 people, marched through the main streets of the city, attracting the attention of the crowds who were on the streets during the evening.

The supreme officers who came down from San Francisco to institute the Pyramid and to install the officers were Edward F. De La Meter, supreme pharaoh; Charles Pratt, supreme lecturer; and Carl Eber, supreme scribe, who were met in Los Angeles yesterday by Arthur H. Kase and S. S. Gihuly, whose guests they were during the day and under guidance they were taken on a tour of inspection of the city and various points of interest.

List of Officers
The following officers were installed:

Arthur H. Dibbern, Toparch; Ira B. Carlock, Mohib; C. Milford Coye, Armess; Frederick J. Kinley, Scribe; George H. Thomas, Chancellor; Robert A. Sullivan, trustee of first year; H. W. Stephenson, trustee of second year; John S. Cleeland, trustee of third year; Sidney S. Gihuly, Chief of Me; Norton P. Buck, Sub-Chief of Me; Ralph E. Murdy, Mazat; Arthur C. Kase, Klasker; David Goodfellow, Mohar; Jesse Hunt, Neokori; Dan Flynn (alias Bruce); F. J. Mathieson, Standard Bearer; H. M. Bennett, Procurator; Elmer Jordan, Granary Keeper; Alfred Kelly, Chief Musician; George B. Karr, Orator; A. E. Sullivan, Captain of the Guard; F. A. Pratt, Mark T. Lee, Samuel A. Warren, Auditors.

Following the installation ceremonies the members and the guests were entertained with a varied program that had been furnished by the entertainment committee, and a smoker and refreshments formed an important part of the evening's exercises.

Final Meetings Will Be Held on Sunday

The congregation of the Gospel Tabernacle, the Christian and Missionary Alliance, will meet for the final times tomorrow in their present building.
Announcement is made that on Thursday night there will be a half-night of prayer in preparation for the meetings with Lucius B. Compton, mountaineer evangelist, and "Uncle Charlie," gifted children's worker. These meetings are to begin June 17.

LEXINGTON AUTO HAS AGENCY HERE

Fred S. Hill to Represent
Popular Car in San
Fernando Valley

The opening here for the sale of high class cars are bringing to Glendale more and more agencies for the leaders in the world of motordom, the latest to be represented here being the Lexington car, which will be sold in the Glendale and San Fernando valley territory by Fred S. Hill, 124 South Orange street, who has just received confirmation of his appointment as agent.

In addition to carrying a number of mechanical features, including the famous Ansted engine, that place the Lexington car among the leaders in its class, the car embodies both beauty and distinction in its construction, while the Moore multiple exhaust system, that is patented and found only in the Lexington, adds seven and four-tenths to the power of the Ansted engine over the power of the engine without this invention.

Mr. Hill's experience as an automotive engineer and his knowledge of the vital parts of any machine, led him to seek the Lexington agency, and he is confident that he will find a ready sale for as many of these cars as can be shipped into his territory.

Tropico Church Will Hold 'Children's Day'

The children of the Tropico Presbyterian Sunday school will observe Children's Day tomorrow with a special entertainment at the church, corner of Central avenue and Laurel street, at 10:30 o'clock in the morning.

The following program is announced:
Opening Song, No. 100.
School repeat the 23rd Psalm.
Prayer—Rev. J. F. Winward.
Recitation—"The First Children's Day," Dorothy Peterson.
Song—"God You Came," Christine Proctor.
Song—"Do You Know?" Classes 1 and 2.
Recitation—"Children's Day," Viola Jennings.
Recitation—"That Suits Me," Charlotte Goldsborough.
Recitation—"Come, Little Leaves," Jo. Bradford.
Recitation—"How to Help," Florence Cochran.
Song—"God Cares for Me," by four girls.
Recitation—"As I Was Walking Out," Lilla Jackson.
Recitation—"I'm Glad," Ruth Sullivan and Roberta Covington.
Recitation—"Children's Day We Greet," Dorothy Grant.
Recitation—"My Sermon," Billy Croft.
Song—"June Is Here and Singing Happily," by Primaries.
Recognition of Cradle Roll and Cradle Roll Song.
Recitation—"The Falling Star," Doris Bradford.
Recitation—"God's Message," Jo. Bradford.
Recitation—"Little Things," Dorothy Gardner.
Song—"Good Morning," Three Girls.
Recitation—"The Flag and The Bible," Earl Daken, Wesley Ashton.
Recitation—"Children's Day," Ruth Dianosis.
Recitation—"Our Day," Adel Corley.
Recitation—"We Have Work to Do," Buttercup and Daisies, Class of Girls.
Recitation—"Bring Your Silver Offering," Allison Goldsborough.
Song—"Pretty Roses," Junior Class.

The program will close with the singing of the first and last verses of "America." There will be a silver offering.

DEATHS—FUNERALS

VIOLA GRACE JOHNSTON
The sudden death of Mrs. Viola Grace Johnston occurred last night, Friday, June 8, 1923, at the home of her sister, Mrs. E. E. Steiner at 680 West Broadway.

Mrs. Johnston and her daughter, Benita L. Johnston, came to Glendale three weeks ago from Palisade, Colorado. They came for the mother's health. Yesterday they motored to Pasadena in the afternoon, and shortly after their return Mrs. Johnston was taken seriously ill and her death followed.

The deceased, who was 51 years old, is survived by her husband, James W. S. Johnston, by two daughters, Bessie E. and Benita L., and by her sister, Mrs. Steiner.

Funeral arrangements are being made by the Jewel City Undertaking company and will be completed upon hearing from the east.

MRS. NORA MAY GAMMILL
Mrs. Nora May Gammill passed away this morning, June 9, 1923, at her home, 421 East Montrose avenue, Montrose, Calif., at the age of 45 years. She was born February 2, 1878, and was a native of Davis county, Mo. She had been a resident of California for thirteen months, and a resident of Montrose for the past year.

The deceased leaves to mourn her, a husband, W. L. Gammill, three daughters and two sons. The daughters are Mrs. Odessa Tolson of Powell, South Dakota; Miss Nettie L. Gammill of Montrose, and the sons are George D. Gammill and Charles M. Gammill, also of Montrose, and one brother, John H. Dowell of Pasadena.

Funeral arrangements will be announced later by Kiefer & Eyerick, undertakers.

May Free Political Prisoners, Claimed

WASHINGTON, June 9.—Commutation of sentences of political prisoners in cases "not involving overt acts against the government," probably will be announced by President Harding before he leaves Washington on his trip to Alaska, it was declared officially at the White House late Friday.

President Harding has on his desk several recommendations for commutation of justice, which he is re-

DEMOLISH CITY, ERECT ANOTHER

Equivalent of More Than
500 Buildings Removed
Yearly in New York

NEW YORK, June 9.—Every year the equivalent of a city of more than 500 buildings is demolished on Manhattan island, and every year a new city of the most imposing types of construction rises to replace the demolished city.

The annual disappearance and reappearance of the vast city within a city offers an interesting revelation of the tremendous forces which constantly are exerted to provide building facilities for Manhattan. In no city in the world are such Herculean processes of demolition and rebuilding at work as there are within the limited confines of this island.

According to statistics made public by S. W. Straus & Co., from compilations by the building department of the Borough of Manhattan, there were during a ten-year period, 1913 to 1922, a total of 3609 buildings of all types completed, against a total of 5736 of all types demolished. These figures include 235 one and two-family dwellings erected, against 2242 demolished, and 926 tenement apartments erected, against 1258 demolished.

Commercial Buildings
While the figures call attention to the rapid disappearance of one and two-family houses in Manhattan, it is significant that these old residences are seldom replaced with tenements or apartments. They are usually removed to make room for commercial structures. It is also noticeable that during the decade 332 more tenement and apartment buildings were destroyed than were erected. This decrease in the number of residential types is offset by the fact that generally two or more old tenements or apartments, housing a few families, are demolished to make room for one large modern building sometimes housing hundreds of families. If two old buildings, for example, housing twenty-five families, in all, give way to one modern building housing 100 families, the gain in housing space is only for seventy-five additional families.

According to the records of the Manhattan Borough building department, tenements, apartments and one and two-family houses, providing for 110,549 families have been erected since the tax-exemption law on residential building went into effect in February, 1921.

Unrequited Love
The old, old story of being jilted by a girl made Herman a hermit. Fifty years ago Herman was a brilliant young student of astronomy in a German university. He met the girl of his dreams. They walked at night through the streets of the quaint university town, and the girl grew to admire Herman for his learning. One night they stood by the side of the canal, and Herman told his secret as he gazed at the stars. He explained the constellations that spangled the sky overhead, and the girl promised to marry him.

But Herman had a rival: Perhaps the rival's hair was more curly than Herman's—perhaps his wit was sharper—perhaps there was no reason why the girl jilted Herman and married his rival.

Herman was heartbroken and left his native Germany. He came to this country hoping to forget his lost love. He worked at different tasks and for a time was employed as instructor of German in various schools. But he could not forget her—the girl he loved. Other women held no interest for him, and association with humanity in general jarred on him. He decided to get away from it all and live alone with only the memories of his romantic past.

Builds a Dugout
Fifteen years ago he built a dugout in the quarry, and during those fifteen years he has talked intimately with no one. He occasionally sends to Germany for books on astronomy, but otherwise he has no intellectual communication with the world outside the quarry.

Herman has become a tradition in the neighborhood. He is known as the "Old Man of the Quarry." On account of the fantastic and rather fearsome appearance which he presents as he hobbles barefooted along the street to the grocery store he is terrifying to children. For a generation mothers of

MISSOURI HERMIT DWELLS IN CAVE

Blasted Romance Turns
Once Brilliant Student to
Life of Recluse

By DOUGLAS G. TINSLEY
For International News Service
KANSAS CITY, Mo., June 9.—In the heart of Kansas City lives a hermit. His hair and beard are long and gray and matted; his clothing is tattered as ever was that of a monk of the middle ages; in the summer time he goes barefooted as a friar; he absolutely takes no interest in the things of the world, and for fifteen years he has lived alone in a cave situated in the pit of a deserted rock quarry.

His name is John Herman; he is seventy-five years old and the only human being to whom he ever speaks is the corner groceryman from whom he buys his meager food supply, which he cooks for himself in his dugout.

Formerly Herman earned a living by hammering stones for the quarry owner, but lately he has been in poor health and lives off a pittance of \$10 a month allowed him by the county. But he does not want the pittance increased, he does not want charity. He merely wishes to be let alone.

In the last ten years he has never read a newspaper; he has never been to a phonograph or talked over a telephone or ridden in an automobile, and he doesn't care to do any of those things. He says he is contented with his life as a recluse. His interest in life is solely in the stars. He is an educated man and an astronomer.

Unrequited Love
The old, old story of being jilted by a girl made Herman a hermit. Fifty years ago Herman was a brilliant young student of astronomy in a German university. He met the girl of his dreams. They walked at night through the streets of the quaint university town, and the girl grew to admire Herman for his learning. One night they stood by the side of the canal, and Herman told his secret as he gazed at the stars. He explained the constellations that spangled the sky overhead, and the girl promised to marry him.

But Herman had a rival: Perhaps the rival's hair was more curly than Herman's—perhaps his wit was sharper—perhaps there was no reason why the girl jilted Herman and married his rival.

BRITAIN'S NAVAL PRESTIGE SUFFERS

Experts Say Britannia No
Longer Rules Waves;
Gloom Is Felt

By DAVID M. CHURCH
For International News Service
LONDON, June 9.—Great Britain has lost her supremacy at sea, some naval experts declare, while others equally well known in naval circles maintain that "Britannia" still "rules the waves."

The admiralty has published the figures and you may draw your own conclusions. The official figures show that Great Britain maintains her lead in light cruisers and is outclassed by the United States in the number of battle-ships and submarines. Right here is where the argument begins.

One school of naval experts maintains that the battleship is still the supreme naval fighting machine, whereas another school holds the battleship as obsolete and favors the light cruiser as the most effective naval weapon. The dispute probably will never be settled until another war comes along and there is a first-class naval battle.

Here Are Figures
Admiralty statistics show that the United States has thirty-one battleships, compared with Great Britain's eighteen and Japan's eleven. Eight of the American ships are yet to be scrapped under the Washington treaty, while five are already being dismantled. In the case of Japan, five ships are to be scrapped. When these scrapping ventures are completed the naval strength in battleships will be about equal, and then will come a dispute as to the comparative efficiency of the various ships.

France is reported as possessing only nine battleships, while Italy has twelve, Russia four and Germany eight.

Great Britain and the United States are each building two battleships.

Great Britain and Japan are the only nations having battle cruisers, there being four in the British navy and seven in the Japanese, including three which are to be scrapped.

Most Light Cruisers
Britain is supreme in the light cruiser class, having forty-eight, while four more are under construction. Japan ranks second in cruisers of the lighter type, having a fleet of fifteen now in commission and six more projected. Italy has ten in commission and two projected, while the United States has nine in commission and ten projected.

The United States holds the supremacy in torpedo boat destroyers. The figures are: Great Britain, 184; United States, 318; Japan, seventy-two; France, fifty; Italy, fifty-two, with twenty-six building, and Germany, sixteen.

In submarines the United States also leads, the figures being as follows: United States, 104 and twenty-seven building; Great Britain, sixty-six and eight building; Japan, forty and eleven building; France, forty-seven and thirteen building; Italy, forty-three, and Russia, seventeen and three building.

These are the official figures given out by the British government; but, like all figures, they may prove anything. Expert naval strategists can prove from these figures on the brink of collapse, while just as eminent strategists can prove that the British navy is still supreme. Take your choice.

SCOUTS TO CAMP NEAR ARROWHEAD

Site Is Named in Honor of
Roy L. Kent to Show
Appreciation

With a bigger, better and cheaper camp as an outlook, the Boy Scouts of the Verdugo Hills district are to hold three ten-day camps this summer among the pines near Lake Arrowhead, from June 30 to July 30. And, best of all, according to Frank C. Ayars, chairman of the committee on camping, the price is fifty cents less this year than was the 1922 Catalina camp.

"What boy is there who wouldn't be glad to put up only \$12 for ten big, active and joyous days in the Little Bear country?" declared Mr. Ayars.

This year a plan has been conceived by which each troop, when arriving at the camp, will select a place for its own troop camp, which will be under the personal leadership of its own scoutmaster.

Take Real Cook
The Verdugo Hills district council will furnish general supervision, camp equipment, campsite, shelter tents, first aid supplies, commissary equipment, and, most important of all, a real camp cook who knows how to cook. Scout Executive Harold F. Benner will be the resident manager of the camp. With twelve years' experience behind him in various Boy Scout camps, Mr. Benner is in a position to foresee the necessary things which go to make up a successful boys' camp.

In addition to the three ten-day camps, a Patrol Leaders' conference camp will be held from June 27 to June 30, at which only patrol leaders and senior patrol leaders, who have signed up for one of the ten-day troop camps will be extended the privilege of attending. The dates for the three ten-day troop camps are as follows:

Second period, June 30 to July 9.—District No. 1, Glendale Scouts.
Third period, July 10 to July 19.—District No. 2, Burbank Scouts.
Fourth period, July 21 to July 30.—District No. 3, Tujunga, La Crescenta and Eagle Rock Boy Scouts.

Honor Roy L. Kent
The camp was named in honor of Roy L. Kent, who was one of the outstanding figures in the organization of the Verdugo Hills District Scout council. Mr. Kent has devoted a great amount of time and energy, let alone money, to the development of a first-class council, and his fellow associates are only too glad to confer on him this little token of their appreciation for the big work he has done on behalf of Scouting.

Camp Roy-Kent is situated in the Angelus national forest eighty-five miles from Glendale and three and one-half miles from beautiful Lake Arrowhead. The exact site is located in the "V" of the fork where Hook creek joins Bear creek. The camp is surrounded by the towering pine, fir and alder trees. Special permission has been granted to the Verdugo Hills District council by the United States forestry service for the use of the campsite. A good site from Lake Arrowhead. In the opinion of Mr. Ayars and others who helped find this choice spot, a more beautiful and ideal place for a Boy Scout camp would be hard to find anywhere.

Glendale, Calif.

TUJUNGA TEACHERS LEAVE FOR VACATIONS

End of School Term Frees Faculty, Many to Take Summer Studies

With the close of school in Tujunga, which was out last week but officially vacated on Monday when the pupils received their cards and the "bad news," not only the children, but the teachers as well are making plans for vacations. Some of the teachers will spend part of the summer months at summer school sessions.

Considering the results accomplished by the staff this year, which was in keeping with the standard maintained in previous years, the teachers and principal are entitled to their season of play. The entire class graduated from the eighth grade and a satisfactory number were promoted from the other grades, there is such a thing as a satisfactory number below the 100 per cent mark.

Principal and Mrs. Fred W. Axe have planned a trip to the Yosemite in their car, but intend to spend part of the summer months attending school in Los Angeles.

Clayton, Illinois, is the objective of Mrs. C. G. Reilly, who will visit her mother and father there for a month and return to Long Beach and take a summer course.

Mrs. Franke plans to go to San Jose for her vacation, but will take a summer course.

Play Nets \$793

The proceeds from the Chauve Souris, given at the Garden of the Moon by the Mission players recently, have been announced as totaling \$793.05. The American Legion Post 250 benefited to the amount of \$653.10 from this show and the Tujunga Episcopal church received \$139.95. These amounts were netted after the actual expenses of the production were paid. These expenses were light, as the Garden of the Moon was donated by the management for the occasion and much of the preparatory work was done by members of the Legion. The post plans to give a number of vaudeville shows in their club house, Bolton Hall, in the coming months. The money goes to the fund for the purchase of the lots and club house, undertaken some time ago.

The fate of the proposed reservoir for the Big Tujunga, to be built by the city of Los Angeles, should it win the suit that was instigated to condemn the property necessary, hangs on the continued testimony of City Engineer Mulholland next Monday when the case will be resumed in Judge Hewitt's court.

If the statement made by Mr. Mulholland, to the effect that the city does not actually need the site for the purpose, is allowed to stand and he does not modify it in any way, the suit will be ended, as the city cannot condemn privately owned property except on the grounds of great public need. Mr. Mulholland stated on the witness stand that the city does not need this site, as it has a good one at San Francisco Canyon, and the attorneys for the city asked a continuance to ascertain just where they stood in the matter.

That the reservoir is needed is the opinion of many who are in a position to know the needs of the territory to be served by the supply that would be gained from this source. If the city of Los Angeles does not build the reservoir, it is believed that it is but a matter of time until the community will do so to protect the ever increasing population.

Building School
George Harris, philosopher of the Hill Tribes, who lectures from the KHJ radio broadcasting station every Saturday night, has begun building the first unit of the School of Common Sense that he is inaugurating in Tujunga. This portion will be a building 23x26 feet, located on Michigan avenue just west of Rocky Dell.

Complete plans call for a roof garden, scenic grounds and other features included in the rustic fashioned-by-nature work in which Mr. Harris is engaged. An arroyo that runs through the center of the lot will be spanned by a rustic bridge.

Many requests have been received by Mr. Harris for copies of his "Layman's Prayer," read several weeks ago from KHJ. The subject for tonight's reading will be "Artificial Bloom of Youth" and "Pads and Pashions."

John A. Caldwell and his bride, formerly Miss Irene De Mers, returned the first of the week from a brief honeymoon trip to Riverside by automobile. They have taken one of the Spates bungalows on Palm avenue and will be at home there to their many friends.

Pick Team Captains In Expansion Drive

Team captains for Major A. L. Baird's division of the Chamber of Commerce workers were selected at a meeting that was held at the Citizens' Building this morning, when the following were chosen to head the teams of five men each: H. H. Finlay, T. W. Watson, Don H. Webb, John Swearingen; J. C. Smith, S. W. Brown, V. M. Holister, Fred Deal and Peter L. Perry.

The members of the other team were to be selected at a meeting this afternoon.

While the truth often hurts, the habit of truthfulness is soothing.

BURBANK REALTORS ASSIST EXHIBIT'S FUNDS

Board Contributes \$260 to Help Finance Display At Exposition

The Burbank Realty Board has contributed \$260 to the subscription list of funds being raised to promote the exhibit the city plans to have at the great Monroe Doctrine Centennial Exposition to be held in Los Angeles during July, at Exposition Park.

A tentative drawing, showing the general outline of the exhibit, as planned, will be on display at the Burbank hardware store, 101 West San Fernando boulevard.

The idea for the design is the conception of R. W. Colburn, it is understood, while the execution of the idea in cardboard is the labor of A. C. Gage.

The Monroe Doctrine Centennial Exposition will open July 2 and will run till August 4, during which time it is estimated that several million people will attend it.

As the Burbank display place is particularly well located, the opportunity is an unparalleled one for Burbank to advertise itself before the world and the few hundred dollars that it will cost to put the local display over properly will be repaid in tens of thousands of dollars, in increased population and prosperity to the city, the Realty Board feels.

The advertising committee of this organization, comprising R. A. Powell, A. C. Gage and C. D. Ashabanner, are working in conjunction with E. J. Jackson and W. P. Coffman, of the Chamber of Commerce, in financing the exhibit.

Miss Viola Thrasher
Miss Viola Thrasher, daughter of Mr. and Mrs. James E. Thrasher, of 420 Lake avenue, who died last Friday, June 1, at the age of 19 years, and was buried Tuesday afternoon, June 5, at Grand View cemetery, Glendale, was a popular and charming young woman and a graduate, just this spring, of the University of California, Southern Branch.

Indeed, the diploma of the deceased student was brought to her home on the very day of her death, by a delegation of loving schoolmates, arriving too late, by just a little while, to satisfy the one longing the dying girl had expressed—desire to possess that precious parchment which represented the sum total of four years of faithful study.

Typhoid fever caused Miss Thrasher's untimely death, producing a lingering fever that wasted her slowly away, over a period of thirteen days' illness. There was practically no physical pain, it is understood; and it is certain that the friends and loved ones of the deceased grieved more than she, realizing she was being taken from the world just as she was about to step forth into radiant life.

Miss Thrasher was born in Claiborne parish, La., but had lived for eleven years with her family in Burbank, where she was a member of the Methodist church, joining it under the pastorate of Rev. Barker, who, in accordance with her dying wish, conducted the final service, assisted by Rev. Allen.

In addition to her parents, the deceased is survived by two brothers, Charles and Vance Thrasher.

Choral Club Concert
The Usona quartet rendered a delightful program at the Edison school auditorium last night, under the auspices of the Burbank Choral Club, assisted by Vern Moore, violinist, and F. Stillwell, pianist.

With a year's successful work behind them, the members of the Usona quartet, all former Burbank residents and chorists, showed the large audience that their success has been well deserved.

This quartet has sung in Glendale, Hollywood, Pasadena, before the Gamut Club and many other musical organizations and appreciative audiences in the foothills. The Burbank Choral Club was proud to have this opportunity to present its "Fledglings" once more to the people of the "home nest."

Lt. Watson Marries Star
Harry B. Watson, lieutenant in the aviation service during the war and prominent in American Legion affairs, last night walked down the aisle with Anna Q. Nilsson, the strains of "Here Comes the Bride," and stood at the altar while the wedding ceremony was performed.

William Desmond played the role of the parson, while Wallie Reid, Jr., acted as ring-bearer, and Miss Jessie Fawcett was maid of honor.

Immediately after the mock marriage, held at the Ambassador hotel, Los Angeles, for the benefit of the "war chest" of the disabled veterans of the Los Angeles chapter, a big ball was staged, with Stepp's celebrated orchestra furnishing the music, assisted by a Boy Scout band of forty instruments.

This Scout band is the only band of its kind in the United States and was secured by the Big Sisters' League of America, which organization cooperated with the American Legion in giving the mock-marriage and dance.

O'Farrell, a gumshoe catcher, stalked the pitching of Fillingim and Genwich for four hits, including a homer and two doubles and accounted for two of the Cubs' runs in their 4 to 2 victory over the Braves.

PRUNES IN 1922
California's 1922 "pack" of prunes was twice the size of that of the rest of the world.

USE MORE WHEAT, IS PLEA

Increase Prosperity On Farms, Man's Slogan

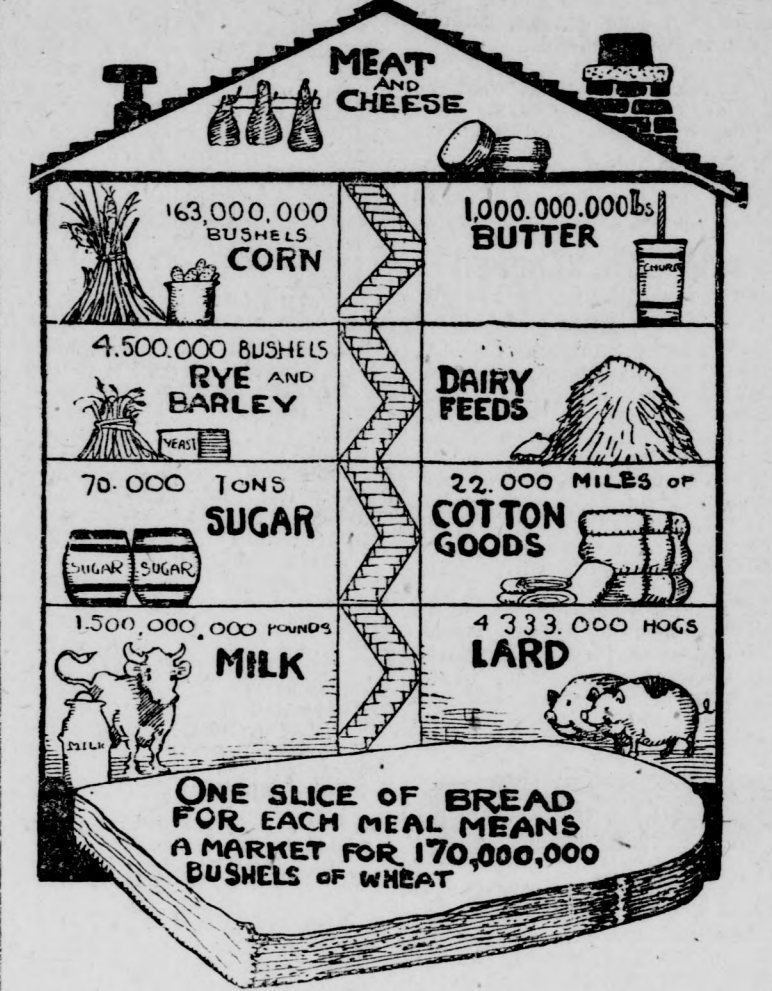

Diagram shows how trade has fluctuated since 1917 with the balance swinging against U. S. in 1923 as imports exceed exports.

James F. Bell, vice-president of the Washburn-Crosby Company has been touring the country recently arousing interest in a campaign to increase the use of wheat in this country.

Mr. Bell wants everyone to "Eat More Wheat" because, as he says, in so doing a sound market will be provided for the country's greatest food crop. He shows that the country cannot be prosperous without prosperity on the farms; that the farmers cannot be prosperous unless they have a market for their wheat sufficient to consume the grain and strong enough to pay the farmer a fair profit for his work in raising the wheat formerly exported to the present war-torn countries of Europe.

Aside from its own importance, Mr. Bell shows that wheat is the greatest vehicle through which other major farm and dairy products reach the consumer. He says: "The home consumption of the 170 million bushels of wheat we have raised and exported each year could be accomplished by the eating of one additional slice of bread at each meal in place of other less essential foods. Such a variation in our diet would carry with it a great increase in the use of many other basic farm products such as corn, hogs, milk, feeds, meat and cotton."

REVENUE RECORD SETS NEW MARK

Los Angeles District for May Shows Increase of 12 To 200 Per Cent

With increases ranging from twelve per cent to 200 per cent, sales tax receipts of the Los Angeles district for May set a new internal revenue record, according to figures given out by Collector Rex Goodcell.

Total collections of sales tax for the month were \$511,028.47, as against \$416,151.80 for May of last year, an increase of twenty-three per cent.

Tax receipts on telephone and telegraph messages jumped from \$13,697.91 collected in May, 1922, to \$39,148.54 for May, 1923, a gain of approximately 200 per cent.

Manufacturers' excise tax collections were \$102,338.92, compared with \$86,248.54 for last May, an increase of eighteen per cent.

Amusement Taxes
Collections of taxes on admissions to motion picture theatres and other places of amusement were \$298,247.84, compared with \$265,772.45 for May, 1922, a gain of twelve per cent. The tax collected indicates that \$2,982,478 was expended for amusement during the month.

Retailers paid \$54,443.55 tax on jewelry, compared with \$42,670.13 for last May, an increase of twenty-seven per cent.

Collector Goodcell said that the total receipts of the Los Angeles district for May showed an increase of thirty-six per cent over last May. Miscellaneous tax collections gained fifty-three per cent.

FIGHT RESULTS
At Brooklyn—Jack Sharkey, New York, got decision over Mickey Brown, New York, twelve rounds.

At Long Beach, N. J.—Jimmy Mars, Long Island City, won popular decision over Dutch Brandt, Brooklyn, 12 rounds.

At Detroit—Sailor Friedman outpointed Johnny Mendelson, Milwaukee, ten rounds.

AIR MAIL PILOT AIMS AT RECORD

Will Try Lone Flight From Coast to Coast in Twenty-two Hours

By ELLIS H. MARTIN
For International News Service
SAN FRANCISCO, June 9.—When the full moon comes late this month a quiet, unassuming chap will start a flight which will be man's supreme test of domination of the air.

He is Clare K. Vance, former aviator instructor in the United States army, and one of Uncle Sam's air mail flyers.

He plans to fly from San Francisco to New York without stop in from twenty to twenty-two hours.

He will make the flight alone in a plane built entirely by himself. Vance is making the spectacular attempt "on his own." He is "on leave" from the air mail service, and is planning the undertaking entirely under his own auspices.

Will nature stand the strain of twenty-two hours' consecutive cross-country flying? Vance, slight of build, but of determined disposition and long experience as a flyer, says he can. In the epoch-making flight of the T-2 across the country Lieutenants Kelly and Macready alternated at the throttle. Vance will endeavor to annihilate space and time unaided.

Plans Early Start
He will make his start from Crisey field here about 10 o'clock in the morning. This will give him daylight flying over the treacherous Sierra Nevada and Rocky mountains. His plane will have to lift over the mountains the 350 gallons of gasoline he will carry as motive power. He estimates he will have to fly 2600 miles to reach New York over the central course and expects to average 130 miles an hour.

Vance is sure of his plane. Aviators who have examined it agree it is a good plane. It is no freak. A French Samson motor of 250 horsepower will drive the plane. Vance has adopted the Göttingen wing, a radical departure from wing construction used in this country.

Vance is not a braggart. He has little to say regarding himself, but with quiet determination he says "I'll make it."

The strawberry tree and the madonna belong to the arbutus, a May-flower, family.

MONTROSE C. OF C. DANCE IS FIRST OF SERIES

Regular Schedule of Social Events Is Planned by Organization

The dance given by the Montrose Chamber of Commerce on Wednesday night in the Reinhart block was well attended and thoroughly enjoyed. There were about 200 people there to dance to the music furnished by Kelley's Shrine Club orchestra from Glendale. The hall was decorated with flags.

The Chamber of Commerce plans to hold these social dances often in the future and in this way bring the newcomers and those already located there together and establish new friendships and closer relations.

Punch and cake were served during the evening by Mrs. DeGarno and Mrs. Campbell and enjoyed very much. Several cakes were raffied off for neat sums.

Mrs. Ellis was chairman of the committee that arranged the details of the dance. There were several couples from Glendale present to enjoy the dancing and refreshments.

Officer Injured
A crash occurred recently at the corner of Michigan and Ocean View avenues, that put County Motorcycle Officer Reiley in the hospital and put a Ford car and his motorcycle out of commission temporarily at least. Officer Reiley was found to have suffered a fractured knee when he arrived at the Los Angeles General hospital, where he was rushed by ambulance.

The crash occurred when a woman, who gave her name as Frances L. Gleason, turned into Michigan avenue from Ocean View in front of Reiley, who later said he was in pursuit of a speeding car headed for Pasadena, and the motorcycle crashed into the car.

The driver of the car suffered minor cuts and bruises. A telephone has been installed in the Montrose State Bank after efforts covering a long period to secure one. The number is Glendale 2446-J-11.

Open Branch Store
One of the store rooms of the Dranger block has been leased by Lewis C. Davis and W. T. Gilliam of Glendale, who will establish a branch of their awning and tent store at Glendale. This branch will carry, in addition to awnings and tents, linoleum, window shades and similar furnishings.

Another addition to the business center that was scheduled to open this week in the Dranger block is the Montrose Paint & Paper Company, owned by L. H. Allison of Glendale. This store will also be operated as a branch of the main store, which is located at Glendale.

Estimates will be furnished on contracts for painting and for paper hanging and a complete stock of paints and wall paper will be carried in stock.

The Western Loan & Building Company, of which T. D. Taylor is the local manager, is financing a number of homes in the district, according to Mr. Taylor, on terms that are very attractive and considered liberal by applicants.

Children to Present Doll Land Program

Pretty dresses, pretty faces, pretty dances and pretty songs,—what else could one expect in Doll Land? Interesting to—

How wonderful was a children's is this delightful musical comedy, in which some forty children from the Woods School of Dancing and Dramatic Art will take part. Tuesday night, next, at 8 o'clock, is the time. Glendale High school auditorium is the place. Community Service invited all Glendale to spend an hour and a half in Doll Land.

The King of the Dolls will give you many a laugh; Hoop La, the clown, will amuse you with his nonsense. The beautiful Queen of the Fairies, with her silver wand, will open to you the door of imagination, and will show you how the inhabitants of Doll Land live. Judge Scare

"Em, the Captain of the Army, the soldiers, the Queen of Dolls and her four charming ladies-in-waiting, you will love them all.

Many and varied are the pretty dances to be contributed by these clever kiddies, Jingle Bells, Dance of the Flowers, Scarf Dance, Clown Dance, Fan Dance, Dance of the French Hat, Doll Dance, Playtime Dance, Fairy Dance.

Mrs. Nanno Woods and her daughters, Dorothy and Kathleen Woods, have given four months to the preparation of this children's play, and their little pupils have worked with energy and enthusiasm. Beauty combined with simplicity and the keynote of the performance, and childish joyousness permeates the atmosphere. There will be no charge for admission, so come early Tuesday evening to the High School auditorium.

TAGGING ALL BASES
Mike Cvangros, who has sworn eternal vendetta upon the Yanks, pitched the White Sox to a 7 to 3 decision, winning the series.

Ruth's twelfth home run of the season was wasted.

The Cardinals made a clean sweep of the series with the Phils when Weinert collapsed in the eighth. Score 3 to 1.

VAN NUYS COMES TO PLAY SUNDAY

Heidler to Send in New Players in Battle to Hold Lead

The Glendale ball team takes on the Van Nuys club tomorrow afternoon, on the home grounds, Park and San Fernando, in the second game of the second round in the Valley League series. Play will start at 2:30 o'clock.

A large squad of new material has been working out all week, along with the regulars, and Manager Walt Heidler says "The first line-up will have to play real ball from now on or fade the bench, as we can't afford to lose any more games. We are out for first place and the honors and trophies that go with it."

The grounds at Park and San Fernando are being put in the best of shape for the contest, it is understood, a number of additional seats being erected to accommodate the crowd.

Librarians Return From Yosemite Meet

With keen inspiration for the work the coming year, Mrs. Alma J. Danford, librarian of the public library, and Miss Laura E. Roberts of her staff, arrived home yesterday from Yosemite valley, where they attended early this week the three-day gathering of the California Library association.

It was the annual conference and was attended by more than 200 librarians and assistants from all parts of California.

Among the prominent guests and speakers were Edmund Lester Pearson, critic, and Margaret Widemer, poet and prose writer.

Of great value to the librarians were the roundtables held on various subjects of interest to both large and small libraries.

It is possible that next year the California librarians will meet jointly with the library association of Washington, Oregon and the west coast of Canada.

IRRIGATION IN HAWAII
All the rice and small fruits, two thirds of the bananas and over half of the pineapples in the Hawaiian Islands are grown by irrigation.

Maurice Alexander Conrady

Under the laws of Switzerland the most severe punishment Maurice Alexander Conrady can receive for shooting to death the soviet envoy, M. Vorovsky, at Lausanne is four years in prison. Conrady was a student of chemistry in the Polytechnic school at Zurich when the above photo was taken.

Harding Works Again After Shrine Meeting

WASHINGTON, June 9.—With the closing of the annual convention of the Mystic Shrine, President Harding laid away his red fez and returned to affairs of state after four of the most strenuous days since he has been in the White House.

During the convention the chief executive has had little opportunity to attend to public or private business, having been an active participant in the meetings and features of the organization of which he is the most distinguished member.

Mr. Harding found a desk piled high today with letters, official correspondence and papers which required immediate attention.

Originator of Movie Pictures Quits Work

NEW YORK, June 9.—"The grand daddy of the movies" today put on his slippers and hunted out the easy chair in his Long Island home—John D. Isaacs, inventor, has retired.

Isaacs, 45 years ago, designed the counterpart of what today is the motion picture camera.

His retirement finds him in the position of never having made a dollar from the brain child which has grown to America's fourth industry, bringing its fame to thousands and its millions to others.

"In the days when New York was young—way back in '78—Senator Stanford and James W. Keene entered into a \$25,000 wager as to whether a trotting horse, at one period of its stride, had all four feet off the ground," Isaacs, at his country home in Forest Hills, said today.

37 MILLIONS ON HIGHWAY SYSTEM

Two-Year Program to Call for Big Expansion in Two Years

SAN FRANCISCO, June 2.—California will spend \$37,000,000 for maintenance and reconstruction of state and county highways during the fiscal years of 1923-24 and 1924-25.

This expansion program for the reorganization of the state's system of highways was announced today by the California State Automobile association, after definite plans for the road building program had been outlined to the association by R. M. Morton, chief engineer of the state highway commission.

With the \$37,000,000 fund assured by the passage and signing of the Breed bills, the state will reconstruct 364.7 miles of state highway, at a cost of \$9,879,120; maintain 1926 miles of improved highways at a cost of \$1,372,249, in 1924 and 4148 miles at a cost of \$1,500,615, in 1925, and according to the figures submitted, ac-

SAN FRANCISCO, June 2.—California will spend \$37,000,000 for maintenance and reconstruction of state and county highways during the fiscal years of 1923-24 and 1924-25.

This expansion program for the reorganization of the state's system of highways was announced today by the California State Automobile association, after definite plans for the road building program had been outlined to the association by R. M. Morton, chief engineer of the state highway commission.

With the \$37,000,000 fund assured by the passage and signing of the Breed bills, the state will reconstruct 364.7 miles of state highway, at a cost of \$9,879,120; maintain 1926 miles of improved highways at a cost of \$1,372,249, in 1924 and 4148 miles at a cost of \$1,500,615, in 1925, and according to the figures submitted, ac-

These plans, definitely laid out by the highway commission and made possible by the signing by Governor Richardson of the Breed bills, are declared to be the most extensive of any state in the union that has been presented.

Reaffirming the announcement of the state highway commission, Will H. Marsh, chief of the motor vehicle department, estimates that more than \$37,000,000 necessary for carrying out the highway improvement will be available by the state starting from the gasoline tax, registration, collections from weight schedules and collections from gross tax receipts, all of which are authorized by the Breed bills and the Duval bills unanimously adopted by the state legislature, and signed by Governor Richardson.

The elaborate highway system that is to be developed from the new highway fund includes the new arterial highways, which will be

constructed out of San Francisco,
connecting with the Victory high-
way to the east and all main high-
ways north and down the penin-
sula to the south.

It is estimated by Marsh that

IN THE SUPERIOR COURT OF

THE STATE OF CALIFORNIA IN
AND FOR THE COUNTY OF LOS
ANGELES.

Notice of Hearing of Petition for
Probate of Will

In the matter of the estate of John S. Harman, deceased.
John S. Harman, deceased, leaves a wife, Hellen, and a daughter, Hattie Higginson Harman, as the only persons entitled to the probate of will of John S. Harman, deceased, and for the issuance of letters testamentary thereon to Hattie Higginson Harman, petitioner, will be heard at 10 o'clock a. m., on the 18th day of June, 1923, at the Court Room of Department 2 of the Superior Court of the County of California, San Francisco, California, and for the County of Los Angeles.
Dated, May 25, 1923.
L. E. LAMPTON, County Clerk.
By H. H. Doyle, Deputy.
James F. McFarland, Attorney for Petitioner, 111 East Broadway, Glendale, Calif. June 2-11

NOTICE TO CREDITORS
Estate of Isabelle M. Cheatham,
deceased. Notice is hereby given by
the undersigned, R. S. Cheatham,
administrator of the estate of Isa-

belle M. Cheatham, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice, to the said R. S. Cheatham, at the office of Owen C. Emery, attorney.

106-A East Broadway, City of Glendale, County of Los Angeles, State of California, which said office the undersigned selects as a place of business in all matters connected with said estate, or to file them with the necessary vouchers, within four months after the first publica-

of this notice in the office of the
Clerk of the Superior Court of the
State of California in and for the
County of Los Angeles.
Dated May 25th, 1923.
R. S. CHEATHAM.
May 26, June 2-9-16

NOTICE TO GENERAL AND HEATING CONTRACTORS

Notice is hereby given that the Board of Education of the Glendale City School District of the County of Los Angeles, California, will receive sealed bids on or before Tues-

day, June 26, 1923, 7:30 p. m., at Board of Education rooms, 107 1/2 South Brand boulevard, Glendale, California, at which time and place said bids will be opened and read in public; for furnishing all required labor and material for the construction, erection and completion of a

ne-story addition to the East Broadway School, located at East Broadway, Glendale, California, in accordance with plans and specifications prepared therefor by ARTHUR G. LINDLEY, CHARLES R. SELKIRK, Associate, 801 American Bank Building, Los Angeles, California.

Each kind of work as follows:

1. General.
2. Heating.

A Cashier's or certified check or bidder's bond issued by a surety company accredited by the Board of Education, for an amount not less

than five per cent (5%) of the amount of bid shall accompany each proposal, drawn payable to the order of Board of Education of the Glendale City School District, as a guarantee that the bidder will enter into contract if awarded the work and will be declared forfeited if the suc-

The successful bidder will be required to furnish two bonds of a surety company satisfactory to said board of Education, covering an amount equal to 75% of the contract price to guarantee payment of bills.

Plans and specifications for all the above work may be seen at the office of the architects and at the office of the Board of Education.

A deposit of \$10.00 will be required from all contractors receiving plans and specifications, said deposit to be refunded to bidders when plans and specifications are returned in good condition.

The Board of Education reserves the right to reject any or all bids.

The successful contractor shall be required to file with the Secretary of the Board of Education, a letter from a general agent of some approved insurance company stating

that he has obtained unlimited compensation insurance to fully cover all men under his employ during the erection of this building.
By order of the Board of Education of the Glendale City School District.
D. J. HIBBERN.

President of said Board.
NETTIE C. BROWN.
 Secretary of said Board.

EXTENSIVE CHANGES IN SCHOOLS OF GLENDALE

Large Sum Will Be Spent on Improvements to Meet Great Demands for More Room as City's Population Increases

PLANS for spending two-fifths of the \$500,000 bond issue approved by the voters March 15, have been made by the Grammar School Board of Education.

Although no contracts to be paid for out of this bond issue can be signed legally until the bonds have been sold and the money is actually in the county treasury, the Board of Education has made tentative arrangements for the expenditure of approximately \$214,925 in order to advance the building program as far as possible so that school children may not suffer next term because of any delay.

About \$67,100 is being spent for real estate. This sum includes \$32,500 for a ten-acre site in the northwest section of the city, and \$13,600 which will be paid to the Barnum & Walters Realty Company for four and one-half acres in Sparr Heights.

In order to enlarge present playgrounds, \$5,500 will be paid to Mrs. B. E. Jones of 451 Milford street for a lot adjoining the Columbus Avenue school, and \$18,000 is being divided equally between Fred L. Weissenselmer of 204 East Acacia avenue, O. P. Rider of 208 East Acacia avenue and Mrs. W. E. Barber of 201 East Park avenue for three lots adjoining the Glendale Avenue Intermediate school.

For the building program \$144,379 has been agreed upon, while the expenditure of approximately \$3,446 is under consideration.

At Glendale Avenue
The budget for the improvement of the Glendale Avenue Intermediate school provided for the expenditure of \$107,850. Of this sum, \$15,000 was for real estate which will cost \$3,000 more, or \$18,000. However, this is offset by the fact that the budget provides \$3,000 for additional sanitary fixtures and lockers which will be installed under the general contract. In addition, a bungalow, for which an allowance of \$3,000 was inserted in the budget, has been paid for out of a separate fund.

The budget provides \$2,400 for additional furniture, \$1,000 for cafeteria furniture, \$250 for piping the grounds, and \$200 for fences, none of which expenditures have been made yet. Their total amounts to \$3,850.

Combining this sum with the \$18,000 for real estate makes a total of \$21,850. Subtracting this from the total of \$107,850 in the budget, leaves a total of \$86,000 to cover contracts now under consideration.

Secure Contracts
The general contract is being let to Chris Thoren of Hollywood for \$59,370. Coker & Taylor of 209 South Brand boulevard are being given the plumbing contract for \$2,983. Frand Davidson of Los Angeles has been given the steam heating contract for \$3,000. These contracts make a total of \$65,353.

In addition, the contract for electric wiring, which has been awarded to the J. A. Newton Electric Company of 156 South Brand boulevard, will amount to approximately \$2,176.24, and the contract for the installation of clocks, which has not been let, will amount to about \$350. Adding these two contracts to the former total makes a new total of \$67,879. Subtracting this sum from the balance of \$86,000 leaves a new balance of \$18,121. Out of this remainder, however, must come the price of the auditorium seats and furniture. The estimated cost of these is \$7,000.

The budget for the improvement of the Columbus school provides for the expenditure of \$50,150. Of this amount \$15,000 is for real estate and \$4,950 included in the budget has not been expended. Subtracting these two

items, leaves a balance of \$30,200.

The general contract, including the plumbing and electric work, will be awarded to Elmer Elliott of 612 East Elk avenue for \$24,555. The heating contract will be given to the Hammel Radiator Corporation of Los Angeles for \$750. The total of these two is \$25,305. Subtracting this amount from \$30,200 leaves a balance of \$4,895 to the good.

At Acacia School
The budget for the Acacia school amounts to \$49,050. Of this total, \$2,925 has not been spent, leaving a balance of \$46,125.

The general contract, which is being given to George W. Campbell of 1222 1/2 North Central avenue, amounts to \$28,750. The plumbing contract is being given to Hoffman & Pixley of 207 North Glendale avenue for \$3,728. The wiring contract is being given to the J. A. Newton Electric Company for \$591 and the painting contract to the Alhambra Wall Paper and Paint Company for \$2,748. The contracts for the installation of electric fixtures and heating apparatus, which have not been let, will amount to about \$846.

Altogether, these items amount to \$36,663. This is \$9,362 less than provided in the budget.

At Grand View School
The budget for the Grand View school amounts to \$24,450, of which \$2,650 has not been expended, leaving a balance of \$21,800.

The general contract, which is being awarded to the North Pacific Construction Company of Los Angeles, will amount to \$15,851.

The painting contract will go to the Alhambra Paint and Wall Paper Company for \$450. The plumbing contract, which is being awarded to Hoffman & Pixley, will amount to \$885. The wiring contract will go to the J. A. Newton Electric Company for \$362, and the heating contract to the Potter Radiator Company of Los Angeles for \$386. In addition, the cost of fixtures will be approximately \$77.

The total of these items is \$18,011. This is \$2,789 less than the amount provided in the budget.

So far, the Board of Education has effected a saving of \$23,272 under the budget.

MONEY FOR ROADS

A total of \$37,000,000 will be available to the state and counties of California for road construction and maintenance during the fiscal years of 1923-24 and 1924-25, according to an estimate made by the chief of the motor vehicle department, based upon revenues provided for under the three bills enacted at the recent session of governor.

LOSE HUGE FORTUNE

Over \$1,000,000,000 is taken away from the American public annually, by stock swindlers and bogus promotions, is the estimate furnished by the Better Business Bureau, of New York.

Cost of Depot Is Growing Just Like Glendale

PLANS for Glendale's Southern Pacific station grow better day by day. Only the first of the week F. S. McGinnis, district passenger agent, informed The Glendale Evening News that the station would cost \$60,000.

This was a decided increase over the original \$40,000 allotment made some months ago.

And Thursday night at the meeting of the Glendale City Council Councilman W. A. Horn made it known that at a conference with the general manager of the Southern Pacific lines, the cost of the Glendale improvement was placed at \$87,000.

The station will be second to none outside of the largest cities on the coast. It will be the most modern and it will vie in beauty with the class of community it is to serve.

One Southern Pacific official is quoted as saying: "We are not building this station for Glendale business. We expect that it will serve Hollywood and Pasadena and part of Los Angeles for years to come. Therefore we are building for the future rather than today."

According to present plans the station will be located at the foot of Eulalia street, 400 feet nearer Los Feliz road than originally planned. Until the site is definitely settled upon, however, the final plans cannot be approved.

MAY MAKE NEW TAXATION RULING

Matter of Great Interest to Owners of Vacant Land and Lots

Treasury department officials have under consideration a matter applying to income taxation which is of especial interest to owners of vacant land and lots.

In calling attention to this fact, the Real Estate Board of New York cites a recent ruling that only the carrying charges paid during the year in which the sale is made can be considered as deductible in considering the capital net gain.

Under decision 398, the treasury department permitted the deduction of carrying charges on non-income producing or vacant property.

In language of the street, this situation means that if one has owned a lot say for five years, paying taxes and other charges each year and during the sixth year the lot is sold, the owner would be allowed only taxes and charges he paid during the year the property was sold in.

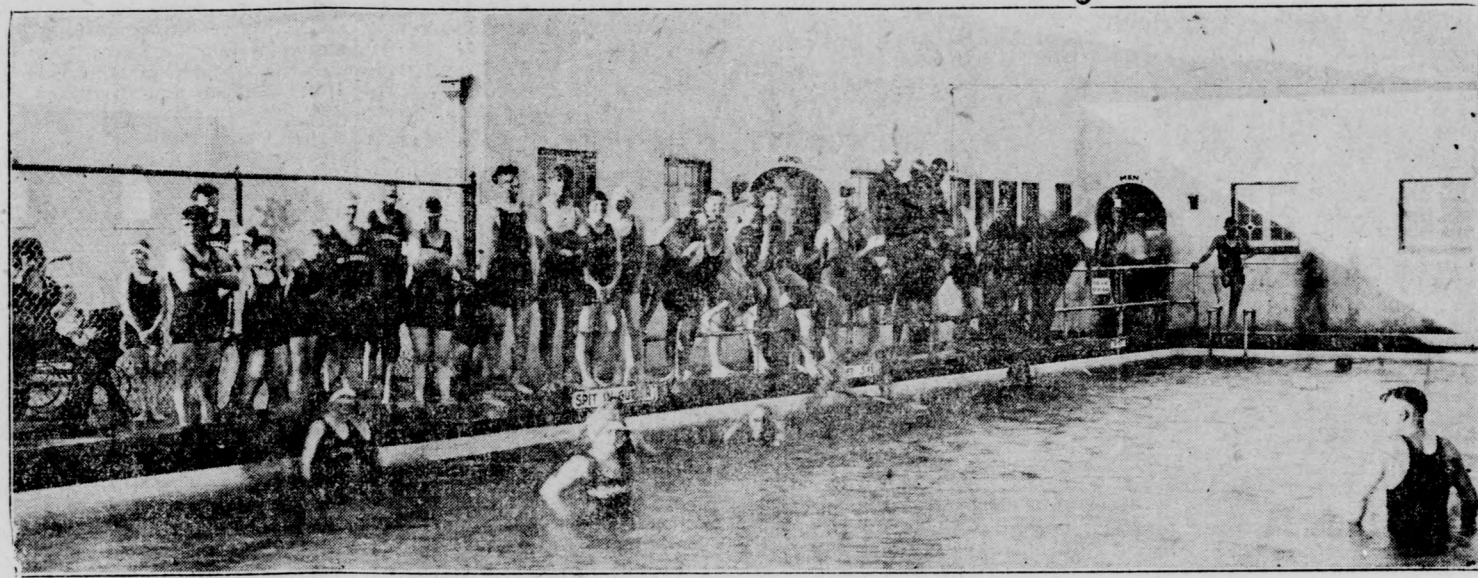

Hearing at Capital
A hearing was held in Washington recently on this matter, and as the question was raised by real estate interests, including the National Association of Real Estate Boards, Queensboro Corporation and others the matter was laid over to July 1 for further consideration.

Treasury officials admitted the equity of the claims made by real estate representatives, but feared that the statutes prevented any different interpretation.

DRIED FRUIT

Dried fruit production for California, in 1922, established a record, 500,000 tons being produced, of which nearly half was raisins.

IMPROVEMENT PROGRAM AT PATTERSON PARK IS NOW UNDER WAY City Plunge One of Features With H. C. Wendt In Charge; Grounds Are Being Beautified

Scene at Patterson Park plunge. The swimming pool is municipally conducted and is under the supervision of H. C. Wendt. He has specialized in aquatic sports. Mrs. Wendt devotes her attention to the women's department at the plunge. The city's program of beautifying the park is now being carried out.

SOUTH'S BUILDING PERFECTLY SOUND

Survey of Conditions in East And Here Indicates Safety Program

Despite an evidence in the east of a greatly inflated condition in the construction program of the principal cities, Los Angeles and Southern California building activities are believed to be perfectly sound, according to a survey recently made by the Southern California chapter of the Associated General Contractors of America.

The survey was undertaken to determine the conditions in this territory with respect to the eastern situation. The only evidence of a possible inflation of construction in Southern California was found by the local chapter of the national organization to exist in a rise of the prices of building materials mostly imported from eastern markets. The logical solution of this condition, however, local contractors are agreed, is a gradual incline in prices until they reach the point where unnecessary construction will give way to necessary construction.

Arthur S. Bent of Bent Brothers, former national president of the Associated General Contractors of America, and a member of the organization, who recently returned from a tour of the east, declares that the country is facing a grave menace as a result of the inflated building program of the whole nation. In an interview yesterday he stated that from the observations he made while in the east he believed that the nation's building program would have to be stabilized immediately to insure a continuity of labor and building materials.

Taxed to Limit

"In 1922," Mr. Bent said, "the construction plans of the country were taxed to the limit of the capacity. This year the building program of the nation exceeds that of 1922 in volume by more than forty per cent. And the country's facilities this year for supplying building material and building trades labor are only slightly more than two-thirds of the projected national program."

"The solution to the problem, especially in the east," Mr. Bent stated, "lies in the curtailment of all unnecessary construction until late fall. This will frustrate a threatened buyers' strike, which is directly due to the competition which has arisen among contractors."

The work of improving Patterson Park, in the northwest section of the city, is progressing steadily under the direction of the city officials, and as soon as the present program can be carried to completion Patterson Park will be one of the city's beauty spots as well as a recreation center, affording the people of Glendale plenty of room for amusement of various kinds.

One of the principal features of the park is the city plunge, which has been put into condition to accommodate the bathers who are already using it and whose numbers are expected to increase greatly as the weather grows warmer. The plunge measures thirty-three by ninety-five feet, sloping from a depth of two feet to eight feet, and the water is changed three times weekly, thus affording clean fresh water at all times, while the temperature, which is maintained around seventy degrees, permits bathers to enjoy this particular sport at all times.

The new superintendent, H. C. Wendt, has gone over every inch of the plunge and the buildings since he assumed charge on May 1, and the entire plant has been brought to such a stage of perfection and cleanliness that it has been declared by a representative of the University of Southern California as the cleanest he has ever

inspected. Mr. Wendt has been engaged in athletic pursuits and in training athletes for many years, specializing in aquatic sports, and he is working to keep the plunge in Patterson Park at the highest possible pitch of perfection and a place where the grown-up citizens of Glendale and the children, also, may disport themselves in perfect safety at all times. Mrs. Wendt is the matron at the plunge, devoting her attention entirely to the supervision of the women's side and helping to keep an eye on the children who come to the pool, and this arrangement has met with instant favor with those residents of Glendale who are now patronizing the plunge to the number of about 400 weekly.

Modern Laundry
The laundry arrangements at the plunge are up-to-date and are maintained at the highest pitch of efficiency at all times. Every garment is laundered and dried after use, and the most sanitary methods are in vogue to protect the patrons of the city plunge. Alterations that are being made in the building will permit the enlargement of the drying room to an extent that will give needed additional space.

The small round pool that has been set aside for the little children.

'Realtor' Is Official Badge of Integrity

By R. PORTER GILES
Secretary Oakland Real Estate Board

THE realtor is a professional dealer in real estate whose personal integrity and business responsibility are evidenced by his membership in a local organization of realty brokers which is affiliated with the National Association of Real Estate Boards.

The realtor is pledged to his fellow brokers and to the community in which he operates to adhere always to a very strict code of business ethics based on the square deal and the golden rule promulgated by the National Association of Real Estate Boards and enforced by all realty organizations.

The realtor is trustworthy and competent to handle any real estate transaction for which he may accept employment, and his personal qualifications and reliability are sponsored by the real estate board of which he is a member, and which holds him strictly accountable for his observance of the realtors' code of ethics, clean business and conscientious service.

"Realtor" is a professional term coined by the National Association of Real Estate Boards, and may be used in California by those who are members of a realty board affiliated with California Real Estate Association and the National Association of Real Estate Boards and whose names appear on its roster.

URGE RAIL RATES FOR HOMESEEEKER

Realtors Ask Action so That Farm Land May Be Developed

Members of the agricultural land committee of the Los Angeles Realty Board have passed resolutions urging the National Association of Real Estate Boards to request the railroads to re-establish homeseeker rates so that western agricultural lands may be developed. This was the substance of a statement issued by Tom Ingersoll, secretary of the local realtors.

The personnel of the agricultural lands committee taking this action follows: L. B. Joralmom, chairman; C. W. Griffin, C. B. Starr, E. E. Everett, Sydney Brown, H. Lee Blackmore and C. E. Seares.

Here's Resolution

The resolution follows: Whereas, for several years prior to the war there were in effect homeseekers' excursion rates to the western states, and

Whereas, it was possible for agriculturists to take advantage of these special rates to make personal investigation of western farming conditions, and

Whereas, by reason of war conditions such rates were discontinued and have not yet been restored, therefore,

Be it resolved by the Los Angeles Realty Board that the National Association of Real Estate Boards, at its sixteenth annual convention in Cleveland, June 27-30, by resolution request the railroads to consider again establishing rates similar to those previously in effect to make possible the further development of western agricultural land.

FROM CALIFORNIA

Fruit and vegetables, coming principally from California formed 5.76 per cent of the total agricultural haul handled by the Southern Pacific system last year, according to the annual report of the company.

HELD IN CHECK

High water in the Colorado river is being held well in check by the levees of Imperial irrigation district, Lower California, reports state.

STREET WORK WILL COST MILLION

Great Amount of Highway Building, Improvement Under Way Here

A million dollars' worth of street work is now under the supervision of the city engineer's department.

According to City Engineer Ben F. Dupuy, the total of the work shown on the monthly calendar totals this sum.

The City Council has received the following report from Mr. Dupuy:

"You will note that plans are prepared for all of the work that has been ordered, and the resolutions and ordinances of intention have been presented to the City Council on nearly every job."

"Some of these jobs have been on file in the city engineer's office for two or three years, and it gives me great satisfaction to be able to report that the work of the office is practically up to date. The total of the work shown on the calendar, together with the private work for which permits have been granted, and for which we are checking all of the plans and profiles, amounts to about one million dollars (\$1,000,000)."

"It has required an extra effort and a hard drive in the engineering department in order to bring this calendar up to date, and we ask your assistance and support, as well as the assistance and support of the City Council, in order to carry through the tremendous amount of construction that we have to bring at the present time."

List of Improvements

Streets under course of improvement at the present time are as follows:

Acacia avenue, Verdugo road to Sycamore Canyon road—Three-inch macadam. Resolution of intention adopted May 17.

Alexander street, Pacific avenue to Chester street—To be paved with three-inch macadam. Resolution of intention adopted May 17.

Allen street, San Fernando road to Fourth street—Three-inch macadam. Gutters, curbs, sidewalks and water pipe. Resolution of intention adopted May 17.

Alpha road, from Verdugo road east along north line of former city park—Deeds being obtained. Ardeven, from Glenview road north approximately 1,200 feet—To be paved with five-inch macadam. Contract awarded to E. L. Fleming, May 23.

Ben Lomond, from Glenview road north approximately 1,200 feet—To be paved with five-inch macadam. Contract awarded to E. L. Fleming, May 23.

Colorado street, entire length—To be paved with six-inch Willite. Cypress street, San Fernando road to Los Angeles street—Three-inch macadam. Water pipe. Resolution of intention adopted May 10.

Dixon street, Verdugo road to Lincoln street—To be paved with five-inch macadam. Contract awarded to E. L. Fleming, dated May 19.

Doran street, from 359 feet west of Columbus to San Fernando road—To be paved with five-inch macadam. Curbs, walks, gutters and water pipe to be installed. Contract for 150 days awarded to Ducey & Breitenstein April 9.

Dorothy drive, from Stocker street to north line of Tract 2685—To be paved with five-inch macadam. Resolution of intention to be republished. Water pipe to be laid.

Dryden street, Pacific avenue to Columbus avenue—To be paved with three-inch macadam. Resolution of intention to be republished. Water pipe to be laid.

PATTERSON PARK IS BEAUTY SPOT

More Funds Are Needed to Complete Work on City's Playground

(Continued From Page 1)
dren will be put to use as soon as the weather warms up enough to permit the kiddies to play in the water without any danger of taking cold, and another boon for the children is the sand pile, two feet deep, filled with fine sand that has been carefully screened to remove all the coarse gravel.
The new concrete and stucco bandstand, measuring thirty-two feet square, that stands near the entrance to the park, still needs some work on it before it is ready for use, as does the pergola that faces the bandstand, but it is hoped to secure additional funds from the city officials with which to carry on this work, which has been under the direction of Industrial Commissioner Gustav Rasmus since the present plans were put into effect. The bandstand has been built in such a manner that the acoustic properties are perfect, and all sides of the structure are open, instead of having one side entirely or partially closed with a sounding board, as is often the case. Completion of the bandstand will also mean the installation of comfort stations and storerooms under the band platform, and this part of the work will be carried out as soon as funds are made available.

In Flower Gardens
In charge of the planting and cultivation of the many kinds of flowers and trees that have been set out to beautify the park is Sam Warren, a horticulturist of life-long experience, who has worked in some of the largest eastern and California gardens and nurseries, and who is using every effort to transform Patterson Park and to build up the soil there until it will rival any park in the Southland.

Assisting Mr. Warren is Cyrus Skinner, a man who has spent his life among flowers and plants and who knows and loves them with a passionate devotion that only a few people can understand. Mr. Skinner spends his working day among his roses and his water-lilies, his trees and his shrubs, and when his work is over he comes back again in the evening to spend some more time with his pets and to watch the progress of every little shoot and bud, and to his efforts the credit is largely due for the progress that is being made in turning the flower beds of the park into sights that gladden the eye of the beholder.

In the garden section of the park a number of experiments have been carried out successfully in the treatment of various trees and shrubs with Plant Pep, the

SOUTH'S BUILDING PERFECTLY SOUND

Survey of Conditions in East And Here Indicates Safety Program

(Continued From Page 1)
tors and will permit necessary construction to go forward without any noticeable inflation in the prices of materials and labor."

At Board Meetings
While in New York City Mr. Bent attended meetings of the directors and advisory boards of the United States Chamber of Commerce, the Associated General Contractors and the American Construction Council. The inflated condition of the construction program of the country was recognized and discussed at these gatherings. With the result that the latter body passed a resolution advising all banking interests to curtail the financing of speculative building until after next fall.

At the meeting of the directors of the United States Chamber of Commerce, of which Mr. Bent is one, the latter was asked to explain why he, representing the interests of the Associated General Contractors, should advise such a recourse as a solution to the problem of stabilizing prices of materials and labor.

"The contractors' organization," Mr. Bent informed the other members of the board, "standing for the protection of the public, believes in advocating a policy that will discourage profiteering among contractors in the costs of materials and labor."

Invention of Industrial Commissioner Rasmus, and the results, which have been closely watched by the city officials, have proven the worth of the product in the case of a number of trees that were previously regarded as ready to be chopped up and thrown away. In at least three cases the trees had been dug up and thrown aside as dead, but the admixture of the Plant Pep to the soil after they had been re-planted has caused the trees to develop new life and they are now putting forth new shoots and promise to develop into strong hardy trees.

Other trees that were failing have been restored to vigor by the application of the chemical to the soil at their roots and are flourishing in a most encouraging manner.
The fact that the appropriation of \$1150 that was set aside for the special work on the park has been exhausted has caused a temporary slowing up of the work, but it is hoped by Commissioner Rasmus and others interested in the development of Patterson Park that additional money may be allowed to carry on the work that

CITY ONCE MORE IN HIGH RANK

Stands Among Leaders in Building Activities for Month of May

Glendale again ranks well up among the leaders in Southern California in city building, being seventh among thirty-eight, in value of permits issued during May.

Outside of Los Angeles and the harbor district, only Long Beach, Pasadena, San Diego and Alhambra surpassed this city, while such prominent southland centers as Santa Ana, Santa Monica, Pomona, Santa Barbara, San Bernardino, Monrovia, Riverside, Orange, Ontario and Redlands were left far behind.

The list follows:

Los Angeles	\$18,826,881
Long Beach	1,701,117
Harbor District	1,254,000
Pasadena	896,272
San Diego	765,365
Alhambra	762,480
Glendale	773,687
Inglewood	516,575
Santa Ana	385,399
Santa Monica	477,520
Pomona	355,100
Whittier	340,006
Burbank	318,750
Venice	271,610
Eagle Rock City	218,510
San Bernardino	183,208
Fresno	208,206
Santa Barbara	204,000
Altadena	192,235
Torrance	191,075
Monrovia	125,050
Riverside	138,670
Anaheim	125,825
Altadena	110,000
Compton	102,235
Orange	95,475
Huntington Beach	82,700
San Bernardino	80,200
Southgate	69,215
Ontario	64,320
Pinula	40,240
Redlands	40,000
Lindsay	39,025
Visalia	24,000
El Monte	24,000
Glendora	10,600
Exeter	10,400
Oxnard	3,500

GET WORLD RECORD

The Los Angeles harbor fishing fleet hung up the world's record for barracuda haul, in May, the catch of this fish being over fifty per cent of the total for the port, which was 2,636,603 pounds and represented thirty varieties of deep-sea fish.

to Kenneth road—Three-inch macadam. Gutters, curbs, sidewalks and water pipe. Resolution of intention adopted May 17.

Winchester street, San Fernando road to Glenwood road—Three-inch macadam and water pipe. Petition received March 24.

Windsor road, Adams street to Porter street—Three-inch macadam. Resolution of intention adopted May 17.

Wing street, Windsor road to Colorado street—Three-inch macadam. Water pipe, curbs and sidewalks. Time for protest expired May 24.

—And After the Honeymoon

After the honeymoon, the happy couple prepare to settle down. What a satisfaction it will be to both to go directly to their own home! Make your preparations NOW for the bungalow or cottage in which you will start your life together!

Put your heads together, and decide upon the sort of home you will like best; in it build all the little comfort features so necessary to your convenience, and so individual. We can supply your materials at reasonable figures.

ACACIA HILLS

LOW IN PRICE

HIGH IN VALUE

WE OFFER YOU A HOMESITE

—Where you can build an inexpensive house on a choice lot on a hillside overlooking Glendale, the San Fernando and Verdugo Valleys and the green foothills, and approached over fine roads of easy grade with city utilities included in purchase price. The neighborhood is choice, 1 block from transportation, convenient to stores and markets, and but twenty minutes from Fifth and Broadway.

We Have Made Our Restrictions Protective

—But not prohibitive to the man of moderate means, and here he can enjoy the constant inspiration of the beautiful view, the quiet and freedom of the country and yet be in close touch with the city.

These Are Advantages That Millionaires Cannot Monopolize

—and, no matter how much they may spend on ostentation, you can enjoy as much comfort without the care and responsibility they endure and the "great out of doors" is spread before you with a charm that "age cannot wither nor custom stale."

THE LOCATION CANNOT BE EXCELLED AT ANY PRICE, AND NO OTHER HILLSIDE TRACT CAN COMPETE WITH OUR PRICES

PLAN DEDICATION OF NEW BUILDING

Community Center at Sparr Heights Is Nearing Completion

The handsome Community Center building at Sparr Heights is now practically completed and plans are under way for its dedication in the near future. It is of the Spanish-Moorish type of architecture, and is located near the center of the tract, facing Verdugo road, upon Tujunga boulevard.

Space for the offices of the company was reserved in the gift to the city of Glendale made at the laying of the cornerstone, and accordingly Barnum & Walters have removed their main offices from Verdugo road to their handsome and commodious quarters in the new building, and are at home there to their friends and clients.

The affairs of the Sparr Heights tract are prospering and on every hand are seen evidences of activity and preparation for yet greater things in the near future. The month of June will witness some important structures begun and others completed. The interest in the property grows, and inquiries are being received daily from near and far.

Demand For Homes

The report of the county of Los Angeles concerning housing conditions, tract platting and building has created much comment among buyers. In some quarters the impression has prevailed that the lots platted and offered for sale were far in excess of the demand, but when it was learned from an authoritative source that only 92,000 lots had been opened to the market in the entire county and 100,000 houses had been built during the current year, home-seekers began to realize that the real estate offerings, large as they appear, are not yet equal to the annual demand for homes in this county; they also began to understand that their opportunity to buy is NOW, for with the number of tourists pouring in that we have today, the choicest locations will all soon be privately acquired.

The prediction is now being authoritatively made that Los Angeles will be the largest city numerically and the most important city commercially in the world; it is already the largest exporter of oil, and with raw material avail-

INCOME TAX IS DUE ON JUNE 15

Must Make Second Quarterly Payment; Instructions For Tourists

Forty thousand Southern California taxpayers who are meeting their income taxes on the installment plan must make their second quarterly payment on or before June 15. There were 230,682 separate returns filed in the Los Angeles district this year, as compared with 176,950 in 1922, a gain of 30.36 per cent, which is the banner increase of the sixty-five internal revenue districts in the United States. Approximately 190,000 persons paid their taxes in full on March 15.

Collector Rex Goodcell has called attention to the fact that the mailing of a bill to a taxpayer at his last given address constitutes legal notice, and not the delivery of the letter. He urged taxpayers to notify the internal revenue office of changes in address as they are still liable to taxes and penalties, even though they do not receive notice of their indebtedness.

Warning to Tourists

Under the law the entire income tax of a taxpayer who fails to pay his quarterly installment automatically becomes due and the col-

able of every sort, climate favorable for wage earners to enjoy life, port facilities developable, the growth of the city is bound to be phenomenal. Few who have lived here a long time realize what is being done around us. The city itself is now the fifth in population in the country, and before the year closes will have more than a million people, it is predicted.

Thus, those who love the quiet of the country, who desire to escape the crowd, to enjoy the city benefits without its handicaps, are looking to scenic locations, and Sparr Heights offers them unequalled position for transit and transportation, climate, social enjoyment, beauty of view, present advantages and future prospects that are unequalled. Great as has been the success of the developers of the tract, the next few months promise to be phenomenal, and in their new offices in the Community Center building the Barnum-Walters Company are fully equipped to handle its great and increasing volume of business.

TELLS CHARM OF RAINBOW VALLEY

Lot Sales on Property Near Sunland to Lure Many Buyers Sunday

"Sunday is going to be a big day at Rainbow Valley," says J. L. Le Berthon, "and we are anxious to have a good representation of Glendale people among the many lot-buyers who will drive out to our fine 111-acre tract on the floor of the San Fernando valley, just beyond Sunland."

"The famous Michigan avenue, one of the finest boulevards in the state, will take you there. It runs right through our property. From Glendale, go out Verdugo Road to Montrose and continue on up till you strike this boulevard, then turn left and proceed on past La Crescenta, Tujunga and Sunland."

"The property is just five minutes beyond the latter point. When you have wound down through the gorge and that great panorama of color and still life—Rainbow Valley—bursts on your vision, you will find yourself gazing on a gorgeously beautiful, fertile country, level acres stretching away invitingly, a future city, where we are now selling fully improved, large lots for \$198, \$298, \$398, and boulevard lots \$498, with down payments of \$10, \$15 and \$20 and payments of but \$10 per month."

Mr. Le Berthon urges Glendaleans who come out to Rainbow Valley tomorrow to be sure and register for the "Model Log Cabin" that will be given free to the one holding the lucky number at the final drawing.

lector much collect the whole tax plus interest and penalties.

Tourists who are visiting in Southern California should send remittances on their income tax to the collector of the internal revenue district in which they filed their original returns. Collector Goodcell pointed out that, although the Washington bureau assesses the tax, payment of it must be made to the collector of internal revenue in whose district the taxpayer resides. Payments should never be sent to Washington.

In making remittances, taxpayers are urged to enclose their tax notices, or, if they be lost, to state what tax the payments cover.

Spring Wheat Crop Is Forecast by Bureau

WASHINGTON, June 9.—The condition of spring wheat on June 1 was 90.2, forecasting a total production of 236,000,000 bushels, the crop reporting board of the department of agriculture announced. The acreage of spring wheat is 18,503,000 and a yield of 14 bushels per acre.

Oats: Condition on June 1, 85.6; total production 1,256,000,000 bushels; acreage 40,768,000 acres; yield per acre 30.8 bushels.

Barley: Condition 89; total production 196,000,000 bushels; acreage 7,980,000 acres; yield per acre 24.6 bushels.

Rye: Condition 81.1; total production 72,000,000 bushels; acreage 5,234,000 acres; yield per acre 13.8 bushels.

**Economy Is Demanded
President Declares**

WASHINGTON, June 9.—The most important duty confronting public officials throughout the United States is to enforce rigid economy in administration, President Harding declared yesterday in a letter to Professor Morris B. Lambie, of the University of Minnesota, made public at the White House. The president asserted every possible step should be taken by those in public office to minimize governmental expenses.

Fruit and Vegetable Standard Bill Signed

SACRAMENTO, June 9.—Governor Richardson yesterday signed senate bill 146, standardizing the marketing of fruit and vegetables. This bill amends the present act and relates to the standardization of lettuce, cantaloupes, grapes and other products.

URGES NEW SLOGAN

"A continuation of the present prosperity of the country hangs on building construction," says George Woodruff, vice-president of the National Bank of the Republic, Chicago, in a recent address to representatives of the building trades, urging them to adopt the slogan "Build in 1924."

4000 PHONES

Approximately 4000 telephones per month are being installed in Los Angeles and vicinity.

ACACIA HILLS IS NEW HOME TRACT

Moderate Prices for Lots Is Stressed by Owners of Subdivision

The Acacia Hills Syndicate, of which Ferd Goodfellow is the active manager, announces the opening of a choice residential subdivision of hillside homesites that promises to be a popular favorite, both on account of its location, and its surroundings.

The beautiful hill, which has been platted into lots is surrounded by highly improved property and is to have finely graded and finished roadways winding about it to its summit, and the sites are so planned that there is no obstruction of the view possible and the frontage of the lots is exceptionally wide, in most cases being sixty feet.

Along the roadways, to the top of the hill, the yellow-flowering acacia fraxinifolia is to be planted at intervals of twenty feet, making a unique and lovely effect, with their soft feathery green branches and yellow blossoms. This tree is admirably suited to the purpose, for it is rather low-growing and bouquet-like in the spread of its branches, and while ornamenting the slopes of the tract will never shut out the view, as many other trees would do.

Utilities Installed

The syndicate has installed all city utilities upon its property, and these will be available to purchasers and included in the price of the lots. That price is a feature of this subdivision, which deserves further mention. Its organizers have watched the development of hill-side and other residential tracts in Los Angeles, Glendale and surrounding communities, and have concluded that in most cases the price of hill-side home-sites seems to have been set for purchase by people of large means, and, in most cases, the restrictions follow the land-price and are prohibitive to those who wish to build inexpensive houses.

While there is no objection to anyone building as pretentious and expensive a house as he desires upon this property, and it is as appropriate for such homes as for highly restricted tract, the fact is that a huge and ostentatious house is as often a white elephant as it is a "joy forever," and an expensive house may be made as artistic and architecturally excellent as a palace. The price of the lots is lower by fully fifty per cent, than that which the syndicate would be justified in asking, but the idea behind the subdivision, is to provide home-sites that are within the reach of the modest pocketbook.

The Acacia Hills tract is the nearest to Los Angeles of all Glendale's subdivisions, only about twenty minutes by automobile from Fifth and Spring street, and is close to stores and markets which supply domestic needs and but one block from public transportation. This does not mean much to the man with two or three automobiles for the use of his family, most of whose members have nothing to do to occupy their time, but it is a decided factor in the calculations of the man with only one automobile, and that in use perhaps for his business needs six days in the week.

Advantages Told

One might justly ask, "what are the advantages" nowadays of "the country within the city." The management of Acacia Hills would answer by suggesting that the inquirer drive through their tract, pausing now and then to look across the wide lovely valley of the Verdugos and the San Fernando spread out below him, at the tree-embowered homes of Glendale lying at the foot of the eminence, at the wave upon wave of encircling green foothills rising to the distant Los Angeles mountains, and then, may be understood the lure of the beauty of a landscape of which the lover of nature can never weary.

With the inspiration of this beauty always before his eyes, the home-maker has a sense of unity with it and freedom from the hampering effects of city crowding that can only be achieved by such isolation. To many persons "isolation" means loneliness, the absence of human association, the seclusion of solitude. That is not what is meant by "the country within the city." Here the isolation is that of separation from the annoyances of crowds and the freedom of individual life.

The value of the Acacia Hills property is intrinsic, and bound to increase as time passes. All hill-side property is being eagerly acquired by home-builders, and this is the only tract of superior quality, in the neighborhood of Hollywood, Glendale or Los Angeles where the price is within reach of the man of moderate means, the wage-earner of taste and discrimination, and the salaried man who appreciates the benefits of a real home.

No matter how choice a lot on level land may be, or what the view from it is now, in the course of the development of the neighborhood that view will be obstructed, and, as the community grows, the possibility of the encroachment of local business is always present.

This can never happen on Acacia Hills. Every house built upon the tract will add to the beauty of the neighborhood without interfering with the outlook of another, and when around these homes there are the flowers, shrubs and trees that home-lovers always plant and cherish, it will be, with its perennially flowering street-trees, a beauty spot unique in hill-side tracts.

The approach to Acacia Hills is by Glendale boulevard or Brand boulevard to Palmer street, thence east one block. The public is invited to visit the new subdivision and see for themselves its attractions.

Allen Square

The Golden Opportunity of Pasadena

NO CITY in all the great Southland has witnessed such a steady growth as Pasadena. As a result of this continued advance, more and more purchasers from outside the city, attracted by the desirability of properties in Pasadena, have invested in them.

Allen Square, with its ideal situation in the environs of the Pasadena Golf Club, Mount Lowe, Mount Wilson, and Eaton Canon—in fact, in the heart of the beautiful Foothill Community, offers an unquestionable location of beauty.

It offers the neglected opportunity that cannot last. Most adequate communication with all the Southland. Unequalled School facilities with the New Allen School being rushed to completion—everything that makes a Community desirable.

Compare prices and terms. Your opportunity lies in Allen Square.

AUTOMOBILE SECTION

LEARN ABOUT SOUTHLAND SCENERY

Residents Are Ignorant of Many Advantages in This Territory, Claim

"Scenery science" for motorists of Southern California is strongly recommended by the auto club touring bureau officials.

Just what the study of scenery science may be and how it applies to auto owners is explained in an official communication just issued from the Automobile Club of Southern California, indicating that a woeful degree of ignorance is apparent on the part of residents of the southern part of the state as to the scenic advantages of their own territory.

Questions to Answer
Do you know where the national parks of your state are located? Do you know the boundary of the Cleveland national forest reserve? Is it in Southern California?

Do you know where, in your locality, to advise your eastern friends to find running water in the creeks during July?

Do you know the location of famous and scenic lakes in the southern part of the state? These are a few of the questions in line with "scenery science" indicated by the club officials in their suggestion that resident motorists of this part of America prepare themselves to answer the scores of questions which will be asked by thousands of eastern motorists who are coming here this summer.

All touring offices of the Automobile Club are prepared to answer questions on these subjects and will be glad to assist any motorist in becoming acquainted with the scenic wonders of this part of the state. Do you know why and how the Torrey pines are famous? Can you name all the missions in the southern part of the state?

Vital Information
All these subjects are vital to an intelligent understanding of the attractions of the southwesternmost corner of the United States.

(Continued on Page 4)

CHANGES IN AUTO LAWS OUTLINED

Outstanding Features Are Described; Gas Tax to Net Big Sum

SACRAMENTO, June 9.—State revenues amounting to approximately \$15,500,000 will be derived, according to official estimates, under the gasoline tax bill and the California vehicle act, sponsored in the legislature by Senator Arthur Breed of Piedmont and approved by Governor Friend W. Richardson.

These bills compose the most important vehicle legislative program adopted in California during recent years. The gasoline tax alone is expected to earn \$11,000,800 for the state annually. Income from the flat registration fee of \$3 will total \$2,300,000 a year. Approximately \$1,200,000 will also come into the state treasury through additional registration fees on heavy trucks.

Outstanding Features
Here are the outstanding features of the Breed laws:

Senate bill No. 744 levies a motor fuel tax of 2 cents per gallon. This tax, effective September 30, 1923, is paid by the distributor. Exported from the state and used within the state for purposes other than to propel vehicles upon the highways, are exempted. A special exemption is also given fuel used in the transportation of rural free delivery mail.

Rebates are provided where the tax has been paid upon exempted fuel. The gasoline tax obligates the motorist to pay only for actual use of the highways.

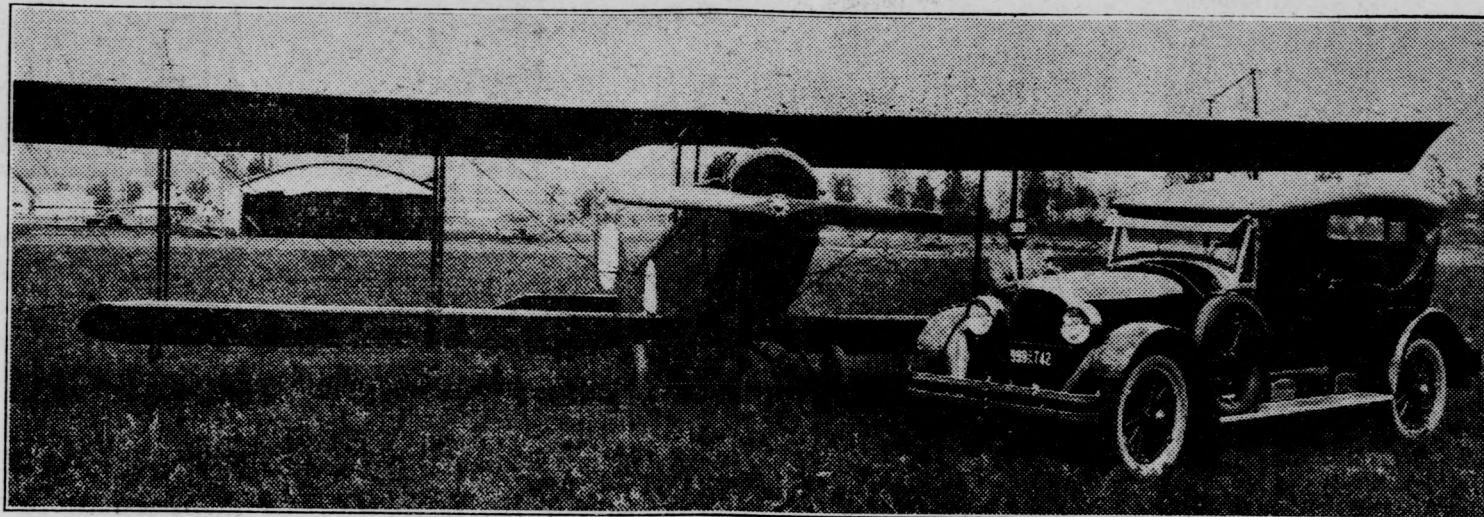

The funds derived from the gasoline tax are divided equally between the state and the various counties after payment of rebates.

The state's share must be used exclusively for the maintenance, repair, widening, resurfacing and reconstruction of existing state highways. The counties must spend their share for construction.

(Continued on Page 4)

AVIATION EXPERT PICKS PAIGE 6-70 SPORT AS COMPANION TO PLANES

K. J. Crawford Finds Paige Smoothness and Performance Similar to Smooth Running Airship

Picture shows K. J. Crawford standing besides his two speed demons, an airplane and a Paige 6-70 Sport Touring car, which he bought to insure rapid transportation on his trips on solid earth. Besides the Paige, Mr. Crawford owns three airplanes and intends to buy several more.

Registration of Cars in Canada Increases

DETROIT, June 9.—Registration of automobiles in Canada shows a total of 516,307 motor cars, an increase of 10 per cent over the figures of last year, according to the announcement of the Canadian Department of Highways.

Ontario leads the list of provinces with 238,600 automobiles to its credit. Next in line is Quebec with 69,324, and Saskatchewan is third with 60,458. Manitoba, Alberta and British Columbia follow with 41,885 and 33,880 respectively.

Properly Set Tires Will Last Longer

If you find one of the front tires wearing more than it should, see if the front wheels are out of alignment. Running against the curb or other obstruction will bend the steering knuckle arm and throw the wheels too far in toward each other. They should toe in slightly. If not properly set the tires will wear rapidly.

The appeal of the Paige 6-70 Sport touring car to an aviation expert is shown by the readiness with which K. J. Crawford, 301 North Cedar street, paid down his money for one of these models after a demonstration that put the car through every pace it ever had and some that even the Glendale distributor, Ralph B. Bliss, 306 East Colorado street, did not know the car possessed. Mr. Crawford owns three airplanes now in which he sails around in the upper air lanes, but he needed some means of transportation that would take him to from the air port on San Fernando road, where he keeps his planes, and his investigations, that covered cars of every class and price, led him to adopt the Paige 6-70 as soon as he had ridden in it.

He declared that the roadability and the performance of the Paige were simply amazing and bore a

CAUSE OF RUSTED RIMS

A car that has been in use all winter should be jacked up and the tires removed from the rims. Snow and moisture that have gathered around the rim have probably soaked in between the rim and the head of the tire, causing rust on the rim. This rust has a damaging effect on the beads. Tires should be removed when dry

weather arrives and this rust removed. Beads have been known to have rusted solid to the rims and when the tires have been removed portions of the bead have stuck to the rim.

A new device for dimming automobile headlights is operated by a push button under the control of a driver's foot.

See Every Bolt Is At Work to Limit

Go over all the connections of the steering mechanism once a week to see that every bolt is doing its work and that none of them are coming loose. More damage may follow failure of the steering gear than any other part of the car. See that nuts are tight, that cotter pins are in place and that lock washers are holding. If in doubt, put a wrench on each nut that is not held by a split pin. You will be well repaid by the extra confidence it will give you while driving.

Test Out Fan to See If Belt Is Tightened

Try the fan occasionally to see if the belt is tight enough. If the blades can be spun around the belt is loose and the engine will overheat. If it is so tight that the blades can hardly be moved there is danger of snapping off the blades when the engine starts. If the belt is tight enough so that the fan will slip with a slight effort it is about right.

CLUB ISSUES WARNING TO SMOKERS

Unless There Are Reductions in Forest Fires, Drastic Action Will Result

Complete abstinence from smoking stares the motorists of this part of the state in the face if they are planning to tour any of the forest reserves, according to a warning just issued by the Auto Club of Southern California.

Unless there are fewer forest fires and a great deal less carelessness on the part of automobile parties, a smoking ban will be placed on some of the greatest vacation areas in America. Police powers belonging to forest reserve supervisors have been greatly increased at Washington and it is entirely within the jurisdiction of the reserve supervisors to say whether or not there will be no smoking of pipes, cigars or cigarettes within the limits of the Angeles or Cleveland Forest Reserves.

Result of Carelessness
An intensive investigation of summer forest fires springing up in certain parts of Southern California has developed the evidence that a large majority of these fires have started from carelessly thrown cigarette stubs falling into dry grass along the road. In view of the fact that tramps using the roads do not smoke the type of cigarette which burns on and on forever until exhausted, and the motorists do, has led the forest officials to believe that the motorist is largely at fault.

No such ban has yet been placed on the forest reserves of the southern part of the state, say the Auto Club officials, but, as during June and July more fires are found, such a contingency is entirely possible.

More Drastic Means
If the watersheds continue to be menaced by forest fires, should such a step be taken, then more drastic means will be found to preserve them. This would indicate that motorists, hikers, and (Continued on Page 4)

STOLEN AUTO TOTAL ON INCREASE

Close to 2000 Cars Taken in Los Angeles so Far This Year, Report

A total of 1,760 automobiles, representing a property loss of \$2,000,000, have been stolen in Los Angeles so far this year, as against 1,095 cars stolen during a corresponding period in 1922, according to an official report issued by the theft bureau of the Automobile Club of Southern California. This breaks all state records for motor thefts.

During the month of May alone this year there were 402 machines stolen from the city streets, the report shows, as against 250 for May of last year.

Of those 402 stolen machines, 263 have been recovered, leaving 139 owners minus cars, a property loss of \$150,000.

Of the total of 1,760 automobiles stolen so far this year, the report shows that there have been 1,125 recoveries by the police, and the theft bureau of the Automobile Club, leaving 634 machines still among the missing, their owners out of pocket a total of \$640,000.

Becoming Bolder
These figures tend to show that auto thieves are becoming bolder and have evolved certain systems of hiding and disposing of cars, making it doubly difficult to cope with the situation; while car owners are growing more careless and not only fail to properly lock their machines, but when the emergency arises are frequently unable to give adequate identification data to the authorities.

A particularly pernicious habit, agree Detectives Erven and Hickok, of the Automobile Club, is that of leaving keys in locks, four cars in one city block having been counted on one inspection tour, standing in this precarious condition.

It is believed that two provisions in the new motor vehicle law will remedy the situation materially. One requires all owners of private garages to report with (Continued on Page 4)

Says 60,000 Autos to Come Over One Route

Sixty thousand automobiles will travel from coast to coast over the Lincoln highway during the coming summer season, according to an estimate made by A. P. Bement, vice-president of the Lincoln Highway association. Mr. Bement says that 225,000 persons will travel over the highway between April 1 and October 25, as compared to about half that number last season.

Mr. Bement bases his prediction on the country's increased prosperity and the great improvement in the roads throughout the country, he said.

"With the exception of a few places, the 3,300 miles of Lincoln highway are in excellent condition."

"For 300 miles across Iowa to Omaha, the road is mostly gravel. There are about 100 miles of graded dirt in separate sections, which is bad when wet."

MAY BREAKS ALL SELLING RECORDS

Reo Reports Biggest Month in Firm's History As Month Closes

May stands as the biggest month in the entire history of the Reo Motor Car Company, all previous records for volume of business having been shattered. A new high figure for shipments had been set during the month of March just passed, but the total shipments in May were far in excess of this previous mark and thirty-five per cent greater than in the month of May, 1922.

"The record which has been hung up for May was not attained by forcing shipments, but was set by simply supplying the demand to the best of our ability," says R. C. Rueschaw, sales manager of the Reo Motor Company, in a letter to Harry E. White, Inc., local Reo distributor.

"It is encouraging to note that shipments during the month of May were relatively uniform throughout the country. It is equally encouraging to know that the demand for Reo products has been consistently insistent in every part of the United States. At the present time there is scarcely a territory containing soggy spots and business seems to be in a most healthy state."

"The outlook for late summer and early fall months is equally promising. Our dealers in the agricultural districts report that business looks exceptionally good, and this, coupled with the healthy city business which is definitely assured, gives us every reason to believe that our facilities will be taxed to the utmost to meet this continued demand for Reo products."

Auto Officials Will Hold Chicago Meet

CHICAGO, June 9.—First National conference of automobile trade association secretaries and managers will be held here July 23 and 24. Four hundred are expected to attend. The definite dates for the conference were announced by the National Automobile Dealers' association which is arranging the conference. The program will be made up entirely by association secretaries who have made noteworthy success in one or more activities of the trade association programs.

Loss of sheep from disease in South Africa last year was 1,848,000.

EXPRESS UTILITY TRUCK IS SHOWN

Chevrolet Prepares to Meet Growing Demands for Transportation

Experts who are keeping in close touch with the automobile industry predict that the big advancement of the future is going to come in the field of merchandise transportation, which forms one of the biggest problems of the business world and that is promising to reach an acute stage in the near future.

As pointed out by C. L. Smith, Chevrolet distributor, Colorado and Orange, passenger automobiles now carry more passengers than the railroads do, and while the annual movement of freight by motor trucks has not yet reached the proportions of that handled by the railroads, the amount of farm produce and other merchandise carried by motor trucks is assuming a figure that will speedily place it on an equality with the freight handled by the railroads.

The new Chevrolet Utility Express truck that the C. L. Smith agency is showing now is designed to meet the needs of the men who have to haul a medium heavy truck designed to carry one or two tons at 20 to 30 miles per hour, and exhaustive tests that have been made under every possible condition have established the Chevrolet Utility Express truck as a leader in this class, demonstrating its ability to haul heavy loads quickly and economically, while the three-speed transmission provides correct gear ratios to meet any road or load conditions and eliminate any racing of the motor or boiling the water.

Mr. Smith asserts that this truck leads in high mileage on gasoline, oil and tires, while the Chevrolet valve-in-head motor provides abundant power for every emergency.

Business Looks Good, Says Nash

Outlook for Last Half of Year Encouraging in Every Line

"The general outlook for business during the last six months of the year is decidedly more favorable than it appeared three months ago," says C. W. Nash, president of The Nash Motor Company. "Conditions, in fact, look far better for the last half-year period than I had hoped, in March, they would look."

"Along about March I big merchants in practically all lines of business seemed fearful of a general slow-up for the last half of 1923, and as a result they did not overload their shelves with merchandise. Buying was done on a basis of immediate requirements. This was true of the manufacturer as well as of the jobber and retailer."

"The result of this careful policy has been that stocks are low in everybody's hands, a condition that will work to the advantage of the country during the period we are now entering. With low merchandise inventories, jobbers and retailers must continue to order goods, which of course means that manufacturers must continue to produce their wares. This assures uninterrupted employment, the only basis I know of for that condition of sound prosperity which in the past we used to call 'good times.'"

"With all of these things in mind, I feel that the automobile business will be good during the second six months of the year. Stocks of cars in the hands of dealers have about been depleted; in fact, there are practically no cars of standard make in stock. Automobile dealers are entering the summer period with a clean slate. Demand for cars continues because business conditions in other lines warrant a continuance, and factories therefore will be kept busy supplying automobiles. This again means continued employment for hundreds of thousands of men."

Committee to Study Highways of State

SACRAMENTO, June 9.—One of the greatest forward steps in state highway construction was taken Monday, when Governor Richardson signed Assembly Bill 1344 by Mr. Bromley, which authorizes the appointment of a committee of nine persons to enter upon a detailed and comprehensive study of the road problems of the state.

The committee, which serves without pay, is authorized to propose a complete system of state roads, study types of construction and materials to be used, to recommend the inclusion of additional mileage, the exclusion of certain legislative roads now included in the system, and the time to be occupied in the completion of all its duties will be the submission in its report to the legislature two years hence of some plan for financing the enterprise. It is estimated by the Engineering Department of the Highway Commission, through R. M. Morton, state highway engineer, that it will require at least \$200,000,000 to complete the 5,500 miles of highway now included in the system.

Some circuses employ as high as 3,000 people, including workmen.

WORLD'S LEADERS BUY CADILLACS

Men and Women of Affairs Depend on Motors of Character, Claim

Inside of twenty years 250,000 Cadillacs have been placed in the hands of owners, and of this number approximately 150,000 are of the popular V-type eight cylinder type now being manufactured by the Cadillac Motor Car Company.

It is an interesting fact that more V-type eight-cylinder Cadillacs are used by representatives of foreign embassies at Washington than any other fine quality car. Likewise more Cadillacs are used by members of the United States senate and by United States federal judges than any other of the finer cars, says W. H. Court, manager of the Court Motor Company, 235 South Brand boulevard, local agent.

It is stated on good authority that in the "four hundred" social ranks of New York, Chicago, Philadelphia, Boston and other large cities, more than half of this select clientele shows its buying preference for Cadillacs.

More than a score of presidents of transportation companies and an equal number of vice-presidents appear in this galaxy of the country's noteworthy leaders, and to make the list complete for the United States alone would be to give the names of leaders in commerce, industry, finance, engineering and professional life.

In foreign lands the Cadillac has been selected as standard official car by many governments. King Alfonso, of Spain, recently purchased six new Cadillacs, bringing the total of Cadillacs in his possession up to 10. The city of Bucharest presented a Cadillac to Princess Elizabeth when she was married last year to the son of King Constantine, who became King George of Greece, and very recently a picturesque story of the evolution of transportation was unfolded when a new type 61 was purchased by the Shah of Persia.

PLANS FOR JINKS TRIP COMPLETED

Dealers to Hold Outing in Mountain Resort Near San Bernardino

Between 90 and 100 members of the Motor Car Dealers' association of Glendale are expected to attend the second annual High Jinks and outing of the association June 14 and 15 at Forest Home in the San Bernardino mountains.

Details of the two-day program were completed at a meeting of the association recently held at Glen Inn, Glendale, and attended by C. H. Hunter, president; Harry E. White, treasurer, and M. B. Towman, secretary of the organization.

Frank Culver, proprietor of Forest Home, is making special arrangements for the entertainment of the automobile men and will offer several unique stunts for their edification. The dealers in "new and second-hand ones" are expected to take their fishing tackle along with them and during quiet moments of the outing whip the nearby streams for trout.

The recently-improved mountain boulevard leading from Redlands to Forest Home, 16 miles up Mill Creek, makes the resort most attractive and available for such an outing as contemplated by the Automobile Dealers' association.

SHOW NEW MODEL OF LINCOLN CAR

Jesse E. Smith Agency Tells Beauty of Custom Built Body

One of the new custom-built Lincoln town cars of special design has just arrived at the Los Angeles branch of the Ford Motor Company, and, according to Jesse E. Smith, Glendale agent, persons who like to keep informed regarding quality cars of exclusive character will find much to interest them in this new model.

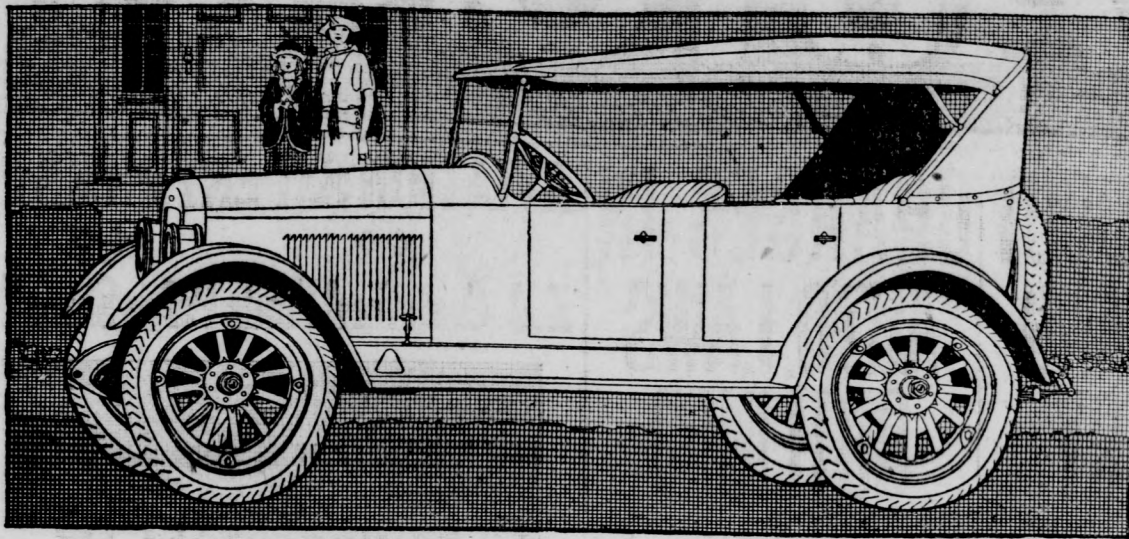

The body is the design of Brunn & Company, Buffalo, N. Y., one of America's foremost body-builders. It is distinctive in appearance and presents the utmost in appointments and refinement. There has been only a very limited number of this type produced, which assures the purchaser something that is exclusive.

The car is finished in a beautiful cobalt blue color, unusually rich in lustre and tone and the interior combines elegance with luxurious comfort. Upholstering material is in the choicest of fabrics. Nothing has been overlooked in the matter of affording every convenience to the occupants.

The body is mounted on the standard 136 inch wheel base, eight-cylinder Lincoln chassis. No one can fully appreciate the true beauty of the Lincoln town car without seeing it. Arrangements can easily be made through the local agency for its showing to persons who are interested in quality cars and who desire something that is distinctively individual.

The Big New

Overland

RED BIRD \$750

America's First Low Priced English Type Car

Here is a new and brilliant American achievement in economical motoring—the big new Overland Red Bird.

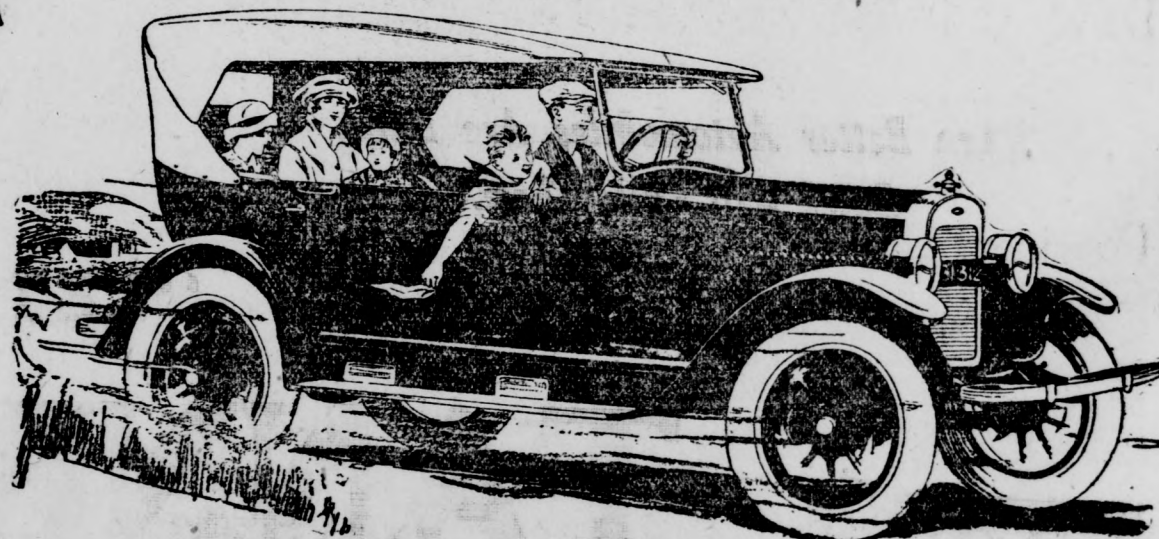

A new delight to the eye! A new thrill to drive! A joy to ride in! A revelation in economy! Reflecting unmistakably the vast experience and resourcefulness of the great Willys-Overland organization.

A creation in rich, gleaming Mandalay Maroon, topped in khaki.

See the Willys-Overland Advertisement in the Saturday Evening Post

A larger, more powerful engine. A much longer wheelbase, a roomier body, and the fleet lines of a revenue cutter. Glistening nicked radiator, head-lamp rims, windshield stanchions, scuff plates, door handles and back curtain frame. First quality Fisk cord tires. A windshield wiper, bumpers both front and rear—everything!

Examine the new Overland Red Bird in our show room.

Average Car Owner's Resources Shown

The average purchaser of automobiles in classes above that which are called the popular price class has a net equity in real estate of \$4286.08. He has also a net equity in personal property of \$2079.38. His average monthly income is \$349.70.

These figures, according to the Miller Rubber company were determined from statistics of acceptance corporations.

An interesting feature is that the average purchaser in this class spends \$1361.96 for his car, on which he pays down \$698.31. He agrees to pay the balance of \$663.65 in monthly installments of \$95.60. This average buyer is 34 years old.

These statistics show that 74 per cent are married, 82 per cent have bank accounts, and that 69 per cent carry life insurance.

FINE SPEEDERS \$1 MILE

Speeders in Akron, Ohio, are fined \$1 for each mile beyond the twenty-mile speed limit, their machines being timed by the arresting officers. When arrested within a school district, the speeder's fine is doubled.

News want ads produce results.

Thorough Inspection Car's Essential Need

To be sure that a car will give dependable service, it should be inspected thoroughly at least once a week. This inspection should include: Seeing that the tires are inflated to the prescribed pressure; inspecting the steering apparatus to make sure that all connections are tight; testing the battery, and filling with distilled water. In addition be sure that the car has the proper amount of oil in the crank case, and that the cooling system is filled with water. The instructions for lubrication should be followed very carefully, as the efficient performance and the life of the whole machine depends upon proper oiling and greasing more than on any other one thing.

LIGHT ADJUSTMENTS

A good automobile headlight will throw most of its light on the road when properly adjusted. The road will be brightly lighted for several hundred feet. At the same time, there will be a sharp cutoff line at the level of the lights and above the level there will not be sufficient glare to dazzle a driver approaching from the opposite direction.

Right Alignment of Wheels Saves Tires

Careful attention to proper wheel alignment will save the motorist many dollars in extra tire service. Tires on the wheels that are out of alignment do not revolve straight forward as they should, but slide over the ground diagonally. The sideways motion grinds rubber from the tread, and the effect is the same as if the tire were held against the side of a grindstone and turned so as to grind down the tread on the entire circumference. A toe-in of a quarter of an inch should be allowed on the front wheel. This is to neutralize their tendency to spread while in motion. The true running qualities of each wheel can be determined by placing a stationary point close to the wood fellow of the wheel; the place between the point and the fellow should be uniform when the wheel is revolving. Otherwise it is out of alignment. The result of wheel misalignment can usually be detected by the appearance of the tread, which is worn down on one side and shows a sharp shoulder.

Electrical connections should never be screwed down with the fingers as a tight joint cannot be made.

NEW PHAETON IS AUTOIST'S DREAM

Rickenbacker's Beauty and Power Appeal Strongly To Purchasers

The new Rickenbacker Phaeton touring car that A. M. Shoffner, local agent, 120 South Maryland street, is demonstrating at present is a car that a prospect naturally falls in love with the first time he takes a ride in it, for the ease with which it takes the grades, sways around corners without any noticeable sideways freedom from vibration, and the way it irons out the roughest spots in the roads and goes sailing over them as if they did not exist, endears it to every lover of good cars; the ease with which it attracts the notice of traffic officers speaks volumes for its speed.

The two fly-wheels that form part of the motor do away with vibration at every speed, and riding in the new phaeton comes as near fulfilling the motorist's dream of a perfect car as is possible in this imperfect world. The car comes equipped with everything needed for motoring comfort, windshield wiper, disc wheels, special permanent top, and a lot of other extras that enhance the value of the machine to a point where it stands out as one of the distinct sensations of the market today, according to experts, while the ability demonstrated under every kind of driving circumstances shows a power that is usually only associated with cars selling at much higher prices.

VALUES IN USED CARS EXPLAINED

Safety Surrounds Purchase Of Traded-In Autos From Dealers

"It's a rather big undertaking to explain just why or when an automobile becomes a used car," remarked Lyman P. Clark, of the Glendale Motor Car Co., 124 West Colorado street, who is now conducting a three-days' sale of used cars.

"For instance, suppose a man owns a new car, drives it a few thousand miles and then decides that he wants a larger car, or an enclosed car or a smaller car, and trades it in. This fellow's car is comparatively new up to the last day he owns it, but the next day the same car with the same engine, tires and roadability becomes a used car when it is offered for sale by the dealer.

"An interesting indication of the evolution of automobile merchandising is reflected in the fact that today every element of safety surrounds the purchase of good used automobiles from established dealers," asserted Mr. Clark. "The used car is just as much a part of the stock of the auto dealer as his new cars, his tires, accessories or parts. A large percentage of new car sales involve the acceptance of good used cars, and in many cases dealers overhaul the cars and in any event make certain that they will deliver satisfactory transportation to the buyers.

"Aside from the ability of the good used car to deliver thousands of miles of travel, the best inducement the established dealer can offer the prospective buyer of a used car is perfect contentment with his investment, for he looks forward to the time when this customer may wish to buy another car."

Official Road Book For 1923 Now Out

Motorists who are planning vacation tours during the summer months will be pleased to know that the 1923 Associated Tours Guide, the official road book compiled and published by The Automobile Club of America, is now ready for distribution.

By following the carefully selected itineraries and clearly defined road maps with which the Guide's 104 pages are filled, summer vacationists are enabled to tour by motor through the most charming sections of the eastern United States and Canada to sea-side, mountain and country resorts. All tours in the Guide are compiled with a view to scenic charm; the roads mapped are the best stretches of hard highway that the country affords.

For transcontinental motor tourists there is a double page Atlantic to Pacific road map showing the several routes across the United States, accompanied by complete itineraries for this increasingly popular trip. For those visiting the New England country there is a map of the recently adopted road-marking system. A large folding map of the entire country east of Chicago accompanies the Guide.

A feature of the Associated Tours Guide that motorists particularly appreciate is that the itineraries are arranged to allow for logical stopping places at the end of each day's run at towns where accommodations may be readily secured. Synopses of state motor laws, ferry schedules, and lists of good hotels and garages also are included in the Guide's usefulness to the automobilist.

MUCH HIGHWAY WORK

More than \$180,000,000 will be spent this year on making new highways or improving old ones in eight of the Central States—Illinois, Indiana, Kansas, Kentucky, Michigan, Missouri, Oklahoma and Texas.

AUTO DEALER IS FISHING EXPERT

C. L. Smith Answers to Call Of Mountain Streams to Lure Trout

This business of selling automobiles for a living is all right in its way, but there are times when a man engaged in this or any other line of business feels the cosmic urge to go ghost dancing off the business reservation and get away from anything that remotely resembles work and indulge in his favorite pastime.

A case in point is C. L. Smith, who, in his serious moments, sells Chevrolets at the corner of Colorado and Orange. In his lighter moments, however, when the spring fever sends his pulse up above normal, or when he feels tired, or when the notion strikes him, C. L. Smith will turn the place over to his staff, load the family and himself into the car along with an assorted load of fishing tackle and hit for the streams where, experience has told him, he may wet a line with a happy combination of pleasure and profit.

Back in the San Bernardino mountains, on Little Bear Lake, Mr. and Mrs. Smith have a little cabin that makes an excellent place to hang out while they spend the days fishing for the rainbow trout that seem to find a special affinity in the lures that dangle at the end of the Smith lines or in the flies that drop so lightly and naturally over the ripples as the light bamboo rod drives the long line over the places where the big ones are lazily awaiting what the gods may bring them.

Last week Mr. and Mrs. Smith made a trip to their mountain cabin, and when they returned to Glendale their creels were bulging with the limit of speckled beauties that were distributed among several of their friends, among whom a number of the Evening News advertising and news force were included.

Mr. Smith was the first man to bring the golden trout from Mount Whitney to Los Angeles, a species of game fish that is only found at Mount Whitney and in Italy, he asserts, and he dreams of the day when he will go back to Mount Whitney again and kill a monster golden trout, which he intends to have mounted and hung in the dining room, both as a tribute to his prowess with the rod, and as a starting point for the fishing stories with which the Smith repertoire is replete.

PREDICTS RISE IN AUTO PRICES

Advance In Material Costs To Be Reflected In Cars, Is Claim

Prospective automobile purchasers are urged to get their orders in at once, if they expect to buy at present prices and avoid having to pay the stiff advance in price that is bound to come within a short time, says Robert L. Conover, sales manager of the Packer Auto Company, 245 South Brand, Studebaker distributors, in a discussion of the present trend of prices in the motor industry.

Manufacturers are facing the necessity of making new contracts for all classes of materials, and costs have jumped from eleven to thirty-three and one-third per cent since they last bought, he declares. This means that the advance must be passed on to the buyer, and it is the part of wisdom for those who intend to buy a car at any time within the next few months to place their orders immediately.

Another point on which he lays stress is that every automobile on the market offers more value for every dollar invested in it than has ever before been the case in the history of the industry.

The realization of the present conditions in the business, on the part of motorists is sending Studebaker sales for this month far ahead of those of any other month in the firm's history, and he predicts that the Packer Auto Company will establish a record in June that will stand for some time.

The demand is spread over all models, with the Six Six having a special call, while the Special Six also has a large number of devotees who are placing orders. The stock of Light Sixes that the firm has in storage at this time permits the buyer to take immediate delivery at today's low prices, on any model in the line.

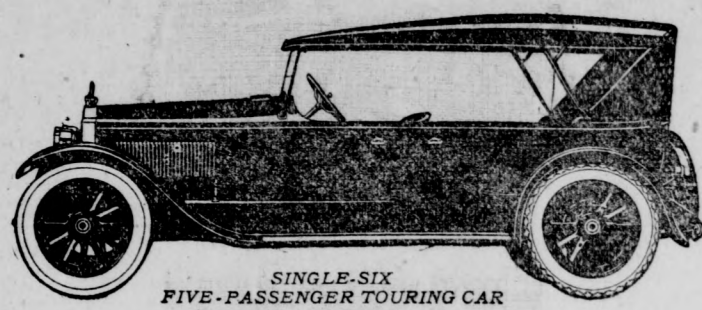

Ford Sets New Mark In Car Production

Moving steadily up to a 6700 car-a-day production, the Ford Motor Company on Monday, May 21, set a new daily record when 6,658 cars and trucks were completely assembled for domestic use, it is announced by the Ford News.

This new production mark exceeds by forty-three the best previous day, which was May 9, with its record of 6,615. Since the first of the year all the vast resources of the Ford Motor Company have been utilized to keep production on a continually increasing schedule, but orders all along have been far in excess of the output and continue to be, even under the present record-breaking output.

JUST A PRECAUTION

Never allow the pipe leading to the gasoline tank to rub against any part of the mechanism.

SINGLE-SIX
FIVE-PASSENGER TOURING CAR
\$2485 at Detroit

There is only one way accurately to characterize the Single-Six.

To say it is a Packard immediately places it in that exclusive class of cars from which the superlative kind of motoring is expected as a matter of course.

The Single-Six is entitled to this classification because it directly inherits all those qualities that make the name Packard the accepted measure of character in the fine car field.

STANDARD OF THE WORLD

In 1914, Cadillac dedicated itself to the policy of building motor cars equipped with V-Type 90° eight-cylinder engines which would be Standard of the World.

Since that time, this company has produced more than 150,000 V-Type eight-cylinder engines and not one of

these engines has ever been returned to the factory for any reason.

Moreover, in recognition of the supremacy of the V-Type eight-cylinder principle, and of Cadillac's position as its leading exponent, more people purchase Type 61 than all other cars combined in or above its price group.

NEW AUTO LAWS TO RAISE MONEY

About \$15,000,000 Will Be
Derived, According to
Official Estimate

(Continued from page 1)
tions and maintenance of county roads, bridges and culverts.
The "California Vehicle Act," No. 743, which will become effective January 1, 1924, substitutes for the present inequitable horsepower tax a flat registration fee of \$3. For all vehicles except those operated by public service corporations, the federal government and officers of foreign governments exempt under the state constitution.

In addition, electric passenger vehicles must pay \$10; and commercial electric vehicles used to transport passengers for hire or property, \$50. Commercial gas-line driven vehicles not equipped with pneumatic tires will pay in addition to the \$3 registration fee, a weight tax as follows:

Under 3000 pounds unladen, \$10; between 3000 and 6000 pounds, \$20; between 6000 and 10,000 pounds, \$30; and over 10,000 pounds, \$40.

Commercial vehicles equipped with pneumatic tires will pay one-half these fees under the same weight schedule. Motorcycles will pay \$3 as will trailers. The latter, however, if used for the transportation of passengers for hire or property will pay in addition the weight tax.

Change in Law
Light camping semi-trailers are exempted. Chauffeurs will pay a registration fee of \$2 for license and badge. A fee of \$1 for the transfer of a motor vehicle, trailer or semi-trailer is provided, and charges of 50 cents, 25 cents and \$1 each will be made by the department for furnishing respective duplicate registration certificates, containers or plates. Fees are doubled if not paid when due and become a lien on the vehicle which is subject to seizure and sale. Important changes in the new law follows:

Speed traps are eliminated and traffic officers required to patrol the highways in uniform.

The present provision requiring a 30-mile maximum speed limit under certain conditions is eliminated and the maximum limit made 35 miles per hour except in business and residential districts where the limits are placed at 15 and 20 miles per hour, respectively. A 15-mile limit is also required at crossings, curves and while passing schools. Police and fire departments, ambulances and vehicles operated by physicians in response to emergency calls are exempted.

The maximum weight of vehicle and load on state and county improved roads is fixed at 22,000 pounds on vehicles equipped with cushion tires; and 24,000 pounds on vehicles of six and eight wheels. Equipment now registered and weighing in excess of 22,000 pounds is limited to 24,000 pounds until December 31, 1926, when such equipment will be prohibited.

New Headlight Rules
The supervisors have the power to reduce the 22,000 pound limit on dirt or unimproved roads and to temporarily reduce the limit on improved country roads where such roads will be destroyed unless such action is taken. It is provided, however, that repairs to such roads must be started within ninety days and continuously prosecuted. The State Highway commission will make final decision where reduction of the limit by the supervisors is protested. Both the state and counties are given power to increase the maximum limits which do not affect incorporated cities or a city and county.

All vehicles are limited to one trailer, except a tractor, which may be operated with a semi-trailer not exceeding in total length sixty feet.

New standards for headlights are created by the new act. The standards conform to those required by the so-called eight-point test. Present equipment is exempted until December 31, 1924, although the Motor Vehicle Department is given authority to stop the sale of devices failing to conform to the new standards.

Sirens are prohibited on all vehicles except those operated by police and fire departments, fire wagons and ambulances.

Rear lights must be displayed on all standing vehicles except in residential or business districts where street lights render visible substantial objects for a distance of 200 feet.

Auto Industry Leads All Others in Value

The Department of Commerce at Washington has compiled figures, according to the Miller Ruber Company, which show the automotive industry has hopelessly outclassed all other industries in dollar value. Following are the figures:

Automotive industry	\$2,825,000,000
Petroleum	2,050,000,000
Meat packing	1,935,000,000
Foundry	1,300,000,000
Lumber and timber	1,275,000,000
Iron and steel	1,250,000,000
Clothing	1,230,000,000
Flour mills	1,275,000,000
Cotton goods	1,250,000,000
Boots and shoes	1,100,000,000

These figures are based on the dollar value of production for 1922.

ZERO MILESTONE

Just south of the White House, in Washington, D. C., on the ellipse of Potomac park stands the "zero mile-stone." From this point is measured the distance along the national highways of the United States. This mile-stone is of white marble, and on top is a bronze sun-dial.

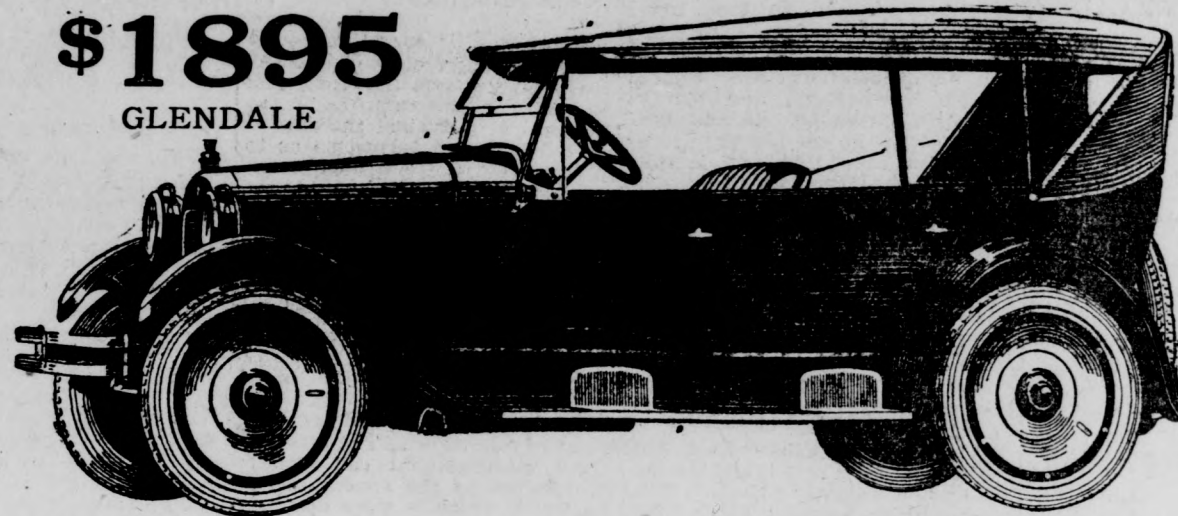

RULING ON INSURANCE

The appellate division of the Supreme court in Brooklyn, N. Y., has handed down a decision which holds that insurance companies must pay for wear and tear on motor cars while the automobiles are in the hands of thieves.

The New Phaeton REO

\$1895

GLENDALE

Beauty, Endurance and Economy—Form a Triple Alliance

BEAUTY of design, perfection of finish and mechanical excellence are combined in this phaeton Reo, built upon the famous Reo-Six chassis and powered with that perfectly balanced sweet running six cylinder motor.

GRACEFULLY proportioned is the softly curved low hung body with clean, straight lines.

ARMED chair comfort is delivered by the liberally dimensioned, form-fitting seats and backs. Covering them is gray hand buffed leather of Dualtone finish.

PROVING that beauty is more than body deep is the Reo double-framed chassis, with the power units so suspended in the inner-frame as to foil the ravages of road shocks.

SPIRITED and rugged is the 50 h. p. engine. With ground cylinders, large ports, 4 bearing crank-shaft, intake valves in head—it is motordom's most enduring "Six."

Stolen Auto Total Shows Big Increase

(Continued from page 1)
in twenty-four hours, to the police, the renting of same. In this way it is hoped to curb the activities of the car thieves, who have been found to be making a practice of hiding stolen cars in private garages.

May Be Body Blow
The other provision in the new law, believed to be a body blow to the auto pirates, is one providing that owners of public garages must keep accurate and complete records of those cars stored in their places of business, thus making it more difficult for thieves to utilize public garages in which to hide stolen cars.

Gradually, officials say, the protective net is being drawn closer about the \$1,000,000,000 California automobile investment, safeguarding them from the raids of the bold and crafty marauders, so that while the number of stolen cars continues to mount, the total of recoveries mounts likewise.

With the anti-theft provisions of the new law well under way, another three months is expected to show a sharp decline of thefts and corresponding rise of recoveries, officials of the Automobile Club and the police department feel.

(Continued from page 1)
picnickers will be barred from entrance to the forest reserve. Forest reserve officials have notified the auto club that every possible effort is being made this year to prevent destructive conflagrations in the hills and mountains and there will be no fooling with the situation at all. Watch your step and your "smokes" in the forest playgrounds this summer!

STUDEBAKER
LIGHT-SIX
TOURING CAR
\$1190

More Cars Shake Themselves to Pieces Than Ever Wear Out

Charge that up to vibration.

Vibration causes cars to grow old prematurely by racking their chassis, destroying the "metal life" of vital parts, loosening up their bodies and causing squeaks and rattles. Frequent, costly repairs are the result.

The Studebaker Light-Six is freer from vibration than any car of its approximate size or weight yet produced.

This has been accomplished largely by a complete machining of the crankshaft and connecting rods on all surfaces—a practice used by Studebaker exclusively on cars at this price and found only on a very few other cars whose selling prices are from three to ten times as high as the Light-Six.

There are 61 precision operations in the manufacture of the crankshaft alone, 40 of which range in accuracy

from one-quarter thousandth to one thousandth of an inch.

The Light-Six motor embodies the most advanced design known to automobile construction. And no chassis at any price is built to more exacting standards of materials and workmanship.

Aside from its mechanical excellence and its consequent long life, the Light-Six is handsome in design, extremely comfortable, sturdy, and we believe the most economical car to buy and operate ever offered at \$1190 or anywhere near this figure.

Its substantial all-steel body, one-piece, rain-proof windshield, ten-inch cushions upholstered in genuine leather, cowl lamps—these are among many features heretofore to be had only in higher-priced cars.

For 71 years the name Studebaker has stood for integrity, quality and value.

BENNY LEONARD DONE, IS BELIEF

Showing in Mitchell Fight Shows Champ's Best Days Are Past

By DAVIS J. WALSH
For International News Service
NEW YORK, June 9.—Broadway and its habitues have turned thumbs down on Benny Leonard, esteemed lightweight champion following his rather dubious performance against Pinky Mitchell and the subsequent testimony of men who witnessed the affair. Leonard, they aver, is absolutely through and they declare the first contender, with a punch, will "take" him like a suicide takes poison.

This is an old story that has been exhumed many times in the last several years, yet the existing reports have a very plausible ring. For example, Pal Moore, the bantamweight, declares Leonard boxed like a wooden man against Mitchell, and would have been easy for Charlie White or Lew Tendler on the night in question. Pal's opinion, obviously is sincere and entirely disinterested.

Reviews of the fight, written by A. J. Schinner, Ben E. Smith, Sam Levy and other western fight experts, agree that Mitchell acted the part of the champion and Leonard the confirmed second runner. Leonard, they said, was so badly out-boxed that he confined all of his attention to trying for a one-punch knockout. This tendency usually is the hall mark of the losing fighter.

The seemingly permanent retrogression in Leonard is his loss of speed. Gone is the dazzling footwork, the change of pace and the ability to feint an opponent silly. Instead, he now stands back on his flat feet and places all reliance in his punch. The change in style has brought Leonard, a great champion, down to the level of many challengers and the punishment he has taken during the last seventeen months is hardly comparable with his reputation.

Wants Depositions in Seattle Ball Club Suit

LOS ANGELES, June 9.—A petition asking that depositions be filed in the case of Charles Lockard and Wade Kilgiver of the Seattle ball club against the Pacific coast league, in an effort to seat Lockard as a director of the league, was filed in federal court Friday.

William H. McCarthy, as president of the league, petitioned that the depositions of officials of the Western Union, Postal and Federal Telegraph companies, J. H. Patrick, Charles Lockard, Wade Kilgiver, William Wrigley, Jr., and John Doe Kilgiver be taken.

Philadelphia Tennis Team Beats Boston

NEW YORK, June 9.—Philadelphia's first team defeated the Boston teams in the sixth annual inter-city tennis championship matches for the Church cup at Forest Hills Friday.

Big League Recruits

WILLIE KAMM
WHITE SOX'S \$100,000 ROOKIE
WHO HAS PROVED HIS WORTH

Here's the highest priced piece of baseball bric-a-brac on record. Willie Kamm by name. The Chicago White Sox paid, in press agent figures, \$100,000 for him.

How much real dough he actually cost doesn't make much difference, for Kamm has proved himself to be a real star, one of the best third basemen to come up into the big leagues since the game began.

Kamm is so fast he can almost throw out his own shadow. He is a greedy fielder, often forcing the shortstop away over within ten feet of second base. The perfect way in which he handles fast grounders is uncanny, and one of his best accomplishments is get-

ting the ball away fast and true as soon as he gets hold of it. All this he does in a sort of mechanical fashion, but he is also a brainy player.

John McGraw had this to say about Kamm the first game he saw him play: "The finished way in which he goes about his work—the loose, easy manner in which he handles the ball and shifts about—indicate he is the adept fielder that reports claimed he was."

Last season he batted .342, scored 137 runs, made 222 hits, twenty of which were homers, and fifty-six two-baggers, stole thirty-five bases, threw out 432 runners and fielded for an average of .959. Kamm is also a great golfer.

By Wood Cowan

SPORTS CHATTER By BILL UNMACK PACIFIC SPORTS SERVICE

The report that Stanford University will pair up with Princeton in tennis and play in England against the combined Oxford-Cambridge forces is eloquent of the fact that space is being annihilated. Stanford on the rim of the Pacific and Princeton on the Atlantic seaboard are a far cry from each other, but the tendency nowadays is all toward a drawing together of the young men of the nation which will make for a better understanding and a better feeling.

T. Harry Smith, secretary of the Sequoyah club of San Francisco, has some mighty interesting observations to make as to what he thinks will be the status of golf in this county fifty years from now.

Here is what he says: "Two million men and women in the United States today are playing golf, where twenty-five years ago not a thousand thus sported themselves. In another fifty years, by the same ratio, half the population will be golfing."

The majority of golfers of today did not take up the game until they had passed their youth, and most of them have never been able to acquire the grace and rhythm of the natural swing which may come to the boy or girl almost by spontaneous imitation. "In another fifty years practi-

cally every lad and lassie will assimilate the golf swing as part of elementary education. The girl will find it quite as necessary to be able to swing a club as to know how to dance; the boy will be as interested in golfing as in swimming."

"In the development of suburban settlements, which with automobiles and airplanes will grow more and more popular, golf courses will be laid out between men's homes and their places of daily work."

William Wrigley, baseball magnate, will have to do considerable more explaining before he will be left alone by President William H. McCarthy of the Pacific Coast Baseball League. If Wrigley is guilty of financing the Seattle deal he has violated the fundamentals of professional baseball necessary to keep it on a clean basis. If two teams are owned by the same man, it is evident that the fans, who are the supporters of baseball, will see teams in action that will play indifferent baseball. McCarthy is a fighter and he has the support of the public, who know him as a square shooter. He will not brook any evasion.

North Manchuria has about 11,000,000 sheep, 5,000,000 cattle and 3,500,000 horses.

Late Federal Report On Fishing, Road Conditions In Southern California

Here is the latest bulletin on fishing and road condition in Southern California, just issued by the Forest Service, United States Department of Agriculture:

Department of Hemet via Idyllwild and Keen Camp—Open and good. Camp grounds open at Fuller Mill and Pine Flats.

Lake Hemet, Strawberry, North Fork, South Fork, Fuller Mill and Dary Canyon Creeks—water high and clear; fly fishing; other bait not good.

Laguna Mt. Road—State Highway to Laguna Area—Open and good; camp grounds open at Laguna Area, Cuyamaca and Morena Lakes, Boulder Creek, Cedar and Pine Creeks—poor; water clear; bait, fly and salmon eggs.

101-Mile Drive, San Bernardino to Big Bear Valley—Open to Green Valley; closed beyond, as road is soft with some snow; autos can get through, but inadvisable. All camp grounds open.

Deep and Bear Creeks, Arrowhead Lake—water high, clear; bait, worms.

Mill Creek Road, Redlands to Big Bear Valley—Open and fair; short detours on account of paving, and road rough on Clark grade. All camp grounds open.

Santa Ana River, Mill Creek and Big Bear Lake—high and clear; bait, worms.

Desert Road, Victorville to Big Bear Valley—Open and good. All camp grounds open.

Holcomb Creek and Big Bear Lake—high and clear; bait, worms.

San Marcos Pass, Santa Barbara to Los Olivos via Santa Inez—Closed over pass on account of paving; detour via Gavito Pass. Camp grounds open on Santa Ynez River and Paradise Camp.

Sospe and Santa Ynez Rivers—clear and medium high; bait, salmon eggs.

Big Sur Road, Monterey to Big Sur—Open and fair.

Big and Little Sur Rivers—water medium and clear.

Bouquet Canyon Route, Saugus to Elizabeth Lake—Open year round; rough in Bouquet Canyon, balance fair; some repairing to be done soon.

Bouquet Canyon and Elizabeth Lake; low and clear; fishing poor as a rule; bait, salmon eggs and flies.

Sanger to General Grant Park and Hume—Open and good. Camp grounds open at Big Stump, General Grant Park and Millwood.

Orange Cove to General Grant Park—Open and good.

EAST SIDE OF SIERRAS
El Camino Sierra, Indian Wells to Lone Pine—Open and good. Numerous good camping places available.

McGee, Convict and Rock Creeks, Owens River, Convict Lake—water low, clear; bait, flies, salmon eggs, worms.

El Camino Sierra, Mono Lake and Minden—Open and good. Camp grounds open at Chris Flat and Leevining.

Water high and muddy.
Minden to Meyers via Woodfords—Open and good between Minden and Woodfords; closed beyond on account of snow.

Walker Pass Road, Bakersfield to Indian Wells via Caliente and Isabella—Open and good.

Midland Trail, Big Pine to Goldfield—Open and good. No regular camp grounds; no fishing.

Kings Canyon Grade, Carson City to Meyers—Open and good.

The WORLD OVER By FRANKLIN B. MORSE PACIFIC SPORTS SERVICE

One of the clauses of the California state boxing law which proponents of the game hoping for a return of the sport have inserted, is that which prohibits any matches being pulled on Memorial Day. This is likely to win it many friends who have some regard for the sentimental side. The day is a more or less hallowed one, consecrated to the nation's dead, and the hollering audience that is usually at a ring-side does not fit into the scheme of things.

The same might be said of other sports, but there is a difference between a fight crowd and almost any other crowd that attends other lines of sport. A track meet, tennis or swimming meet or any similar sport does not work on the audience as does a prize fight. It does not seem any disrespect to the dead to conduct seemly sports.

They were young men in the full vigor of life when cut down, and as a matter of fact, the sports mentioned seem in keeping.

The failure of Stanislaus Zhysko, the heavyweight Polish wrestler, to throw Jake Brissler of Iowa in seventy-five minutes, the terms being that the Pole should throw the Iowa twice in that time, has suddenly raised the stock of the latter and he is likely to be in demand in the future, at least until he commences to flounder. To stay for seventy-five minutes before the Pole is considerably of a feat, as he is considered among the best of the few heavyweights now before the public.

According to the dispatches from Shelby, Jack Dempsey, when not knocking out his sparring partners, is spending considerable time with the rod and reel. At all events, while Mr. Kearns, his manager, states that Gibbons will be the toughest bird the champion has tackled, there seems to be nothing on the said champion's mind except his marcel waves. Evidently Kearns hasn't impressed his protegee with this line of talk any more than he has the general public.

Cornelius McGillicuddy, better known as Connie Mack, manager of the Philadelphia Athletics, has his club standing in second place in the American league race, something that has not happened in many a moon. It is a long time since Connie was rating his club among the champions, and it may be that he is beginning to make something in the nature of a comeback. At that he is nearly 200 points behind the leading and flying Yankees.

Gibbons Hiking Over Roads About Shelby
SHELBY, Mont., June 9.—No boxing will be done by Tom Gibbons before Sunday in his coming preparation for the greatest battle of his career—with World's Heavyweight Champion Jack Dempsey here on July 4. The St. Paul challenger declared today he is taking it easy and viewing the sights around Shelby.

A great deal of road work is being taken by the big Minnesotan. A 16 mile hike was one of his stunts and today he planned to do practically the same amount of road pounding.

Ticket sales continue good, according to Promoters Collins and Molmby. An additional order from New York for 200 today brought the quota for the metropolis to 400.

SALES OF BUICK AUTOS CLIMBING

Every Month This Year Shows Advance Over Total of Month Before

Record after record in Buick sales has been tumbling with a monotonous regularity, in the sales department of Tanager & Hall, Ltd., 237 South Brand boulevard, until it has become an accepted fact around the firm that every month of the present year must pass the totals hung up by the salesmen during the preceding month.

Figures assembled by Ray L. Galvin, sales manager, show that the last five months have been just a series of progressive steps, with each month passing the month before by a margin that shows beyond any question that Buicks are not only maintaining their hold on the affections of the motoring public but that they are steadily growing in popularity. This is the only conclusion, he declares, that any person can reach in view of the Buick figures.

"Good salesmanship will sell any car," he says, "especially when it looks good and shows up well at first, but no car that won't stand the gaff, year in and year out, over all kinds of roads, in all kinds of weather and at the hands of good, bad and indifferent drivers, can keep its hold on the people who ride automobiles. The average owner of a Buick is a man of comparatively modest means.

TEACH MANAGERS TO SUIT OWNERS

Service Men Must Learn to Satisfy Motorists, This Official Claims

That motor car dealers' service managers should be educated to day more along the line of good merchandising maintenance practices to the end that car owners will be better satisfied with both the service itself and the cost of service, was the gist of an address made by R. A. Armstrong, service manager of the Oakland Motor Car Company, at the recent service managers' convention of the National Automobile Chamber of Commerce in Detroit.

"We have been educating our although there are men of wealth who choose the Buick in preference to more expensive cars because they know the worth that is built into it and the stylish appearance that it possesses distinguish it in any assembly of automobiles, but the man of modest means must have a car that will deliver the goods and do it at low upkeep and operating cost, under any and every condition," Mr. Galvin insists.

"The explanation of the success of the Buick cars, not only in this agency but in every agency in the United States, is expressed in concise form in the Buick slogan. 'When better automobiles are built, Buick will build them.' 'That's the answer.'"

Lubrication of Every Part Is Necessary

Study your lubrication chart thoroughly and locate every part shown. Then see that each part gets the attention required by the manufacturer. If any part runs dry it cuts down the efficiency of the car, the part wears and becomes noisy, and may even seize and break.

When Caesar began his reform of the calendar June had only 29 days and he added the thirtieth.

dealers on the most economical manner of merchandising maintenance on cars," stated Mr. Armstrong, "because we feel that the stress today should be placed on this end of service maintenance. This work of course is supplementary to the educational work carried on to develop better mechanics and to acquaint them with all methods that will enable them to perform more efficiently and economically every repair job."

"Today throughout the country at our main distributing points, dealers are meeting our factory service representatives who conduct schools covering the product from a mechanical standpoint and good business methods. The flat rate system, now almost universal with the stronger companies, is an indication of how maintenance service is being merchandised. Efficient service economically as well as thoroughly and the cutting of overhead to a minimum are what the progressive dealers are stressing today. The car owner benefits mainly through such a policy and this benefit in turn is reflected back to the dealer and factory."

The STAR The Big Surprise of the Yosemite Economy Run

A year ago—unknown. Today—the most talked-of car in America and the one BIG SURPRISE of the Camp Curry, Yosemite Valley Economy Run by winning second place. In its first entrance into an economy event it threw a bombshell into the camp of the Economy Champions.

It was a Victory for the Star. It so closely approached the mark of the car which for four years had held the record for the run—only 48-100 of a ton mile separated them—that, even though defeated, a wonderful victory had been won.

A new contender has arisen in the fold. What it has taken its competitors years to do the Star has accomplished in its first attempt.

Not only has the economy of the Star been definitely established, but a mechanical victory has been gained. The Star went through the hard grind with never an adjustment—it made a perfect mechanical score.

Think of it! 34.29 Miles on a Gallon of Gasoline—consider that the Star was the lowest priced car in the run—then you can figure ECONOMY of Transportation.

The Star which was entered in this event was a strictly stock car—and was one of the first shipment which we received from the factory at Oakland. It has been driven more than 8,000 miles since its arrival here.

TODAY—Pennsylvania booze ruling; a burglar really reformed; a millionaire monkey.

MONDAY—Should Students Marry? Ohio colleges differ, by William J. Huske, Cleveland, Ohio.

By PAUL H. EGOLF
For International News Service

PHILADELPHIA, June 9.—has now taken to hoarding his surplus wealth in his mouth. Monkey jowls have great capacity, but even this is being taxed. Recently his keepers decided that this method might lead to his choking to death if a coin slipped down his throat, so all future income has been classed as "excess profits" subject to confiscation.

And now, as the shining nickels and pennies are taken away, Uncle Mutt to himself and croons a monkish complaint to those he already has as he trickles them through his paws.

The Pennsylvania Railroad recently succeeded in repainting the train cars of Brand street station in record time by a novel system. The "straight and narrow" and begin life all over again. As the result of his resolution he has materially aided the police in recovering more than \$7,000 worth of the stolen articles.

Judge Monaghan, who postponed a fifteen-year sentence imposed on Kasinoff in order that the reformed burglar might continue to aid the police until all the goods can be found, has expressed his intention of reconsidering the sentence in view of Kasinoff's apparent sincerity of repentance.

Meet "Uncle" Russell, the "millionaire monkey" of the Philadelphia Zoo, grand collector of Simian Simoleons and dean of monkey business. "Uncle" is famous for his skill in winning coins from visitors to the zoo and his ways of hiding his treasure. Also he has a collection of odds and ends that rivals any second hand shop. One of his treasures is a sling shot, his experiments with this weapon causing the keepers no small amount of concern. But now it seems that Uncle's days of prosperity are coming to a close, for his income has reached such proportions that he will have to pay an income tax to the zoo government.

The cause of his drastic bit of monkeydom legislation was that having filled every available bag, nook and cranny with shining nickels and pennies, Uncle Russell

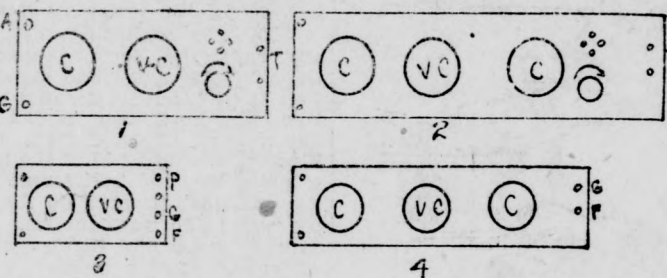

RADIO

BY FRANK CHAPMAN

HINTS ON MOUNTING YOUR SET

During the last year there has developed the need for a "radio doctor," and in summing up investigations as to failure of some sets to function properly, it has been found it was due to improperly constructed panel sets as well as poor connections. The design of simple panel sets will be taken up now.

Figure 1 shows a layout for the popular single-circuit regenerative set, which the majority of radio fans own. It is a panel 6x10 inches and contains the entire equipment minus the batteries, and where the base is deep enough they could be placed inside the cabinet, too. The aerial and ground binding posts are shown on the left, the aerial being at the

top and the ground at the bottom. The two posts on the right are for the telephones. The battery binding posts should be placed on the base in the rear of the panel and not in front, as is usually done. The variable condenser is placed to the left, next comes the variocoupler and next the socket (on the base) and the filament rheostat on the panel. Holes bored so the tube can be shown completes this panel set. If it is placed in a cabinet it can be carried from place to place very easily.

Figure 2 shows a two-circuit layout of a non-regenerative set, consisting of two variable condensers and a variocoupler with an audion detector. The binding posts are arranged as in the previous panel arrangement, the difference being in the extra variable condenser, which is shunted across the rotor coil, which is used as the secondary instead of a tickler coil. In this layout we have a

variocoupler, then another condenser, and socket and rheostat as before. To make this set regenerative a variometer can be placed in the plate circuit and mounted to the right of the secondary variable condenser. This panel has dimensions of 6x15 inches.

Figure 3 shows a "tuner" minus the detector and is suggested for

those who desire to do experimenting with various hookups, either radio frequency or just different style of tuners. It consists of the popular single circuit regenerative tuner, consisting of variable condenser and variocoupler with six binding posts. The two left ones are the aerial and ground, while the two on the upper right are the ones going to the plate circuit of the vacuum tube. The two lower ones go to the grid and filament circuits. This can be placed on a panel 6x6 inches.

Figure 4 shows the two-circuit tuner layout, consisting of two variable condensers and a variocoupler. This is non-regenerative and is very good for trying out various hookups, such as radio

frequency and audio frequency, or a combination of both, to ascertain which is best suited for your individual requirements.

Where a tuner itself is mounted alone, the detector can be placed on a small panel or can be combined with audio frequency amplifying units. It is better to do the latter where you know you will put in amplification and in this way various types of tuners can be tested. As stated previously, it is a good plan to try out (if you can afford it) several hookups both the freak kind and standard types, because it is due to getting away from standard hookups that better ones are developed, and you may fall on one that is better than any others. It is in this way that such circuits as Flowell, Reinartz and others were developed.

Pointers

If you have been getting stations good and one night don't get them, don't pull your set apart, as it might just have been a bad night.

In putting up a pole for your aerial, put a pulley on top of it so you can lower your aerial when you need it.

An audion that works on a dry cell can be used in the same circuit that the audions requiring storage batteries can.

Uncle Wiggily Bedtime Stories

BY HOWARD R. GARIS

UNCLE WIGGILY AND THE PEPPER

There was a chug-chugging puff-puffing sound outside the hollow stump bungalow one day and Mrs. Twisttail, the lady pig, who was calling on Nurse Jane Fuzzy Wuzzy, leaped from her chair in fright.

"My goodness," Nurse Jane, what's that noise?" grunted the lady pig.

"It is Uncle Wiggily starting out in his automobile," answered the muskrat lady housekeeper. "It makes quite a noise since he had new tires put on with a lot of air in them. And that reminds me—I must ask him to bring me some pepper from the store."

"Pepper—in this hot weather?" exclaimed Mrs. Twisttail, for, being rather a fat pig, she felt the heat more than did Nurse Jane Fuzzy Wuzzy.

"I am going to make a little pickle," explained Nurse Jane, "and that's why I want Uncle Wiggily to bring me some pepper. Excuse me a moment, Mrs. Twisttail."

Miss Fuzzy Wuzzy went out in the yard where Uncle Wiggily was leaning over looking at one of the big, round tires on his auto.

"What's the matter, did you get a puncture?" asked Nurse Jane.

"No, but I think one of my tires has too much air in, so I am letting a bit of the wind out," the bunny rabbit answered. With that he unscrewed the cover from the little hole where the air is put in auto tires and out rushed a lot of wind with a hissing sound, just as when you let the air out of your toy balloon.

"Now I'm all right and I'll go adventuring," sang Uncle Wiggily with a delightful little twinkle of his pink nose.

"Please bring me some pepper from the store," begged Nurse Jane, and Mr. Longears said he would do that little thing for her. Then the muskrat lady went back in the bungalow to entertain Mrs. Twisttail and Uncle Wiggily rode along in his automobile to get Nurse Jane's pepper and, at the same time, have an adventure if he could find one.

The old rabbit gentleman reached the pepper and salt store without anything having happened. He bought the pepper and, after he had put it in his auto once more, off he started.

"Ah, there ought to be an adventure here," thought Uncle Wiggily to himself, as he drove through a deep, dark, dismal wood. And, all of a sudden, he felt a sort of jiggle and shaking up behind him, as though something had dropped from a tree into his car.

Looking back he saw that just this had happened. Out of a tree the Blue Nosed Baboon had dropped down into the bunny's

ON THE SPUR OF THE MOMENT

HINTS FOR THE OUTING

As you will probably spend some time at the beaches you may find the following hints of use:

Never rescue a person from the water unless you are sure she is drowning. Otherwise she may be very angry.

Don't teach the same girl to swim more than ten times. If you feel yourself drowning

lay of fifteen seconds or more is necessary to catch the airplane to escape the force of the detonation and the flying fragments.

"Fragmentation bombs" are designed to wound or kill, and are particularly effective against massed bodies of troops, convoys and similar targets. They may also be used to supplement the demolition bombs in attacks on manufacturing plants. The detonation of our own newest fragmentation bomb produces about 800 flying fragments.

"Incendiary bombs" are meant to destroy by setting fire to buildings. One type produces a very hot and lasting flame at the point where it strikes. Another type scatters its contents over a large area. In an attack upon a munition plant demolition bombs would be dropped, followed by incendiary bombs, the object in view being to tear open the buildings and then burn them up.

Some incendiary bombs ignite shortly after being released from the airplane, and descending in flames, giving a meteor effect which is terrifying in the extreme.

Excavators have unearthed a theatre of the second century. It is understood the stage contained a bedroom set and one of the actors was found under the bed in a bathrobe.

SCIENCE and INVENTION

By Arthur Budd

BOMBING THE CITIES

In coming wars the destruction of cities by bombing from the air will be a most important feature

During the recent great conflict this country did not suffer from bombing raids, yet it is thought likely that if the war had lasted much longer, New York, Philadelphia and Boston would have been bombed. Even though our next enemy may be located far distant from us, we shall not escape bombing operations. Recent successful trans-Atlantic flights can be taken only as warnings of what may be expected in the future. Munition workers will have the opportunity of working literally under fire, and will be able to compare actual experiences with their own theories from the armies in the fields.

Army Ordnance, a semi-official publication, mentions the fact that bombs weighing as much as 4000 pounds have already been produced and says that the development of others of even greater size is contemplated. There appears to be no limit to the size of bombs, provided aircraft can be made large enough to carry and drop them.

The largest gravity projectiles of this kind are "demolition bombs," which are designed to carry as much explosive as possible for a given weight. They are meant to be used for destroying manufacturing plants, railroad terminals, and other large and substantial structures.

Such a bomb is provided with a fuse for delay action, so that it does not explode on the roof of a structure, but penetrates to the interior before going off, heretofore literally rending the building apart. When large bombs are dropped from low altitudes, a de-

struction of cities by bombing from the air will be a most important feature

struction of cities by bombing from the air will be a most important feature

During the recent great conflict this country did not suffer from bombing raids, yet it is thought likely that if the war had lasted much longer, New York, Philadelphia and Boston would have been bombed. Even though our next enemy may be located far distant from us, we shall not escape bombing operations. Recent successful trans-Atlantic flights can be taken only as warnings of what may be expected in the future. Munition workers will have the opportunity of working literally under fire, and will be able to compare actual experiences with their own theories from the armies in the fields.

Army Ordnance, a semi-official publication, mentions the fact that bombs weighing as much as 4000 pounds have already been produced and says that the development of others of even greater size is contemplated. There appears to be no limit to the size of bombs, provided aircraft can be made large enough to carry and drop them.

The largest gravity projectiles of this kind are "demolition bombs," which are designed to carry as much explosive as possible for a given weight. They are meant to be used for destroying manufacturing plants, railroad terminals, and other large and substantial structures.

Such a bomb is provided with a fuse for delay action, so that it does not explode on the roof of a structure, but penetrates to the interior before going off, heretofore literally rending the building apart. When large bombs are dropped from low altitudes, a de-

struction of cities by bombing from the air will be a most important feature

Woman's Page

Dreams and the Drama

TODAY'S SHORT STORY, BY
Ad Schuster

The company of actors traveled by wagon over the smooth roads of Surrey long before there were automobiles, booking agents or billboards. Lansing Wright, a young actor, sat on a pile of scenery, looking at the wet leaves which shone as tiny dancing mirrors under the newly revealed sun, and sat at peace with the world. He could be a great actor someday, he told himself, a figure in London. Then there would be no more of these one week stands in the country, no more of putting up at the small inns—nothing but the chance to act. All the time he was riding toward Wyndham and his fate.

In the third row of the theater at Mary Smith, demure and proper, the prettiest girl in Wyndham and, thought Lansing, in all of England. The young actor found himself speaking his lines for her. He was glad when he saw her approval. On the first night of the stay at Wyndham he left the stage in love with a girl to whom he had never spoken.

"Within six weeks," said Lansing Wright, as he struggled out of a medieval costume, "I will marry that girl." He repeated the declaration to himself and took courage in the repetition of the formula. The actor wondered if the girl would attend the next evening's performance and busied himself with renewing a boyhood acquaintance who might serve to perform the ceremony of an introduction.

That was how it was that after the show next evening Lansing Wright met Mary Smith, daughter of one of Wyndham's most prominent men, model of modesty, and the prettiest girl in the city. The youth wondered that he had fallen so deeply in love and so soon, and the girl was flattered by the attention of the young stranger who was not as were the young men of Wyndham. As this was but a part of Lansing's story, it is enough that he paid ardent court and Mary was an unwilling listener. Within two weeks they were married and Lansing had agreed to give up the stage.

Lansing and Mary live in America now with nothing to worry them except the lack of word from Lansing Wright, their grandfather. The younger Lansing had been different from the rest and perhaps that was the secret of the old man's hold upon the hearts of his grandchildren.

"I know he is all right," said Mary, "but one cannot help but wonder. If he would write to us, now, and say he was in need of money, we would help him, couldn't we?"

"No matter what he is doing, even if he is an actor," the old

"I never have a minute for leisure!" I heard a woman say the other day. She was a woman who does her own housework and finds it drudgery.

"Now, Reader Friends, I am not going to argue that doing one's housework is entirely a joyous occupation. For I know well that it is hard work. But—

I am going to argue that there is a bright side to housework—if we will but look for it. In the first place, the housewife has a home (a housewife which many people in this world lack). In the second place, she is sheltered from the hurts of an indifferent world; her sister, the business woman, must stand the petty irritations of office life (for where

DAILY FASHION HINT

Prepared Especially for The Glendale Evening News

SMARTLY IN FASHION
Adorably designed is this frock in Madeline blue crepe and lace. The yoke of the blouse is of lace, cut in one with the kimono sleeves. The front and back sections are joined to the yokes and a wide girdle gathered and closed at the front lends originality to the waist treatment. The skirt is laid in pleats either side of the front to gain a draped effect, the back and sides being gathered. Medium size requires three and one-half yards of thirty-six inch crepe and one and one-quarter yards all-over lace.

INTRIGUINGLY SIMPLE
This model flaunts its grace and distinction in fog gray faille silk. The short kimono sleeves are lengthened with deep cuffs which are slashed into narrow bands chiefly to exploit a lining of desert green crepe. A casing stitch underneath has an elastic inserted to regulate the fullness and give a blouse effect. The shirred panels at the sides extend below the lower edge of the dress. Medium size requires five and one-half yards of thirty-six-inch material.

Pictorial Review Dress No. 1293. Sizes, thirty-four to forty-eight inches bust. Price, 35 cents. Skirt, No. 1530. Sizes, twenty-four to thirty-four inches waist. Price 30 cents.

Side Talks by Ruth Cameron

AND SO IS ENVY
We are often reminded that sympathy is a friend's misfortune is a rare and beautiful quality. I am inclined to doubt if it is as rare as sympathy for a friend in his good fortune.

Some young people whom I know have recently built a most charming little house in a very pretty spot on the shore of a lake. When they bought the lot there were many comments from their friends.

Here are some of them:

Kind Friends Speak
Said one: "Yes, I know where it is. Isn't it pretty? I know someone who had friends who lived near there once, but they had to move out because there were so many bugs there." (It was afterwards discovered that the kind friend who made that much heavier burdens than being overworked. The heart's burdens are the only real ones. The rest are mere duties.)

So let us look on the bright side of our hard household tasks, and let us try to snatch a moment of rest from them now and then. Let us try to dominate them, instead of letting them dominate us. At least, let us not allow them to crush the happiness from our hearts. When looked at comparatively, household burdens are hardly burdens at all!

All inquiries addressed to Miss Kirkman in care of the "Efficient Housekeeping" department will be answered in these columns in their turn. This requires considerable time, however, owing to the great number received. So, if a personal or quicker reply is desired, a stamped and self-addressed envelope must be enclosed with the question. Be sure to use your full name, street number, and the name of your city and state.—The Editor.

BEAUTY CHATS

EDNA KENT FORBES

YOUNG MEN AND BEAUTY
"There was a young man who had curly hair"—so begins the story of a large bundle of letters now lying on my desk. I can't think why so many of the young men who have curly hair hate it, but they seem to—those who don't doubtless become movie heroes.

In any case, there's little to be done to make curly hair straight (which one of our movie actors has his marcel wave renewed "permanently" every six months? I've forgotten). But the permanent wave shows what can be done to make straight hair curly. Those with undesired waves seem to go in for all sorts of creams and lotions and greases and pomades, and generally end up by losing curls and hair, too.

The only thing they can do is to use oil, plain, fine vegetable oil, castor or olive, rub it in well, and trust to their luck. Oily hair is not as curly as dry hair, most men with very curly hair suffer from a dry scalp as well, and most pomades, while apparently very oily, are full of drying substances like glycerine and alcohol. These make the hair seem oily, or at least very shiny, but they really make it sticky and in the end most of them do a lot of harm. The mere fact that the pores of the scalp are clogged with heavy ointment is enough.

But oil, vegetable oil that is, is absorbed by the scalp, and goes into the hair as nourishment. Also, it cures and it prevents dandruff, and if it's castor oil it darkens the hair a shade or so—most very blonde or red-haired men prefer darker coloring.

Not long ago I happened to say here that there was no reason

Diet and Health

By Lulu Hunt Peters, M.D.
Author of "Diet and Health, with Key to the Calories"

ANSWERS TO CORRESPONDENTS
K. G.—You want to know if it makes any difference how many calories you take while reducing? You'll find that a high number of calories of fat, yes, if it were possible to get food without any fat at all—which it is not, because most foods contain some fat—you would still gain in weight if you consumed more calories a day than you needed for your energy needs.

For instance, 100 calories of lettuce—over a pound—has only 14 calories of fat in the 100 calories. It would be just as fattening, however, as one tablespoonful (100 calories) of oil consisting of 100 calories of fat. One hundred calories of any food is just as fattening as 100 calories of any other food, for it will supply just as many calories of energy. Fats can be built from any food that happens to be more than the system needs for its energy and building and repairing activities. In counting your calories while you are reducing, it is highly important that you get sufficient protein calories to supply your repair needs, and growth needs if under maturity. Otherwise there will be trouble. You should have 250 to 350 calories of protein a day. We do not measure vitamins and the mineral elements in calories, so we cannot say how many calories of these we need. But you must select your foods so that you will get sufficient of these.

Green leaf vegetables, fruit, milk and whole grains are the main vitamin and essential mineral element-bearing foods.

Your double chin, you will find, will go down as you reduce your weight. The chin supports to be worn at night which you inquire about might or might not have any effect. It seems to me they would have to be worn rather tight to have any effect, and that might be harmful. Still, if you have very much of a double chin, they might help. It would be worth trying, anyway.

A. Y.—If you don't feel better while reducing it is undoubtedly because you have been reducing too rapidly or have not been getting the right foods for your needs. Re-read our directions carefully, please.

For your constipation, if you are getting a goodly amount of the green vegetables and fruit and they do not seem to help you, add two heaping tablespoonfuls of granulated agar taken in two glasses of water every day, and increase your vigorous walking.

Miss T.—You say you eat like the mischief, but still are under weight. You are troubled with discolored areas of the face. You never eat pastry nor rich food, but are fond of steaks, chops and eggs. I suspect that you are getting altogether too much protein, and protein in excess is harmful. You are probably getting too few calories of energy foods, and foods containing the essential mineral elements and vitamins.

Send for our article on balanced diet, and balance your diet, and see how you get along. I suppose that you have had a thorough physical examination to see whether you have any organic trouble?

G. H.—It is not unusual at all to look a little pale while reducing. Your girl friend should pay particular attention to her growth needs and not reduce more than a pound or pound and a half a week. A quart of skimmed milk or buttermilk should be included

DINNER STORIES

"Uncle Joe" Cannon's first speech in the house has been written into history as "the hayseed speech," but it really resulted in revision of the postal code establishing the pound rate of paying postage on second-class mail matter, says the Los Angeles Examiner.

The postage on newspapers previously had to be paid by the subscriber and collected by the postmaster making the delivery. Under the legislation put through by Cannon the postage had to be paid at the office of publication at a pound rate.

While making his "maiden speech," Representative Cannon was interrupted by Representative Walter Phelps of New Jersey, who said: "The gentleman seems to have oats in his pocket."

"Yes," promptly replied Cannon, "and hayseed in his hair, and that's the style of most of my constituents. I hope that both are good seed and will grow good crops here in the east."

Dollar gasoline would make it so high the bootleggers would have to use something else as a basis for their gin.

The 10-cent stores are said to be thronged with people who are getting ready to meet the June wedding season.

In her diet, she should also include a little butter for its growth vitamins. Is she doing this?

Miss J.—We have many letters from those who have reduced their weight, telling us inflammations, varicose veins and ulcerated conditions of the leg have disappeared with the disappearance of the excess weight. We hope that when you lose your 40 pounds excess you will be benefited, too.

EAGLE ROCK ORGANIZATIONS HOLD MEETINGS

Parent-Teacher Association And Legion Auxiliary In Gatherings

Two prominent organizations met last night in Eagle Rock, the East End Parent-Teacher Association and the American Legion Auxiliary.

The P.T.A. met at the East End school, where a fine program was enjoyed. Madame Shirley singing "Eagle Rock," the song dedicated to the Eagle Rock Improvement Association, music for which was written by the singer and words by Mrs. Rae.

The American Legion Auxiliary met at the home of Miss Katherine Bessolo, on West Colorado boulevard, where a card party was enjoyed by a large gathering, bridge and five hundred being played.

The graduating class of the Presbyterian Sunday school Junior Department was entertained Tuesday morning, June 5, by Dr. McClellan, at his home at 217 North Highlands avenue, a three-course breakfast being served, with place cards in the form of miniature diplomas.

Those present were Misses Dorothy Beers, Avis Jenkins, Barbara Edwards, Edith Edwards, Elaine Geis, Mary Jane Hutchins, Marjorie Knox, Dorothy Taylor, Hazel Murdock, Elizabeth Hanson, Priscilla Reed, Ida Lester, Bernice Strevig, Belle Vesey, Claire Tracy, Josephine Monroe, Erina Witte, Mary Morris and Carl Crawford.

The next week or ten days are to be busy ones, socially, in Eagle Rock, graduation exercises and final meetings for the year of many organizations making for a full program.

Today, June 9, the Juvenile Music Club held a special meeting at the Women's Twentieth Century clubhouse, at 12:30 o'clock, when all members who have any part in the plays of Bach and Mozart were present for practice.

A children's art exhibit is now on at the Central school and will continue until June 15. It is announced by Miss Jordan, art instructor. The exhibit extends almost the full length of both sides of the hall and is a remarkable indication of what a capable teacher can accomplish.

Miss Jordan has on hand a number of free pamphlets explaining how the course can be of use to the children when they have grown up, the principles taught being of great value in later years.

The Central P.T.A. is offering prizes for the best dahlia exhibits in Eagle Rock's big annual show next October, and announces that bulbs should be planted before June 15.

Each class in the school is to have a dahlia captain. Anyone wishing to donate bulbs for the school to plant should send them to Mrs. Koen or Mrs. Harrison. It is announced by the association, as these two teachers comprise the committee handling plans for the contests.

The Congregational Sunday school will celebrate Children's Day, June 10, in a unique way this year, when recognition will be accorded for faithful work done during the past three months, on the basis of written examinations held recently.

And June 12 is "Radio Night" for Eagle Rock, when, through the efforts of the local Realty Board, station KJH will broadcast a program of local talent, beginning sharp at 8 o'clock.

June 13—Final meeting of the P.T.A. Federation, to be held at the home of Mrs. A. G. Kelly, 550 East Colorado boulevard, in the afternoon. As the Eagle Rock Parent-Teacher associations are now a branch of the Los Angeles federation, the local federation will cease to exist with the close of this meeting, which lends a historic interest to the occasion.

On the night of the same day the Young People's Fellowship of St. Barnabas Episcopal church will give a supper in the rectory, corner of Stanley and Castle avenues, at 6:30 o'clock, the proceeds to go toward the church building fund.

June 14—The last luncheon of the season will be given at noon by the Women's Twentieth Century Club, at their clubhouse, Rev. E. Morgan Isaac, pastor of the Eagle Rock Congregational church, will be the luncheon speaker, and John Stephen McGroarty will address the assembly in the afternoon. The affair is in charge of Mrs. Alice Winters.

On the night of the same day the 1923 class at Occidental College will present "The Medea," one of the ancient Greek dramas of Euripides, translated by Dr. William D. Ward, head of the classical language department of the college.

And also on the same night, the recently organized Professional and Business Women's Club will meet at the public library, at which time officers for the year will be elected.

June 15—Promotion Day, when the boys and girls of the S-A classes who graduate will be given their diplomas. The exercises will be held at the Central school, in the auditorium.

COMMENT That's All

Historic Spots Change
C. of C. Drive Next Week
Foreign Correspondence
Autos and Development
By Gil A. Cowan

GLENDALE loses more of its historic beauty in the subdivision and sale of La Ramada and Casa Verdugo parks in the northern section of the city.

It seems but yesterday when gay parties of tourists and others gathered around the palms and peepers, or at the festive tables of the Spanish cafes where the origin of our modern cabaret was found. Tourists came by the hundreds, ten to fifteen years ago, to see the Spanish dances, to hear the music of old Spain and to dance a bit themselves between courses of a Spanish meal.

The Pacific Electric advertised La Ramada as one of its principal resorts for picnic parties; the original Casa Verdugo cafe was known from coast to coast. These two places were attractions which brought hundreds of onlookers to Glendale in the days before a Chamber of Commerce.

It is a pity they are passing, but the new is always replacing the old. And Casa Verdugo, itself, lives on in the cafe at the head of Grand boulevard, up where the city meets the Green Verdugo hills.

Speaking of the Chamber of Commerce reminds us that a drive for membership will open the first of next week. Active members are the life blood of any organization, and a survey of the city shows the necessity for having 1,500 boosters doing their bit in financing the civic commercial organization.

The right sort of a Chamber of Commerce is a boon to any community. And the right sort of a community has a Chamber of Commerce. These two statements may be safely made without fear of contradiction.

In the words of a colored philosopher, "Glendale should have nothing else but."

W. B. Kirk, one of the first secretaries of the Glendale Chamber of Commerce, a decade ago, is leaving the Southland this week-end for a tour around the world which will take the large part of a year.

It will be interesting, indeed, to friends and readers of The Glendale Evening News to know that his articles will be published in this newspaper exclusively.

Foreign correspondence is something seldom achieved by an inland publication in a city of the size of Glendale, but The Evening News already has displayed itself as an institution, sending special correspondents to cover various assignments within the state. And now it looks to a larger field of interest for its readers in the results of Mr. Kirk's observations.

For those of us who must stay at home there are always new fields to conquer in the way of a Sunday motor trip. Few are there who live in Glendale without an automobile.

Every Saturday The Evening News carries columns of helpful hints, descriptions of new scenic drives, general touring information and the latest news of the motor world. It will pay you well to read the Automobile Section to-day.

Then, if you turn to the Development pages, you may find some new tract of interest which is well worth seeing. Go out in your car and get a glimpse of what the realty men are offering. It is an inspiration.

LEGIONNAIRES TO ATTEND OUTING

Catalina Island Will Be Scene of Gathering on Saturday, June 16

Some fifty Legionnaires from the Glendale post, among them Dr. W. W. Warriner and Henry Prussing, will journey with the annual American Legion caravan to Catalina Island, Saturday, June 16, when veterans of all wars will rally with their families at Avalon for a big two-day outing, returning to the mainland Sunday night, June 17.

South Pasadena's mayor, Philip F. Dodson, and A. B. Waddingham, city manager of Avalon, have abandoned all other business and are directing the efforts of the American Legion committee that hopes to land 5,000 ex-service men on the island for this outing. Post commanders in all Southern California cities and communities are arranging for the special transportation offered by Chairman Waddingham's committee.

The big steamer "Avalon" will make a special trip at 10 o'clock of the morning of Saturday, and again at 3:45 in the afternoon.

A parade of posts with bands and color standards will take place on the island at 7:30 Saturday evening, led by the Hollywood American Legion band of 125 pieces. A carnival will follow, and at 12 midnight the Forty and Eight, which is the playground organization of the Legion, will begin its entertainment of vaudeville. The following day, among other sports, there will be a baseball struggle between El Segundo Post and Los Angeles Post 8, American Legion, which will probably decide the Legion baseball championship.

All steamer and hotel reservations are being made through local post commanders and Chairman Waddingham's committee, room 900, Hibernian building, Los Angeles. A half-fare rate is being granted by the Wilmington Transportation Company.

Have you tried the Spanish Dinners at the Golden Spanish Cafe, 111 S. Orange. Advertisements 6-8-9-11.

Coffins of clay were often first molded around the body and then baked, in ancient Greece.

KIWANIS FAVOR COF C PROJECT

Organization Indorses Drive to Start Next Week; Music and Talks

The Glendale Kiwanis club met yesterday noon at the Tuesday Afternoon clubhouse and unanimously indorsed the membership drive which will be waged next week by the Glendale Chamber of Commerce.

A motion, recommending this action, was put by Ed N. Radke of 109 South Brand boulevard and seconded by W. L. Truitt of 512 South Brand boulevard. It was solicited by A. L. Ferguson, president of the club, and was put to a vote without comment.

S. P. Morris, member of the organization service department of the Los Angeles Chamber of Commerce, made a short oration upon "The Chivalry of Kiwanians." "There is a business romance and poetry, if you please, in the work of the Kiwanians. It is a thing of life, he remarked, commenting upon the wholesome song between the courses of the modern commercial world.

Meanwhile, Mayor Spencer Robinson and Jesse E. Smith, president of the Chamber of Commerce, sat side by side and almost off the same plate. Mr. Robinson was so full of rhythm that he could not refrain from bursting into song between the courses of the luncheon.

Some Jazz Artists This rhythm was furnished to a large extent by a quartet of jazz artists from the high school. With Ralph Van Hornbeck at the piano, Lowry Truitt upon a saxophone, Ed Stockbridge with a banjo and Sam Dow with a cornet, they worked "Carolina" in the morning. They were assisted by an accompanying clink of knives against glasses and dishes.

No sooner had the first orchestra piece subsided, than a group led by A. L. Baird of 131 South Brand boulevard, yelled: "We want soup!" They didn't get it, however, because there was no soup. In the emergency, O. W. Andresson, of 156 South Brand boulevard, son of the club, sprang to his feet and exclaimed: "Let's sing one hundred and seven!" It happened to be "There's a Long, Long Trail." Herbert Henning of 1211 North Columbus avenue accompanied the club on the vocal excursion.

C. W. Ingledue, of 632 East Broadway, supervised the drawing of the prizes of the occasion. City Engineer Ben F. Dupuy of 722 East Lomita avenue won an order, donated by Goode and Belew of 110 East Broadway, to have a suit cleaned. The attendance prize was a flashlight donated by Mr. Ingledue. It was won by Attorney Bert L. Woodward of 103 South Brand boulevard. Owing to the fact that he was unable to answer questions about the club, he was elected chairman of the education committee, it was given to E. P. Hayward of 142 West Brand boulevard. He said that it was just what he needed.

Illustrated Lecture "The Romance of Electricity in Central and Southern California" was the subject of an illustrated lecture by W. S. Blossom, field superintendent of education for the Southern California Edison Company.

Several reels of motion pictures were shown by a portable projection machine which was operated by Max Quintilla of Los Angeles. The pictures depicted some of the beautiful scenery which is the storehouse of California's supply of "white coal."

The Panama Canal, which was an achievement of Yankee ingenuity, cost \$360,000,000. The Southern California Edison Company in the next ten years will be obliged to spend \$15,000,000 in excess of that sum, or \$75,000,000 to keep pace with the growth of California with its increase in population of forty-six per cent during the last ten years.

Lake Huntington, seventy-five miles northeast of Fresno and on the edge of the Sequoia National park, was the scene of a number of the pictures. This has been visited by several of the members of the club.

Many on Payroll Whereas the Culpari in the Panama canal is only thirty miles long, Florence tunnel, under Kaiser ridge, will be half as long and is being hewn out of rock so hard that it is only possible to advance sixteen feet a day and at a cost of a million dollars a mile.

The Southern California Edison Company has on its payroll 10,700, half of whom are employed in the mountains and ninety-eight per cent of which are stockholders in the company. He added that 40,000 of the company's stockholders live in the state of California.

The activities of this company cover an area of 55,000 square miles. Electricity is furnished to 312 communities, which have a combined population of a million and a half.

The Pacific Gas and Electric Company of San Francisco is still larger than the Southern California Edison Company.

Joseph Greaves Buys J. R. Lockwood Home

J. R. Lockwood of 827 South Glendale avenue has sold his property at that address to Joseph Greaves of South Columbus avenue and is leaving for Catalina Island, where he will spend the summer.

On his return to Glendale in the fall Mr. Lockwood will build a new seven-room house on his property on North Orange street, between Milford and Doran streets.

News want ads bring results.

CHURCHES

GLENDALE is fast acquiring a group of new church buildings that are proving wonderful places of worship for local congregations as well as attracting attention in the various denominations throughout the state and nation.

The next new church to be formally opened will be the new church of the Gospel Tabernacle of the Christian and Missionary Alliance at the southeast corner of Louise and Chestnut streets. Plans have been made for the dedication of this new house of worship Sunday, June 17.

Rev. C. H. Chrisman, pastor will officiate and will be assisted by special ministers as honored guests.

First Baptist
Church at corner of Wilson avenue and Louise street; Rev. Ernest E. Ford, pastor; H. W. Carver, musical director; Eva Kurtz, organist; R. Kent, superintendent of Sunday school. Sunday school annual "Children's Day" celebrated at 10 o'clock, program to be followed by baptism; Senior and Intermediate B. Y. P. U. will hold union service 6:45 o'clock; evening service 7:45 o'clock, sermon by Rev. Ford, "Growing Interest."

St. Mark's Episcopal
Church at corner of Harvard and Louise streets. Rev. Philip K. Kemp, rector. Holy Communion 7:30 a. m.; church school 9:30 a. m.; morning prayer and sermon 11 a. m.; evening prayer and sermon 7:30 o'clock. Monday, June 11, St. Barnabas' day, Holy Communion 10 o'clock. Vested choir; Mrs. Charles A. Parker, director; Mrs. Joseph K. Korganist.

Music in the morning: Prelude, "Adagio" (Volckman); Processional, "When Morning Gilds the Skies"; Venite (Boyce); Te Deum (Woodward); Benedictus (Trout); Introit, "My Faith Looks Up to Thee"; sermon hymn, "Jesus, Lover of My Soul"; Offertory, baritone solo, "Just As I Am" (Adams); by Frank Lansdown; "Rejoice, Rejoice, Pure in Heart"; postlude, "Hero's March" (Mendelssohn).

In the evening: Prelude (Swan Song) (Blumenthal); Processional, "The Day Is Past and Over"; Magnificat (Russell); Nunc Dimittis (Rose); Introit, "Sing, My Soul, His Praises"; offertory, "Prayer" (Groven); Recessional, "O Worship the King"; postlude, "March" (Ravina).

Congregational
Church at North Central and Wilson avenues. Rev. C. M. Calderwood, pastor; O. E. Von Oven, Sunday school superintendent; Howard Edwards, organist; director of music; Sunday school "Children's Day" service, address by Rev. Calderwood; Christian Endeavor 6:30 o'clock, topic "Lessons From Every-Day Objects"; evening service 7:30 o'clock, illustrated lecture by Rev. Calderwood, "The Yosemite Valley," which he has just visited. Hymn and prayers on the screen.

First M. E.
Church at corner of Wilson avenue and Kenwood street. Dr. Henry I. Rasmus, Jr., pastor; Rev. Henry I. Rasmus, Jr., associate pastor. Sunday school (graded), 9:30 o'clock; Prof. A. W. Tower, superintendent; Mrs. H. W. Randall, organist. Morning worship 11 o'clock, sermon by Dr. H. I. Rasmus, Sr., "The Religion of the Upper Air"; young people service at the usual hour; evening service 7:30 o'clock, sermon by Rev. Rasmus, Jr., "The Cross of My Christ and of Me."

Music in the morning: Prelude, "Prelude" (Miller); anthem, "Christian, the Morn Breaks Sweetly" (Shelley); organ offertory, "Communion in E Flat" (Hamer); offertory duet, "O For the Wings of a Dove" (Roma); Miss Isgrig and Mr. Dolberg; postlude, "Postlude" (Chauvet). In the evening: Prelude, "Peaceful Days" (Dunn); "A Springtime Sketch" (Brewer); anthem, "Still, Still With Thee" (Boyle); organ offertory, "Tranquillity" (Roberts); trio, "Ye the Lord" (Roberts); "My Soul Doth Magnify the Lord" (Saint Saens), by Miss Isgrig, Mr. Dolberg and Dr. Lucas; postlude, "Postlude" (Faulkes).

Central Christian
Church at Colorado and Louise streets; Will J. Myers, choir director. Sunday school graded, trained teachers, 9:30 o'clock; morning worship 10:30 o'clock, sermon by Rev. Cole, subject, "Lessons From Everyday Objects"; "What's in a Name?"; young people meet at the usual hour.

Evening service 7:45 o'clock, sermon by Rev. Cole, "Twilight Ogres, Will Selfishness and Ignorance Prevail?" the seventh in series "Is the World Growing Better?" A beautiful set of pictures will be shown.

Music in the morning: Anthem, "God of Our Fathers" (P. A. Schneckner); soprano solo (selected), Mrs. Floyd Mercer. In the evening: Anthem, "Crossing the Bar" (Helena Bingham); male quartet, "Only a Contrite Sinner" (Gabriel), by Messrs. Mize, Logan, Davidson and Myers.

Broadway Methodist Church South
Meets in American Legion hall, 610 East Broadway. L. J. Millikan, pastor. Will J. Myers, soloist and musical director. J. N. McGillis, superintendent. Sunday school 9:45 o'clock; morning service 11 o'clock, sermon by Dr. H. S. Werlein, presiding elder of the Los Angeles district; at 2:30 o'clock Dr. Werlein will hold the third quarterly conference at the Presbyterian church at the corner of Broadway and Cedar street.

Church of Divine Realization (New Thought Center)
Meets in the Tuesday Afternoon Clubhouse at 400 North Central avenue, Sunday school 10 o'clock; psycho-analysis class 10 to 11 o'clock; meeting 11 o'clock, address by Dr. Werlein.

Holy Family Catholic
Church at corner of Elk and Louise streets. Rev. Michael Galvin, parish priest; Rev. Patrick Curran, assistant. Masses at 6:30 a. m.; 8 o'clock; 10:30 o'clock. Sunday school 8:45 o'clock. Rosary service closing with benediction.

Church of the Nazarene
1002 South Glendale avenue. Rev. Henry Scheideman, pastor. Services for Sunday, June 10, 1923, Sunday school 2 p. m.; Mrs. Evans, superintendent. Preaching at 3 p. m.

No evening service this Sunday on account of the Assembly in Pasadena. Tuesday evening, prayer meeting at 7:30 o'clock.

Church at South Central and Palmer avenues. Rev. Y. Hunter, Brink, D. D., pastor; Dr. Joseph Marple, musical director; Mrs. Casper Turner, pianist; D. C. Bear, superintendent; Mrs. Elsie Moore, chorister; L. Baker, president of Epworth League; Sunday school "Children's Day" service, 9:30 o'clock; special flag day service 11 o'clock, sermon by Rev. Brink, G. A. R. and W. R. C. members special guests; Epworth League devotional meeting 6:45 o'clock; evening service 7:45 o'clock, sermon by Rev. Brink.

Concordia Evangelical Lutheran (Missouri Synod)
Church at corner of California avenue and Isabel street. Rev. Henry O. Krings, pastor, Helen Seehase, organist. On Sunday, June 10, the congregation will worship in union with the Lutheran churches of Los Angeles and surrounding suburbs in the Eagle Rock canyon at one large joint mission celebration in the interests of the Lutheran missionary endeavors at home and abroad. There will be two services, commencing at 10:30 o'clock in the morning and 2:30 o'clock in the afternoon. Four speakers will address the audience, among them being Rev. Krings at the morning service.

BIG COLLECTION OF LATE RECORDS

Salmacia Store Presenting Wide Variety of New Phonograph Music

Phonograph entertainment is one of the pleasures of vacation days, and the Salmacia Music stores at 109 North Brand boulevard and 126 South Brand have a whole collection of tempting records to offer Glendaleans who are wanting some new ones for home or summer cottage machines.

An announcement from the store outlines the following record stock:

The Victor dance numbers include a new organization in a couple of fox trots and Memphis Five, includes neither saxophone, banjo, nor violin, cornet, trombone, traps, piano and clarinet, however, it achieves some effects for which no apologies are due. "Who's Sorry Now?" might be sad were it not for a plethora of jazz; "Snake's Hips," on the reverse begins with some energetic rhythm and then settles down to straight jazz.

Good Piano Work
Confrey and his men make good work of "Liza," a fox trot, with some particularly unusual piano work—which is saying a lot, considering Zex Confrey is responsible; on the other side, the "Great White Way" orchestra makes a smooth and standard record of "Down Among the Sleepy Hills of Ten-Ten-Tennessee."

The White Ways make another record of "Roselle," an airy, fairy, sort of thing, introducing Billy Murray, who sings a few words in refrain. The human voice stages a contest with a saxophone; on the other side, the Benson orchestra of Chicago plays, "Loose Feet," a little masterpiece of dance-writing in the "blue" style.

Paul Whiteman has made another Oriental fox trot record to which is hitched the locally suggestive title "By the Shalimar." It has a rich and powerful scoring with big bells and saxophone chorales; on the other side the same orchestra plays "Sweet One," a yelp shimmy one-step.

More new organizations on the Victor program are the original Pennsylvania Serranadors and Collegians, who make a brace of fox trot records this month. The first organization began at Lancaster, Pa., a couple of years ago and soon were touring the entire south. The Collegians started playing at Cornell "Proms" but were so good they didn't stop there. The Lancaster boys play "You Tell Her, I Stutter," a song you probably know. The Cornellians play "That Red Headed Gal," a romantic delibes-like melody.

French and Floating
Two waltzes horn in on the June Victor records, both by the Troubadours and real sentimental string waltzes; they are "April Smiles," in French and floating, "Zenda," is similarly styled, clear and cool.

Zex Confrey's Boys put a real Yankee twang into "New Hampshire," a new lively fox trot on the Victor list. Geographically, the south has hogged nomenclature and this trip to "Points on the South" comes as a novelty. On the reverse, the Great White Way plays "Marchetta," a brilliant medley fox trot in the Spanish style.

Again an organization makes its premier on Victor records in June: W. Brooke Johns and his orchestra has its own peculiar style, with a conductor for his own song playing, and two vocal refrains—"I Want a Pretty Girl," has brisk melodies, with two vocal refrains. "Don't Cry Swannee," has its typically "Swannee" dance rhythm, reinforced with a banjo.

At 7:45 o'clock, for the convenience of the congregation, four masses will be held every Sunday (Christian and Missionary Alliance).

Gospel Tabernacle
Church at corner of Louise and Chestnut streets. Rev. C. H. Chrisman, pastor. Sunday school 9:45 o'clock; morning service 11 o'clock; young people meet at 6:15 o'clock; praise service 7:30 o'clock.

Occult Science
Services at 2:30 o'clock and 7:30 o'clock in the Chamber of Commerce hall, 150 South Brand boulevard; Rev. Jennie McHenry in charge. Healing at 2:30 and 3 o'clock, lecture by associate pastor of Los Angeles; lecture at 8 o'clock Sunday night by Rev. Jennie McHenry. Messages at all services.

Glendale Presbyterian
"Church of the Lighted Cross." Broadway at Cedar street. Rev. W. E. Edmonds, pastor; Rev. Louis Tinning, assistant pastor; H. S. Finlay, S. S. superintendent; Mrs. Fannie Marple Retts, musical director. Sunday school, fully graded, 9:30 o'clock. Men's Bible class, City Hall, 9:30 o'clock. Morning worship, 11 o'clock; sermon by Rev. Mr. Edmonds.

Seventh Day Adventist
Church at corner of Isabel street and California avenue; Elder R. W. Parmelee, pastor. Sabbath school (Saturday) 9:30 o'clock; preaching service 10:45 o'clock; preaching Sunday night at 7:30 o'clock; district prayer meetings in fourteen districts of the city, in the church Wednesday night at 7:30 o'clock; Y. P. M. V. Friday night at 7:30 o'clock.

Church of the Nazarene
1002 South Glendale avenue. Rev. Henry Scheideman, pastor. Services for Sunday, June 10, 1923, Sunday school 2 p. m.; Mrs. Evans, superintendent. Preaching at 3 p. m.

No evening service this Sunday on account of the Assembly in Pasadena. Tuesday evening, prayer meeting at 7:30 o'clock.

Holy Family Catholic
Church at corner of Elk and Louise streets. Rev. Michael Galvin, parish priest; Rev. Patrick Curran, assistant. Masses at 6:30 a. m.; 8 o'clock; 10:30 o'clock. Sunday school 8:45 o'clock. Rosary service closing with benediction.
